NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.				
On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.				
A copy of the labeling accepted in connection with this Regi	stration/Reregistration is returned	ed herewith.		
Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.				
This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:				
1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.				
2. Make the labeling changes listed below before you release the product for shipment:				
a. Add the phrase "EPA Registration No. 32802-42."				
b. The proposed labeling is generally acceptable; however, we suggest that you expand the Spreader Settings Table to include settings for all the label recommended dosage rates. Also change the word "have" to "half" in the sentence below this table.				
<ol> <li>Submit five (5) copies of you release the product for shipment. Ref description of final printed labeling.</li> </ol>	er to the A-79 enclosu			
description of that prince inversity				
ATTACHMENT IS APPLICABLE				
SIGNATURE OF APPROVING OFFICIAL		DATE		
EPA Form 8570-6 (Rev. 5-76) PREVIOUS EDITION	MAY BE USEC UNTIL SUPPLY IS E			

PREVIOUS EDITION MAY BE USED UNTIL SUPPLY IS EXHAUSTED.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

# PRECAUTIONARY STATEMENTS

# HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed, INHALED or absorbed through the skin. Causes moderate eye irritation. Avoid breathing vapor; or dust. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating or smoking. Wash contaminated clothing with soap and hot water before re-use.

### ENVIRONMENTAL HAZARDS

Do not contaminate water by cleaning of equipment or disposal of wastes. Do not use on crops grown for food or forage. Do not apply directly to water. Apply this product only as specified on this label. Do not apply when weather conditions favor drift from target area.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. STORAGE.

Store product in original bag in a cool, dry, locked place out of reach of children. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned stay out of smoke.

HOUSEHOLD: Do not re-use empty bag. Wrap and put in trash.

Bayleton is absorbed rapidly and works systemically from within the plant. Rainfall or sprinkler irrigation soon after application will assure rapid systemic uptake. Control will be less effective on turf suffering from drought stress. Therefore in order to achieve maximum control, plants should be maintained in a vigorously growing state through good cultural practices. Apply when the turf is fully established and actively growing. Applications should be applied at recommended intervals to maintain control.

#### DISEASES AND RATES FOR PREVENTION OR CURE

DISEASE	HOW MUCH TO USE	REMARKS
 	PER 1,000 SQ.FT.	 
	PREVENTIVE   CURATIVE	PREVENTIVE RATE: Apply recommended rate on 30 day intervals.
 	3 lbs.   -   !	Protective activity of product may extend for as long as 60    days dependent upon environmental conditions.
DOLLAR SPOT	   1.5 lbs.   - 	PREVENTIVE RATE: Apply recommended rate on 14 day intervals.    Protective activity of product may extend for as long as 30 days    dependent upon environmental conditions.

PRO-TEK™ LAWN

TRIADIMEFON MRID #109901

# DISEASES AND RATES FOR PREVENTION OR CONTROL

DISEASE	HOW MUCH TO USE PER 1,000 SQ.FT.	REMARKS
COPPER SPOT   POWDERY MILDEW   RED THREAD   (Laetisara   fuciformis)   RUSTS   BROWN PATCH   (Rhizoctonia   solani)	} 3 lbs.   6 lbs.	PREVENTIVE RATE: Apply at 15 to 30 day intervals. When environmental conditions favor light to moderate disease development, use a longer interval. Protective activity of this product can be greater than 30 days depending on environmental conditions.  CURATIVE RATE: To control existing infections, apply the curative rate. Subsequent applications should be applied on a preventive schedule and rate.
(Supression)		· ·
ANTHRACNOSE	6 lbs.   -	PREVENTIVE RATE: Apply at 30 day intervals and repeat as [necessary for seasonal control. Dependent upon environmental [conditions, residual control may be extended to 45 days. PREVENTIVE RATE: Apply at 30 day intervals and repeat as
POA ANNUA DECLINE	3 lbs.   - -   6 lbs.	necessary for seasonal control. Dependent upon environmental conditions, residual control may be extended to 30 days. CURATIVE RATE: To control existing infections, apply the curative rate. Subsequent applications should be applied on preventive schedule and rate.
STRIPED SMUT	PREVENTIVE RATE ONLY 6 lbs.	    Make a single application in spring as grass growth begins.
FUSARIUM BLIGHT (Fusarium spp.)	6 lbs. (California Only)	Apply 1st applications in mid-June or 30 days prior to time this blight normally becomes evident. Apply at 30 day intervals.  For California Only apply at 8 lbs. rate on 15 day intervals or lat the 12 lb. rate on 30 day intervals.
GRAY SNOW MOLD (Typhula incarnata) Except California	12 lbs.	Apply in fall 30 days prior to turf dormancy. If turf breaks dormancy during winter months a second application should be made. Do not apply over snow cover, or when turf is dormant.
PINK SNOW MOLD FUSARIUM PATCH (Fusarium nivale) SOUTHERN BLIGHT (Sclerotium rolfsii) Except California	δ to 12 lbs.	Apply before conditions favorable for infection occur. Repeat as   needed at 60 to 90 day intervals. Do not apply over snow cover or   when turf is dormant. Use high rate in turf with a history of   severe yearly disease damage.
GRAY SNOW MOLD PINK SNOW MOLD California Only		Apply in late fall before snow cover. Do not apply over snow.  Use the high rate in areas with a history of severe snow mold   turf damage.

\\HOJO\32BAYLTN.LA4 \HD#\\
EPA File Sym:32802-\_\_ PRO-TEKTM LAWN FUNGICIDE
TRIADIMEFON MRID #109901

LAWN DISEASE CONTROL IS BASED ON PROPER APPLICATION
The following spreader settings are for use with new equipment. Your used spreader may need calibrating. Since proper application is based on the spreaders condition with regard to age and use, your walking speed and the eveness of the terrain, your spreader may require a slight adjustment.

If you have reason to believe that your spreader is not calibrated correctly test apply by placing the amount for 500 Sq.Ft. into your spreader and apply to your pre-measured 500 Sq.Ft.(5 ft. wide by 100 ft long)

HOW TO MAKE SURE YOUR SPREADER IS OPERATING CORRECTLY Using a Scott Spreader For Disease Control place 1.50 lbs. granules in your spreader using No.4 1/2 setting & apply to 500 Sq.Ft. With a 20 inch spreader this will equal 3 spreader widths wide (3 passes) by 100 feet long. If you run out before you cover the pre-measure area close the spreader setting by 1/2 the number. If you have granules left over, open (increase) the spreader setting by 1/2 the number. For further help refer to your Spreader Guide Book.

POOR DISEASE CONTROL WILL RESULT IF YOUR SPREADER APPLIES LESS GRANULES THAN RECOMMENDED.... MAKE SURE TO APPLY THE TOTAL POUNDS PER SQUARE FEET AS SHOWN IN THE FOLLOWING CHART.

		SPREADER SETTINGS	
SPREADER	AMOUNT TO	18 POUNDS	18 POUNDS
	APPLY	PER 6,000 SQ.FT.	PER 3,000 Sq.Ft.
		3.0 lbs./1,000 Sq.Ft.	6.0 lbs./1,000 Sq.Ft.
Scott	18 pounds _	# 4 1/2	<u> </u>
Cyclone	18 pounds	# 3]	# 4

When using a 18 lb. bag; spreader settings will be the same as for the 36 lb. bag but it will treat only have the amount of Sq.Ft. as the 36 lb bag. These settings are based on a "One Time Over" application.

NOTICE: Buyer and user assumes all risk and liability of use, storage and/or handling of this product not in accordance with the terms of this label.
