SPRING APPLICATIONS: For single applications in the spring or early summer, use the appropriate rate from "Application Rates" table (depending on user's location, mowing height, pre- or post-emergent use). The duration of residual weed control is directly related to the total rate applied, but varies depending on weather, weed pressure and location. Use "Program 1" for preemergence control on areas where turf is cut high (home lawns) for 3 to 5 months of crabgrass control. This program should not be used for postemergence crategrass control. Use "Program 2" for preemergence control where turf is cut high (home lawns) for 3 to 5 months of crabgrass control. Use "Program 2" for preemergence control where turf is cut high (botto) where weed control, and also for early postemergence control of crabgrass.
