FIRST AID

IF SWALLOWED - Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF IN EYES** - Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice. **IF ON SKIN** - Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED**: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for further treatment advice. Have this product container or label with you when calling a poison control center, or doctor, or when going for treatment. **READ ENTIRE LABEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.**

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING: Causes substantial but temporary eye injury. Wear protective eyewear (goggles, face shield or safety glasses). Causes skin irritation. Do not get in eyes, on skin or clothing. Harmful if swallowed, absorbed through the skin, or inhaled. Avoid breathing dust, or contact with skin, eyes or clothing. Remove contaminated clothing and wash clothing before reuse. Wash thoroughly with soap and water after handling. Do not allow domestic animals to graze treated areas. Avoid contamination of feed and foodstuffs.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear coveralls over short-sleeved shirt and short pants; chemical resistant gloves, chemical resistant footwear plus socks; protective eyewear, headgear for overhead exposure; chemical resistant apron when cleaning equipment. Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Applicators should: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Do not apply this product through any type of irrigation system. Apply only as specified on this label.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests and nurseries, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls; chemical resistant (Barrier Laminate) gloves, chemical resistant footwear plus socks, protective eyewear, and chemical resistant headgear for overhead exposure.

Controls Crabgrass, Goosegrass, Poa Annua, Annual Sedge and other weeds as listed, on Golf Courses, Parks and Recreational, and Ornamental Turf.

WHERE, HOW MUCH AND WHEN TO USE ON TURFGRASS

This product may be used at full rate or as a "split application" in established perennial Bluegrass, Bentgrass (see restrictions), Bermudagrass, Buffalograss, Perennial Ryegrass, St. Augustinegrass, Seashore Paspalum, Tall Fescue, and Zoysiagrass turf, at apartment/condominium complexes, corporate and public parks, golf courses, sod farms, athletic fields, playgrounds, cemeteries and other ornamental and recreational turfgrass area. **Not for use on home lawns.** The turf should be free of leaves and thatch and in condition to allow granules to reach the soil surface. Know the square footage of the area to be treated and uniformly apply using a granule spreader. Do not apply to turf when it is wet. When using at full rate do not overlap spreader applications, especially on St. Augustinegrass because discoloration "streaking" damage may temporarily occur from the "doubled-up rate". See section on this label entitled: **PRECAUTIONS IN USING ON TURFGRASS** for the maximum rate for St. Augustinegrass and Bentgrass of 3 lbs. a.i. per acre which is equiv. to 6.9 lbs. of this product per 1,000 sq. ft.). After application if rain is not expected within 24 hours sprinkler irrigate the treated turf with up to a 1/4 inch of water to release the herbicide for maximum weed control and quicker response from the fertilizer nutrients. This product is a pre-emergence herbicide and must be applied prior to weed seed germination. It will not control growing weeds. **For a SPLIT APPLICATION. See the "FOR SPRING APPLICATION ON GOLF COURSES" section, for instructions on how to apply the 3 lb. or 4 lb. a.i. per acre rate as a split application.

Pre-emergence Weed Control

Weeds Controlled	lbs. a.i. / Acre	lbs. of Product per 1,000 sq. ft.	Directions - Refer to Map of U.S.
Crabgrass (<i>Digitaria</i> , spp.)	2 to 4 lbs. a.i./A	4.6 to 9.2 lbs. per 1,000 sq. ft.	Apply in late winter or early spring prior to weed seed germination. See map. In areas 4 & 5 applications made after April or May, may not be fully effective.
Goosegrass (<i>Elymus indica</i>)	200 to 400 lbs. product / acre	4.6 to 9.2 lbs. per 1,000 sq. ft.	Apply in late summer to early fall prior to weed seed germination.
Field Sandbur (<i>Cenchrus incertus</i>)	2 to 4 lbs. a.i./A	4.6 to 9.2 lbs. per 1,000 sq. ft.	Apply in late summer to early fall prior to weed seed germination.
Annual Sedge (<i>Cyperus compressus</i>)	200 to 400 lbs. product / acre	4.6 to 9.2 lbs. per 1,000 sq. ft.	Apply in late summer to early fall prior to weed seed germination.
Annual Bluegrass (<i>Poa annua</i> spp.) (See Note Below)	2 to 4 lbs. a.i./A	4.6 to 9.2 lbs. per 1,000 sq. ft.	Apply in late summer to early fall prior to weed seed germination.
Virginia Buttonweed (<i>Diodia</i>)	4 lbs. a.i./A	9.2 lbs. per 1,000 sq. ft.	Apply in early spring prior to weed seed germination.
Pigweed (<i>Amaranthus</i> spp.)	400 lbs. product per Acre.	9.2 lbs. per 1,000 sq. ft.	Apply in early spring prior to weed seed germination.
Florida Pusley (<i>Richardia scabra</i>)			
Oxalis (<i>Oxalis</i> spp.)			
Stinging Nettle (<i>Urtica dioica</i>)			
Carpetgrass (<i>Axonopus officinis</i>)			

Fall Application for Spring Weed Control in Cool Season Turf

Crabgrass, Goosegrass and other annual weeds as listed.	3 to 4 lbs. a.i./A 300 to 400 lbs. product / acre	6.9 to 9.2 lbs. per 1,000 sq. ft.	For use in Bluegrass, Bentgrass, perennial Ryegrass and Tall Fescue. Make application in the fall after turf has become dormant. For late fall applications, seeding into treated areas should be delayed until 4 months after greenup.
---	--	-----------------------------------	---

Annual Bluegrass Control in Bermudagrass Fairways Overseeded with Perennial Ryegrass only.

Annual Bluegrass (<i>Poa annua</i> spp.)	2 lbs. a.i./A 200 lbs./acre	4.6 lbs./1,000 sq. ft.	Apply in late summer to early fall prior to <i>Poa annua</i> spp. seed germination. Any <i>Poa annua</i> spp. established when this product is applied will not be controlled. It should not be applied closer than 60 days to overseeding. Do not use where perennials is present in the overseed mixture. Apply the full 2 lb. rate if one application.
---	--------------------------------	------------------------	---

NOTE: In many areas annual bluegrass exists as at least two biotypes or subspecies of *Poa annua*. The true annual biotype, "*Poa annua* spp. annual" which germinates from seed every year is controlled, while the biotype, "*Poa annua* spp. raptans" which behaves like a perennial and survives through the summer, as an established plant, cannot be controlled. Consult the extension service or University weed specialist in your area for more information concerning your locale.

Annual Weed Control during turf establishment from "Sprigs" of Bermudagrass, Zoysiagrass, and Seashore Paspalum.

Crabgrass and Goosegrass, Annual Sedge and other annual weeds.	2 to 3 lbs. a.i./A 200 to 300 lbs. product per acre	4.6 to 6.9 lbs. product	Directions - Refer to Map of U.S. on this label. For Bermudagrass make application immediately prior to, or, immediately after sprigging. For Seashore Paspalum and Zoysia make application 10 to 14 days after sprigging. Applications made close to the time of sprigging may cause objectionable injury. Disturbance of the soil surface after application may disrupt the herbicide barrier and reduce effectiveness. For best results sprinkler irrigate the "sprigged" area with up to 1/4 inch water after application. 110905

NON-AGRICULTURAL USES REQUIREMENTS

The requirements of this box apply to uses of this product that are **NOT** within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, and nurseries. Thoroughly wash face and hands with soap and water after exposure and before eating or smoking. Wear protective clothing including long-sleeved shirt and impervious gloves when handling. Launder exposed clothing before reuse. Do not allow entry to areas treated until dusts have settled or if watering in is required, until treated area and grass is dry.

FOR SPRING APPLICATION ON GOLF COURSES

The 3 lb. and 4 lb. active ingredient, per acre rates may be applied as a split application. Weed control and better turf management may be programmed by splitting the per acre rate of active ingredient into "two" separate applications. For example to accomplish this in region #5 (See map of U.S.). Apply 1.5 lbs. a.i. (for a required 3 lbs. a.i./acre rate) or 2 lbs.a.i. (for a required 4 lb. a.i./acre rate) as the first application 1 to 2 weeks before estimated weed seed germination or in late December or early January. Follow with the second "1/2 rate" in 60 days or the first of March. The timing for these applications should be closely programmed to the geographic region and adjusted to an "early" or "late" spring. Do not split the 2 lb. a.i. / acre rate. The 3 lb.a.i. / acre rate should not be split if applied to new turf areas first coming under turf management where weed pressure is expected to be heavy.

PRECAUTIONS IN USING ON TURFGRASS

For St. Augustinegrass and Bentgrass turf, DO NOT exceed the rate of 3 lbs. a. i. per acre which is equal to 6.9 lbs. of this product per 1,000 sq.ft. DO NOT apply to Bentgrass turf mowed less than 3/8 inch. Avoid contact with flowers and shrubs except as recommended elsewhere for ornamental plants on this label. DO NOT apply to newly seeded areas. Seeding into treated areas should be delayed until 4 months after treatment except as noted above. DO NOT apply to Dichondra or Centipede grass. DO NOT use on golf course putting greens or tees.

*For the weeds with 1 asterisk above, use 3 to 4 lbs. a.i. per acre (equal to 300 lbs. to 400 lbs. of this product per acre or 6.9 lbs. to 9.2 lbs. per 1,000 sq.ft.).

**For the difficult-to-control weeds with 2 asterisks above, use 4 lbs. a.i. / acre (equal to 400 lbs. of this product / acre or 9.2 lbs./ 1,000 sq.ft.)

NOTE: For newly seeded lawns do not apply this product until after the second cutting. For best turf management, place new grass seed in the fall. Spring pre-emergence weed control can then be applied.

SPREADER SETTINGS

The following spreader settings are for new equipment. Used, or heavily worn equipment may require adjustments. For proper setting calibration refer to the spreader manufacturer's Maintenance Manual. Do not apply this product until equipment is properly calibrated to accurately apply the desired lbs. a. i. per acre, as recommended on this label.

Plan on an approximate 2 mph spreader speed to obtain best coverage. Know the exact square footage of the area before application. Incorrect application will result in poor weed control.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **STORAGE:** Store product in its original bag, in a cool, dry, locked place out of reach of children. In case of spill, sweep up, and use according to directions or dispose of as follows. **PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA regional office for guidance. **CONTAINER DISPOSAL:** Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. Stay out of smoke.

WHERE, HOW MUCH, AND WHEN TO USE AROUND ORNAMENTALS

Can be applied anytime of the year prior to weed seed germination to both newly transplanted and established actively growing or dormant ornamental plants where both weed control and fertilization is desired. Rainfall or overhead irrigation will improve weed control activity. Do not mix into soil. Disturbing or cultivating the soil after treatment may reduce weed control. Do not apply granules to wet foliage or under conditions in which granules will collect on leaves, if so, sprinkler-irrigate the plants to move granules off foliage and down to soil level. Do not apply in greenhouses as plant injury may likely result. Use the higher application rates for areas that have a history of heavy weed pressure. For best weed control around ornamentals first remove any existing weed growth and if possible rake, cultivate and smooth the soil surface by breaking-up clumps. Broadcast the granules evenly over the prepared soil by applying 2 lbs. to 4 lbs. a. i. per acre, equal to 200 to 400 lbs. of this product /acre or 4.6 to 9.2 lbs. per 1,000 sq.ft. 00-10-02
