3. Add the phrase "EPA Registration No. 33003-4".

4. Delete "EPA Registration No. 35495-12".

- 5. Change the Company "Name and Address" on the label.
- 6. Revise the Environmental Hazards to read as follows:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA".

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Walter C. Francis Acting Product Manager 32 Antimicrobial Program Branch Registration Division (7505C) CAP-2

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. For guidence, contact your State Water Board, Department of Environmental Quality or the closest regional office of the United States Envornmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS

Strong exidizing agent. Mix only with water, Use clean utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not rescal container. If possible, isolate container in open air or well-ventifated area. Flood with large volume of water if necessary.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SANIBAC 386 Sanitizer is recommended for use in the vegetable, meat, poultry and beverage industries, including the dairy and brewery industries. It is to be used to sanitize all food processing equipment, utensils, table tops, tanks, vats, floors and walls. It is also recommended for use on dishes, glasses and utensils in restaurants and institutions.

Thoroughly clean with detergent and rinse with potable water, all items or surfaces prior to sanitizing. For flat surfaces, remove gross food particles and soil by a pre-flush or pre-scrap before cleaning.

DIRECTIONS FOR USE (Continued)

Prepare a sanitizing solution by dissolving 1 oz. of SANIBAC 386 Sanitizer per each 10 gallons of water. This gives a solution containing 100 ppm of available chlorine. The sanitizing solution can be applied by brush cloth mechanical sprayer or any other equipment acceptable for this purpose. Let stand 2-5 minutes and then drain thoroughly and air dry. The same type of solution may be used in feed tank in immersion or spray type machines providing 2-5 minutes contact time for sanitizing dishes, glasses, food processing equipment and utensils. Drain thoroughly and air dry. The items are then ready for use.

The sanitizing solution should be used promptly after mixing. If the solution is allowed to stand and tests show the level of chlorine has not been maintained, additional SANIBAC 386 Sanitizer must be added to maintain a concentration of 100 ppm available chlorine.

If the sanitizing solution becomes visibly dirty or diluted, discard it and prepare a fresh sanitizing solution. Do not reuse sanitizing solutions.

SANIBAC 386 is accepted by the USDA for use in Federally inspected meat, poultry, shell egg grading and egg products inspection programs under the classification of D-2.

STORAGE AND DISPOSAL

1. PROHIBITIONS: Do not contaminate water, food, or feed by storage. or disposal.

2. STORAGE: Keep product dry and in tightly close "leon's iners when not in use. Store in a cool, dry, well-ventilated area away from heat or openflame. In case of a decomposition, isolate container if possible and flood with large amounts of water to dissolve all material leten ubcarding." 3. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste dispersal facility. 4: CONTAINER DISPOSAL: Completely empty inner liner by shaking Ind tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sani-acy landfill OC. by incineration if allowed by State and local authoritize. If drum is contaminated and cannot be reused, dispose of in the same youner. 5. GENERAL: Consult Federal, State, and local authorities for approved alternate method.
