# Clear-Zyme®

## DIRECTIONS FOR USE:

**Starting & Maintaining Ponds:** Use one Clear-Zyme block for each 250 U.S. gallons ((950 L) of pond water once a month.

**Cleaning Dirty Ponds:** Use one Clear-Zyme block for each 250 U.S. gallons (950 L) of pond water every week for one month. Then one block once a month.

Clear-Zyme blocks contain billions of beneficial bacteria and enzymes that quickly break down the unsightly wastes that accumulate on the bottom of ponds as a sludge layer.

Clear-Zyme blocks are also ideal when setting up a new pond and during the spring start-up and fall shutdown of established ponds. The blend of bacteria and enzymes is beneficial for developing and maintaining the pond's biological balance, resulting in a cleaner and clearer pond.

FREE Jungle® pond care chart inside.

Pond Water Clear® quickly clears cloudy water caused by suspended organic and inorganic particles, such as dirt, clay, silt, debris, etc. Pond Water Clear clumps small particles together to form larger particles which settle to the bottom of the pond. These can then be siphoned out or removed by filtration equipment. When added at recommended levels, water becomes milky but clears within a few hours. Use during morning hours. Use one teaspoon (5 mL) to 10 U.S. gallons (40 L). Clean measuring device before every use. Contents treats 240 U.S. gallons (900 L). Use half strength in soft water. Second dose may be added in 24 hours. Remove activated carbon during use. Caution: Remove snails and other invertebrates during use.

To keep filters operating efficiently, use Pond Water Clear every week.
