DIRECTIONS

Apply anytime during growing season when temperature is above 70°. Apply when grass is wet from dew or sprinkling. Use caution when applying this product. Application during periods of extreme heat or humidity could result in burning. If application is to be made during dry weather, water lawn thoroughly prior to applying product. Do not apply when humidity is high and temperature exceeds 90°.

For stubborn weeds, use two or three applications four weeks apart. Do not use on desirable clovers, bent, St. Augustine or Dichondra grass. Do not water, mow or use lawn for 36 hours after applications. Do not use on newly seeded areas until after third mowing. Treated areas may be seeded three to four weeks later—after rains or sprinkling.

Use a clean, properly adjusted spreader at setting shown below.
