"F - SUPER" FOGGING COMPOUND

FOR USE IN FOOD PROCESSING PLANTS, WAREHOUSES, AND INDUSTRIAL INSTALLATIONS

RECEIVED
15 APR 1974
REGISTRATION DIVISION

"F - SUPER" is a highly effective fogging compound for use in food processing plants where food products are prepared, handled, stored, or transported. It is used as a direct contact insecticide against exposed weevils, roaches, water bugs, flour moths, and other insects.

DIRECTIONS FOR USE

REQUIREMENTS: 1. Fogging should be done in a well-ventilated area. 2. Fogging should be done in the presence of personnel wearing protective clothing. 3. Fogging should be done in the presence of personnel wearing eye protection. 4. Fogging should be done in the presence of personnel wearing respiratory protection.

CAUTION

KEEP OUT OF THE REACH OF CHILDREN

DO NOT BE SWALLOWED

PRECAUTIONS: 1. Do not use in food processing plants where food products are prepared, handled, stored, or transported. 2. Do not use in food processing plants where food products are prepared, handled, stored, or transported.

NOTE: 1. Fogging should be done in a well-ventilated area. 2. Fogging should be done in the presence of personnel wearing protective clothing. 3. Fogging should be done in the presence of personnel wearing eye protection. 4. Fogging should be done in the presence of personnel wearing respiratory protection.

NOTE: 1. Fogging should be done in a well-ventilated area. 2. Fogging should be done in the presence of personnel wearing protective clothing. 3. Fogging should be done in the presence of personnel wearing eye protection. 4. Fogging should be done in the presence of personnel wearing respiratory protection.
