DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**STORAGE AND
DISPOSAL**

Do not reuse the empty container. Wrap container and put in trash collection.

This container delivers a stream type spray, making it possible for the operator to stay back from the places sprayed.

To Operate: Remove protective cap and depress button, being sure to aim spray opening at the location to be sprayed. Direct spray at insects wherever possible and under eaves, into nests, cracks, holes or crevices wherever insects are noticed. Spray for about 10 seconds or until surface is moist from insecticide. To prevent entrance of insects into the house, spray around points where outside plumbing, faucets, enter the house and into any cracks or crevices in foundation as well as along sills and ledges.

Kills Wasps, Hornets, and Yellow Jackets: This spray is fast acting when insects are hit directly. Allow about 24 hours for those insects which were not directly hit by spray to leave the area. If insects should return to the treated area, spray again.
