DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ LABEL BEFORE USE OF THIS PRODUCT.**

TO APPLY: Insert extension tube into actuator, hold upright and spray.

Caution should be taken to avoid depositing the insecticide onto exposed surfaces or introducing it into the air. Avoid contamination of food or food processing surfaces.

Apply as a spot treatment to baseboard areas, around water pipes, surfaces behind and beneath sinks, tubs, toilets, and similar areas where insects hide or through which they may enter. Repeat treatment as required.

Use in non food areas such as: garbage rooms, floor drains (to sewers), entries, vestibules, offices, equipment rooms, garages, storage areas.

TO CONTROL ANTS, COCKROACHES, SILVERFISH, CRACKLE, CENTIPEDS, GRASSHOPPER, CARPET BEETLES, SPIDER BEETLES, HOUSE BEETLES, LARDER, WIREWORMS AND PHLEBOTOMES: Apply in small amounts directly into cracks and crevices using an injection or insertion tube, at points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases and in conduits, meter housings, junction or switchboxes. Prior to application, turn off electrical equipment. After application, allow time for all to evaporate before starting meters or plugging switches in the "ON" position.

TO CONTROL FLIES: In animal quarters, treat bedding, floor and floor coverings and any areas where flies may hide. If left undisturbed, a deposit will continue to kill flies for several weeks. Repeat application when effectiveness diminishes.

TO CONTROL BED BUGS: Take bed apart and treat cracks, joints and interior of framework. Mattresses should be treated, especially holes, folds and edges. Do not use in hospital patient quarters.

TO CONTROL POWDER POST BEETLES: Treat infested wood using an injection or insertion tube. Apply small amounts directly into and around entrance holes.
