

**Cleaner, Clearer Swimming Pools**

Active Ingredient: Copper Sulfate (pentahydrate) ..... 22.2%  
(calculated as 5.65% elemental copper)  
Inert Ingredients ..... 77.8%

E P A Reg. No. 33230-1  
K C P , Inc.  
405 Gaines School Road  
Athens, Ga. 30601

Net Contents: 1 Qt. (U. S.) ● 32 fl. oz. ● 0.946 liter

**CAUTION:**  
Harmful if swallowed. Avoid contact with skin, eyes and clothing. If  
swallowed, call a physician.

**AMOUNT TO USE:** Add 1 fl. oz. of ALGAE-BAN for every 1,000 gallons of swimming pool water. Apply to a freshly filled pool or at first visible signs of algae growth. If pool has heavy algae growth already, superchlorinate first prior to using this product.

**METHOD OF APPLICATION:** Add ALGAE-BAN in the evening after swimmers leave the pool. First dilute the proper amount of ALGAE-BAN in a pail of water, then pour it into each corner and the center of the pool. A "pale blue cloud" will usually form and then disperse throughout the swimming pool.

**WHEN TO RE-APPLY:** ALGAE-BAN is generally effective for a month or more but effectiveness will vary depending on the pool conditions, daily chlorination and daily use. Re-apply ALGAE-BAN at the first indication of algae return or at monthly intervals using the dosage of 1 fl. oz. ALGAE-BAN per 1,000 gallons of swimming pool water.

**TO WINTERIZE SWIMMING POOL:** Add 2 fl. oz. of ALGAE BAN for every 1,000 gallons of pool water before covering the pool for winter. This application should be made to a clean pool free of visible algae.

**HOW TO ESTIMATE SWIMMING POOL VOLUME:** (all measurements in feet) Rectangular pools: length x width x average depth x 7.5 = total gallons. Round or oval pools: diameter x diameter x average depth x 5.9 = total gallons.

**ADVANTAGES OF ALGAE-BAN:**

- Long-lasting action saves money by reducing chemical costs.
- Copper Sulfate, the active ingredient, is one of the oldest algae-cides known.
- Will not cause any "soapy" feeling or foaming.
- Easy to use — Economical — Guaranteed to work.

**NOTICE:** Follow directions carefully. Method of application, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage, or handling of this material not in strict accordance with directions given. Rinse empty container thoroughly with water and discard it.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Apply this product only as specified on this label.
