# SPA-10

Active ingredients.....	
Poly[oxyethylene(dimethyliminio)ethylene-	
(dimethyliminio)ethylene dichloride].....	10.0 Percent
Inert Ingredients.....	90.0 Percent

Application: SPA-10 is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using SPA-10. For pools having just visible algae growth add an initial dose of 75 to 115 fluid ounces of SPA-10 per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 4 to 75 fluid ounces of SPA-10 per 10,000 gallons of water. To maintain pools free of visible algae growth, subsequent additions of 13.5 to 27 fluid ounces of SPA-10 per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment. Uniform distribution of SPA-10 throughout the water in the pool is necessary for maximum effectiveness. SPA-10 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. SPA-10 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix SPA-10 with concentrated dry or liquid chlorine products.

## CAUTION

**KEEP OUT OF REACH OF CHILDREN** Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Use only as directed on label. Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.
