WORK SAFETY RULES

POISON SIGNS Symptoms

Methyl Parathion is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this material must be removed immediately. Exposed persons must receive prompt medical treatment or they may die.

Some of the signs and symptoms of poisoning are: Headache, nausea, vomiting, cramps, weakness, blurred vision, pin point pupils, tightness in chest, difficult breathing, nervousness, sweating, watering of eyes, salivation or frothing of mouth and nose, muscle spasms and coma.

FIRST AID TREATMENT

Call a doctor, physician, clinic or hospital immediately. Explain that the victim has been exposed to methyl parathion and describe the accident.

If breathing has stopped, [illegible] respiration immediately and maintain until doctor says to stop.

If swallowed and victim is conscious, induce vomiting by [illegible]. Never induce vomiting or give anything by mouth to an unconscious person. Keep victim warm and quiet. Immediately

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Wash contaminated skin with soap and water. Remove contaminated clothing immediately.
