

### DANGER

Never mix Calcium Hypochlorite with any other substances. Add Calcium Hypochlorite to clean water in a clean plastic container.

**STRONG OXIDIZER. Contact With Other Material May Cause Fire.** Keep from contact with clothing and other combustible materials. Do not store near combustible materials. Store in tightly closed containers. Remove and wash contaminated clothing promptly. While Calcium Hypochlorite by itself is not a combustible material, it must not be mixed or contaminated with any foreign material such as, household products, soap products, paint products, solvents, acids, pool chemicals, vinegar, beverages, oils, pine oil, dirty rags, etc. Contamination or mixing with these types of chemicals and products may result in fire and the fire may be of great intensity. Prevent any burning material such as a lighted cigarette from falling into product. Drench fires with water. Dispose of spilled product by flushing with large amounts of water. Keep in cool, dry place in original container.

### DANGER

Harmful if swallowed. May produce severe chemical burns. Do not allow contact with eyes, skin, mucous membranes, or clothing. Do not use around the home or recreational areas, other than for swimming pool. Use scoop to measure Calcium Hypochlorite. Always replace cap. Do not reuse empty container. Rinse empty container thoroughly with water and discard.

### FIRST AID

First Aid: External - Flood skin and eyes with plenty of water for 15 minutes. If irritation persists, get medical attention. For eyes - Call physician immediately. INTERNAL - Drink large quantities of water or milk. Follow with milk or magnesium, vegetable oil, or beaten eggs. Call physician immediately.

## GRANULAR CHLORINE FOR SWIMMING POOLS

#### Active Ingredients:

Calcium Hypochlorite	70%
Inert Ingredients	30%
Available Chlorine	70%

**SEE FIRST AID STATEMENT AND ADDITIONAL PRECAUTIONARY STATEMENTS ON SIDE PANEL. MIX ONLY WITH WATER. MAY CAUSE FIRE IF CONTAMINATED.**

**DANGER ! STRONG OXIDIZER  
KEEP OUT OF REACH OF CHILDREN**

E.P.A. Reg No. 33458-2  
E.P.A. Est. No. 33458-FL-1

**CONTENTS: NET WEIGHT 10 LBS.**

Distributed By:

**ALLIED CHLORINE & CHEMICAL PRODUCTS, Inc.  
MIAMI, FLORIDA 33144**

### INSTRUCTIONS FOR USE

Proper dosages of Calcium Hypochlorite will control growth of algae and effectively kill many bacteria which may cause infection. For initial chlorination add 1 ounce of Calcium Hypochlorite for each 1000 gallons of water. The initial chlorination dose should be repeated until a chlorine residual of 0.6 to 1.0 p.p.m. is obtained.

Dosages after the initial dose should be one ounce per 5000 gallons added daily or as needed to maintain a residual of 0.6 p.p.m. to 1.0 p.p.m. of available chlorine as determined by the use of a chlorine test kit. Keep pH in range between 7.2-7.6. Add material by broadcasting over the pool surface, through skimmer, or dissolving in clean plastic pail and stirring and then pouring the clear liquid into pool. One ounce of Calcium Hypochlorite will add 1.0 p.p.m. available chlorine to 5000 gallons of water. Do not allow Calcium Hypochlorite to remain in contact with plastic or painted pool surfaces as bleaching of colors may occur. Use a brush to keep it moving till it dissolves. During hot sunlit days, or when bathing load is heavy, test water frequently as chlorine may dissipate rapidly. Maintain chlorine residual between 0.6 p.p.m. and 1.0 p.p.m. at all times.

### DANGER

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes.

### USE ONLY AS DIRECTED

Apply this product only as specified on this label.
