 Under the Federal Insecticide,
 Fungicide, and Rodenticide Act,
 as amended, for the pesticide
 registered under
 EPA Reg. No.

PRECAUTIONARY STATEMENTS
Hazards To Humans & Domestic Animals
DANGER - Irritant to eyes, nose, throat. May be fatal if inhaled. Do not get in eyes, on skin, or on clothing. Avoid breathing dust. May cause dizziness or headache. Wear goggles, face shield, and protective clothing when handling. Avoid contact with handling.

PRACTICAL TREATMENT - FIRST AID - If swallowed, feed patient cereal or bread to absorb. Do not induce vomiting. If inhaled, get person to fresh air. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. If on clothing, remove clothing as soon as possible. Refer to label for first aid instructions.

CHEMICAL HAZARDS - This product is a strong oxidizer. It may cause fire or explosion if mixed with combustible materials. It may cause corrosion of metal. It may cause irritation to the respiratory tract. It may cause irritation to the skin. It may cause irritation to the eyes.

ENVIRONMENTAL HAZARDS - This product is highly toxic to fish and other aquatic life. It is also toxic to birds and mammals. It may cause harm to the environment if it is not used properly. Do not discharge into water bodies. Do not discharge into the air. Do not discharge into the soil. Do not discharge into the ground. Do not discharge into the sewer system. Do not discharge into the storm drain. Do not discharge into the gutter. Do not discharge into the street. Do not discharge into the yard. Do not discharge into the driveway. Do not discharge into the parking lot. Do not discharge into the sidewalk. Do not discharge into the lawn. Do not discharge into the garden. Do not discharge into the flower bed. Do not discharge into the vegetable garden. Do not discharge into the fruit tree. Do not discharge into the shrub. Do not discharge into the bush. Do not discharge into the hedge. Do not discharge into the fence. Do not discharge into the wall. Do not discharge into the roof. Do not discharge into the gutter. Do not discharge into the downspout. Do not discharge into the basement. Do not discharge into the crawlspace. Do not discharge into the attic. Do not discharge into the chimney. Do not discharge into the vent. Do not discharge into the duct. Do not discharge into the pipe. Do not discharge into the drain. Do not discharge into the sewer. Do not discharge into the storm drain. Do not discharge into the gutter. Do not discharge into the sidewalk. Do not discharge into the lawn. Do not discharge into the garden. Do not discharge into the flower bed. Do not discharge into the vegetable garden. Do not discharge into the fruit tree. Do not discharge into the shrub. Do not discharge into the bush. Do not discharge into the hedge. Do not discharge into the fence. Do not discharge into the wall. Do not discharge into the roof. Do not discharge into the gutter. Do not discharge into the downspout. Do not discharge into the basement. Do not discharge into the crawlspace. Do not discharge into the attic. Do not discharge into the chimney. Do not discharge into the vent. Do not discharge into the duct. Do not discharge into the pipe. Do not discharge into the drain. Do not discharge into the sewer.

SPECIAL PRECAUTIONS

1. This product is a strong oxidizer. It may cause fire or explosion if mixed with combustible materials. It may cause corrosion of metal. It may cause irritation to the respiratory tract. It may cause irritation to the skin. It may cause irritation to the eyes.
2. This product is highly toxic to fish and other aquatic life. It is also toxic to birds and mammals. It may cause harm to the environment if it is not used properly. Do not discharge into water bodies. Do not discharge into the air. Do not discharge into the soil. Do not discharge into the ground. Do not discharge into the sewer system. Do not discharge into the storm drain. Do not discharge into the gutter. Do not discharge into the sidewalk. Do not discharge into the lawn. Do not discharge into the garden. Do not discharge into the flower bed. Do not discharge into the vegetable garden. Do not discharge into the fruit tree. Do not discharge into the shrub. Do not discharge into the bush. Do not discharge into the hedge. Do not discharge into the fence. Do not discharge into the wall. Do not discharge into the roof. Do not discharge into the gutter. Do not discharge into the downspout. Do not discharge into the basement. Do not discharge into the crawlspace. Do not discharge into the attic. Do not discharge into the chimney. Do not discharge into the vent. Do not discharge into the duct. Do not discharge into the pipe. Do not discharge into the drain. Do not discharge into the sewer.
3. This product is a strong oxidizer. It may cause fire or explosion if mixed with combustible materials. It may cause corrosion of metal. It may cause irritation to the respiratory tract. It may cause irritation to the skin. It may cause irritation to the eyes.
4. This product is highly toxic to fish and other aquatic life. It is also toxic to birds and mammals. It may cause harm to the environment if it is not used properly. Do not discharge into water bodies. Do not discharge into the air. Do not discharge into the soil. Do not discharge into the ground. Do not discharge into the sewer system. Do not discharge into the storm drain. Do not discharge into the gutter. Do not discharge into the sidewalk. Do not discharge into the lawn. Do not discharge into the garden. Do not discharge into the flower bed. Do not discharge into the vegetable garden. Do not discharge into the fruit tree. Do not discharge into the shrub. Do not discharge into the bush. Do not discharge into the hedge. Do not discharge into the fence. Do not discharge into the wall. Do not discharge into the roof. Do not discharge into the gutter. Do not discharge into the downspout. Do not discharge into the basement. Do not discharge into the crawlspace. Do not discharge into the attic. Do not discharge into the chimney. Do not discharge into the vent. Do not discharge into the duct. Do not discharge into the pipe. Do not discharge into the drain. Do not discharge into the sewer.

DIRECTIONS FOR USE

1. See all applicable Federal laws to use this product in a manner which is consistent with its labeling.
2. Adjust water pH to 7.2-7.6 as determined by a test kit. For pools with copper plumbing, test pH for 7.4-7.8.
3. If the pool has not been previously stabilized, add conditioner and stabilizer (cyanuric acid). Follow the directions for use in the label for that product.
4. Secure chlorinator in the area of pool that is agitated by return flow from filter. If residual remains too high, chlorinator should be moved further from the agitated area which will slow the dissolving action of the tablets.
5. In newly filled pools, follow steps 1 through 4, then add 2 tablets per 5,000 gallons of pool water to establish a chlorine residual of 1.0 to 1.5 p.p.m. as determined by a test kit. Repeat dosages as needed to maintain a residual of 1.0 to 1.5 p.p.m. at all times. Thereafter, add 1 tablet per 5,000 gallons per week, or as needed to maintain chlorine residual of 1.0 to 1.5 p.p.m. at all times as determined by a test kit. For pools with stabilizer, follow steps 1 and 3, then add 1 tablet per 5,000 gallons per week, or as needed to maintain a chlorine residual of 1.0 to 1.5 p.p.m. at all times as determined by a test kit. Please note: The pH of The Slow Dissolving Chlorinating Tablet is slightly acidic and will tend to reduce the pH and alkalinity of the pool water. Proper pH should be maintained at 7.2-7.6 as determined by a test kit. To periodically adjust pH, use sodium carbonate or sodium bicarbonate.

STORAGE & DISPOSAL

Store in original container in a cool, dry place. Do not store in areas where children can have access. Do not store near food, feed, or other products. Do not store in areas where children can have access. Do not store near food, feed, or other products. Do not store in areas where children can have access. Do not store near food, feed, or other products.
