

PRECAUTIONARY STATEMENTS

Hazards To Humans & Domestic Animals

DANGER Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear goggles or face shield and protective clothing when handling. Wash hands after handling.

PRACTICAL TREATMENT (FIRST AID) If swallowed, feed gruel, cooked cereal, or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention as soon as possible. Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, dirt, organic matter, or other chemicals, or any foreign matter, may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire.

ENVIRONMENTAL HAZARDS This pesticide is toxic to fish. Keep out of lakes, streams, ponds, or public waters. Permits may be required for discharges containing this pesticide into public waters. For guidance contact the regional office of the Environmental Protection Agency.

SPECIAL PRECAUTIONS

1. This product has a powerful chlorine odor. Hold away from face when opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint. Introduce this product through skimmer or in a prescribed feeder to avoid discoloration of liners or paint.
3. When adding this product to skimmer or feeder make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed per instructions on label. Do not take advice from others or experiment by yourself.
5. If this product is used to shock or scrub algae on a pool, after treatment it is important to brush the walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residual. Such protected algae will begin to reproduce again when high chlorine residual falls.
6. This product, because of its potent formulation can be dangerous if not used properly. Do not mix with any other chemicals. This could result in a violent chemical reaction. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a pool. When adding this product to skimmer make sure pump is on and water is circulating so that material is drawn into circulation system. Do not allow build-up of dry material in skimmer as gases generated may cause an explosion.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Adjust water pH to 7.2-7.6 as determined by a test kit. For pools with copper plumbing best pH factor is 7.6-7.8.
2. If the pool has not been previously stabilized, add conditioner and stabilizer (cyanuric acid). Follow the directions for use on the label for that product.
3. Secure chlorinator in the area of pool that is agitated by return flow from filter. If residual remains too high, chlorinator should be moved further from the agitated area which will slow the dissolving action of the tablets.
4. In newly filled pools, follow steps 1 through 3, then add 2 tablets per 5,000 gallons of pool water to establish a chlorine residual of 1.0 to 1.5 p.p.m. as determined by a test kit. Repeat dosages as needed to maintain a residual of 1.0 to 1.5 p.p.m. at all times. Thereafter, add 1 tablet per 5,000 gallons per week or as needed to maintain chlorine residual of 1.0 to 1.5 p.p.m. at all times as determined by a test kit. For pools with stabilizer, follow steps 1 and 3, then add 1 tablet per 5,000 gallons per week or as needed to maintain a chlorine residual of 1.0 to 1.5 p.p.m. at all times as determined by a test kit. Please note: The pH of The Slow Dissolving Chlorinating Tablet is on the acid side and will tend to reduce the pH and alkalinity of the pool water. Proper pH should be maintained at pH 7.2 to 7.6 as determined by a test kit, by periodic additions of sodium carbonate or sodium bicarbonate.

STORAGE & DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container in open area if possible, and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.

DIRECTIONS FOR USE

Fill tank with water before adding this product and allow to stand five minutes before using

DIRECTIONS LAST TANK ONLY

1. Scrape and prewash utensils and glasses whenever possible
2. Wash with TAC Heavy Duty Detergent
3. Rinse with clear water
4. Sanitize in a solution of 1 ounce TAC WASH AND SURFACE SANITIZER to 10 gallons water (provides 100 ppm available chlorine). Immerse all utensils for at least two minutes or for contact time specified by governing sanitary code
5. Place sanitized utensils on a rack or drainboard to air dry only (Do not towel)

WARNING

**KEEP OUT OF REACH
OF CHILDREN**

Harmful if swallowed. Do not get in eyes or on the skin. Do not breathe dust. If swallowed: feed gruel or cooked cereal followed by olive oil or cooking oil. Call physician.

In case of personal contact: remove excess material and flush skin or eyes with fresh water for at least 15 minutes. For eyes get medical attention.

Rinse empty container thoroughly with water and discard it.
