DIRECTIONS FOR USE

For use in swimming pools, hot tubs, spas, and other recreational water facilities. This product is a slow dissolving chlorinating tablet. It is used to maintain a constant level of free chlorine in the water. The active ingredient is trichloro-s-triazinetrine. The product is formulated to dissolve slowly, providing a continuous release of chlorine over a period of 90 days. The chlorine released acts as a disinfectant, killing bacteria and other microorganisms. It also helps to prevent algae growth and keeps the water clear. The product is safe for use in swimming pools and hot tubs. It is not recommended for use in drinking water. The product should be stored in a cool, dry place, away from children and pets. For more information, see the first aid statement and other precautions on the side panel.

STORAGE & DISPOSAL

Store in a cool, dry place, away from children and pets. Do not use if the container is damaged or the product is expired. Dispose of unused product in accordance with local regulations. Do not pour down the drain or into the water.
