PRONONE POWER PELLET
HERBICIDE

ACTIVE INGREDIENT:	Hexazinone	
	3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1H,3H)-dione	75%
INERT INGREDIENTS:		25%
TOTAL:		100%

EPA Est. No. 33560-TN-1

EPA Reg. No. 33560-41

(Container Size)

KEEP OUT OF REACH OF CHILDREN
WARNING
STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove victim to fresh air and apply respiration if indicated.

IF ON SKIN: Wash promptly with soap and water. Rinse thoroughly.

IF IN EYES: Rinse eyes with plenty of water. Call a physician.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed. Causes eye irritation. Do not get in eyes, on skin, or on clothing. May cause irritation of nose, throat or skin. Wash clothing and equipment after application. Do not store near food or feed products. Store out of the weather.

ENVIRONMENTAL HAZARDS

Do not apply directly to any body of water or wetlands. Do not contaminate water used by wildlife and aquatic life or for domestic and irrigation purposes. Do not contaminate water by cleaning of equipment or disposal of waste.

IMPORTANT

Injury to or loss of desirable trees or other plants may result from failure to observe the following: Do not apply, drain or flush equipment on or near desirable trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. DO NOT use on lawns, walks, driveways, tennis courts or similar areas. Prevent contact with desirable plants. Keep from contact with fertilizers, insecticides, fungicides and seeds.

GENERAL INFORMATION

Pro-Serve PRONONE POWER PELLETT HERBICIDE is a concentrated pellet of Hexazinone to be used for selective weed and brush control in reforestation areas, for non-selective weed and brush control on noncropland areas, and for individual stem control of woody plants in rangeland.

PRONONE POWER PELLETT is an effective general herbicide providing residual control of many annual and biennial weeds, woody plants and, except for Johnsongrass, is effective for control of most perennial weeds. It is absorbed through the roots.

Moisture is required to activate PRONONE POWER PELLETT in the soil. Best results are obtained when weeds are less than 2 inches in height or diameter, soil is moist at time of application and 1/4 to 1/2 inch of rainfall occurs within 2 weeks after application.

On herbaceous plants, symptoms usually appear within 2 weeks after application under warm, humid conditions, while 4 to 6 weeks may be required when weather is cool. If rainfall after application is inadequate to activate PRONONE POWER PELLETT in the soil, plants may recover and continue to grow.

On woody plants, symptoms usually appear within 3 to 6 weeks after sufficient rainfall has dissolved the pellet and carried the herbicide into the root zone where it is absorbed during periods of active plant growth. Defoliation and subsequent refoitation may occur, but susceptible plants are killed. The effect of treatment will vary with the amount applied, soil type, rainfall, timing and uniformity of application and other conditions.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Pro-Serve, Inc. will not be responsible for losses or damages resulting from the use of this product in any manner not specifically recommended by Pro-Serve, Inc. User assumes all risk associated with such non-recommended use.

Application: Apply PRONONE POWER PELLET HERBICIDE by hand to the ground around specific plants or in a grid pattern for area control. Wear chemically resistant gloves when handling pellets to prevent skin contact.

Make application just before or during the period of active growth of brush species to be controlled. For effective brush control and prevention of damage to desirable vegetation do not apply to brush standing in water; do not use where desirable trees or shrubs are immediately adjacent to treated area.

FORESTRY:

PRONONE POWER PELLET HERBICIDE is recommended for use in forestry site preparation, preharvest control of hardwoods and pine release in pine-hardwood stands for growth enhancement of loblolly, slash, shortleaf and longleaf pine. The treatment provides control of many woody plants such as black cherry, blackgum*, dogwood*, elm, hawthorn, hickory*, oaks, red maple*, sweetgum and sumac*.

*Considered hard to kill

Apply at a rate of 1,700 to 5,800 pellets per acre for preharvest, site preparation, and wildlife openings, and 900 to 3,800 pellets per acre for pine release. Make the application using a grid pattern as suggested in the table below. Do not apply Power Pellets closer than 36" to seedlings or directly upslope from seedlings. When treating large stems and where more than one pellet is needed per stem, make application on opposite sides of the stem.

Selection of the rate per acre and grid pattern will depend on soil texture and woody plant species composition. Use the higher rates on fine-textured soils and when the major component of the hardwoods is a difficult-to-control species such as blackgum, dogwood, hickory and red maple. Use the lower rates on medium to coarse texture soils where elm, cherry, oak and sweetgum are dominant. For individual stem treatment apply the pellet to the soil within 3' of the root collar at the rate of 1 or 2 pellets for each 1" diameter of brush to be controlled. When treating large stems and when more than one pellet is needed per stem, make application on opposite sides of the stem.

DRAFT LABEL

TABLE OF SUGGESTED APPLICATION PATTERNS
FOR PRONONE POWER PELLETS

For Site Preparation and Preharvest Control for Hardwoods

<u>Soil</u>		<u>Grid Spacing (ft)</u>
Coarse	1 Pellet	5'x5' or 4'x5' or 4'x4'
Medium/Fine	1 Pellet	3'x4' or 3'x3' or 2 1/2'x3'

For Pine Release

<u>Soil</u>		<u>Grid Spacing (ft)</u>
Coarse	1 Pellet	6'x8'* or 5'x6'
Medium/Fine	1 Pellet	4'x6'

*Use on deep sands with pines four years of age or older.

As spacing decreases, rate increases.

PRONONE POWER PELLET should be applied during the period from late winter (bud-break) to early summer. DO NOT BURN treated sites after initial foliage browning is evident. Burn only after brush has completely defoliated, at least once, from sufficient root uptake of the herbicide. Inconsistent results may occur if the site is burned up to 3 to 6 months prior to treatment.

Results may be unsatisfactory where stump sprouts of less than one year's growth predominate.

NOTE: Use on 1-year old or 4-year old or older seedlings is acceptable; however, injury may result from use on 2- and 3-year seedlings where root growth is extensive but hardiness is lacking.

RANGELAND:

PRONONE POWER PELLET can be applied as an individual stem treatment for control of undesirable woody plants on rangeland.

PRONONE POWER PELLET HERBICIDE is recommended for the control of undesirable woody plants such as elm, huisache, mesquite, myrtle, oaks, osageorange, eastern red cedar, tallow, whitebrush and willow.

Apply the pellet to the soil within 3' of the root collar at the rate of 1 or 2 pellets for each 1" diameter of brush to be controlled. When treating large

BEST AVAILABLE COPY

stems and when more than one pellet is needed per stem, make application on opposite sides of the stem. Do not treat more than 300 one-inch stem equivalents (approximately 70 brush plants) per acre per season. Late winter to mid-spring application is suggested. Do not use on marshy or poorly drained sites or on soils classified as clays. Do not cut hay from treated grasses. Do not use on pastures.

GENERAL WEED AND BRUSH CONTROL - NONCROPLAND:

PRONONE POWER PELLET HERBICIDE is recommended for general weed and brush control in noncropland areas such as utility, highway, pipeline and railroad rights-of-way, petroleum tank farms, lumberyards, storage areas, industrial-plant sites, and other similar areas. Apply at 1-2 pellets per inch of stem diameter or as broadcast or grid pattern with rates up to 7,000 pellets per acre.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store product in original container only, away from other pesticides, fertilizer, food or feed.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
