IMPORTANT

Do not apply on or near valuable woody or herbaceous plants or on areas where their roots may extend, because of possible injury to plants. Thoroughly clean spreading equipment with a suitable chemical cleaner before using for other purposes (or do not use same spreading equipment for other purposes). Do not use on croplands or any land to be used for subsequent cropping. Keep animals off treated areas.

GENERAL INFORMATION

BAREGROUND BD is a non-selective herbicide that can be applied before or after plant growth begins. Since BAREGROUND BD enters plants through their roots, its effectiveness is dependent on rainfall to move the chemical into the root zone. Very dry soil conditions and lack of rainfall may result in poor weed control.
