

To be used only for inhibition and prevention of Algae in Evaporative Condensers and Recirculating Water Cooling Towers as recommended by OLIN SERVICE ENGINEER.

# COMPLETE WATER TREATING CHEMICALS

# MEMPO® ALGICIDE # 1

FOR PROPER TREATMENT OF COOLING WATER to prevent & control ALGAE

MEMPO ALGICIDE No. 1 is recommended for evaporative condensers and open recirculating water cooling towers.

MEMPO ALGICIDE No. 1 can be prescribed to meet virtually any cooling system problem that involves algae odors.

Each formulation of MEMPO ALGICIDES contains different ingredients toxic to the Algae growth. Thus two different formulations should be kept on hand to be alternated at regular intervals.

**DIRECTIONS FOR USE**

For best results slug feed, beginning treatment before system has become fouled with algae, or after cleaning system whose efficiency has been reduced by such fouling. Badly fouled systems must be cleaned before treatment is begun.

**INITIAL DOSAGE:** When system is noticeably fouled, add 0.8 pounds Mempo Algicide No. 1 for each 1,000 gallons of water in the system. Apply at a point where the product will be uniformly mixed with water. Repeat until control is achieved.

**SUBSEQUENT DOSAGE:** When algae control is evident, add 0.4 - 0.8 lbs. of Mempo Algicide No. 1 for each 1,000 gallons of water in the system every week or as needed to maintain control.
