4. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

151

Dennis H. Edwards, Jr. Product Manager (19) Insecticide-Rodenticide Branch Registration Division (7505C)

ACCEPTED with COMMENTS in EPA Letter Dated

FEB 27 1997

Under the Federal Insecticide, Fungicide, and Hodemicide Act us amended, for the posticide registered under EPA Reg. No. 33658-

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

AVISO

May Be Fatal If Swallowed • Harmful if Absorbed Through The Skin• • Causes Moderate Eye and Skin Irritation • Prolonged Or Frequently Repeated Skin Contact May Cause Allergic Reactions In Some Individuals•

Do not get in eyes, on skin or clothing. Avoid breathing vapors and spray mist. Handle concentrate in a ventilated area. When handling concentrate wear eye protection and protective clothing such as long-sleeved shirt, long-legged pants, rubber gloves and footwear, i.e. neoprene or nitrile butadiene rubber, resistant to aromatic solvents. Wash thoroughly with soap and water after handling and before eating or smoking. Remove contaminated clothing and wash before reuse. Keep away from food, feedstuffs and water supplies.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds and wildlife, and extremely toxic to fish and equatic organisms. Do not apply directly to water. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. Cover or incorporate spills. Do not contaminate water when disposing of equipment washwaters. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read all Directions for Use carefully before applying.

Chemigation: Do not apply this product through any type of irrigation system.

Do not formulate this product into any other end-use products.

Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in interior plantscapes, ornamental gardens or parks, or on golf courses or lawns and grounds.

GHARDA CHLORPYRIFOS 4E-NA

Specialty Insecticide

To be applied only by or under the direct supervision of commercial applicators responsible for insect control programs. Sale to or use by persons owning or occupying a dwelling is strictly prohibited.

Active Ingredient:

	chlorpyrifos: 0,0-diethyl 0-{3,5,6-trichloro-2-
	pyridinyl)phosphorothioate
)	Inert Ingredients:
1	Openation & nounds of objects without online

Contains 4 pounds of chlorpyrifos per gallon.

KEEP OUT OF REACH OF CHILDREN

WARNING

Si usted no entiende la etiqueta, busque a alquien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

STATEMENT OF PRACTICAL TREATMENT

Organophosphata

Y swallowed: Call a physician or Poison Control Center immediately. Do not induce vomiting. Contains an aromatic petroleum solvent. Do not give anything by mouth to an unconscious person.

If on skin: Immediately wash with plenty of soap and water. Get medical attention.

If in eyes: Flush with plenty of water for 15 minutes. Get medical attention.

If inhaled: Remove to fresh air if symptoms of cholinesterase inhibition appear and get medical attention immediately.

Note to physician: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. If exposed, plasma and red blood cell cholinesterase tests may indicate significance of exposure (baseline data are useful). Atropine, only by injection, is the preferable antidote. Oximes, such as 2-PAM/protopam, may be therapeutic if used early; however, use only in conjunction with atropine. In case of severe acute poisoning, use antidote immediately after establishing an open eirway and respiration.

AVISO

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Storage: Store in original container in secured dry storage area. Prevent cross-contamination with other pesticides and fertilizers. Do not store above 100°F for extended periods of time. Storage below 20°F may result in formation of crystals. If product crystallizes, store at 50 to 70°F and agitate to redissolve crystals. If container is damaged or spill occurs, use product immediately or dispose of product and damaged container as indicated below.

Pesticide Disposal: Pesticide wastes are toxic. Improper disposal of excess pesticida, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your state pesticide or environmental control agency, or the hazardous waste representative at the nearest EPA regional office for guidance.

Plastic Container Disposal: Triple rinse (or equivalent). Then puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

General Information

Gharda 4E-NA insecticide is an emulsifiable concentrate designed for use as a spray to control various pests injurious to trees, turf and ornamental plants. The pests controllad are listed in the accompanying tables. Gharda 4E-NA is compatible with insecticides, miticides and fungicides commonly recommended except for alkaline materials such as Bordeaux mixture and lime. A small amount of spray mixture should be prepared to check for compatibility before a large volume of spray is mixed.

Attention: Do not allow adults, children or pets on treated areas until spray has dried. Keep out of fishpools and other bodies of water. Do not treat vegetable gardens. Do not allow livestock to graze in treated areas. Do not feed treated grass cuttings (hay) or seed screenings to livestock nor use hay for livestock bedding. Do not use in poultry houses.

Turf and Other Outdoor Uses

Use Gharda 4E-NA to control the pests listed in the following table by applying at the recommended dosages and in accordance with the directions given below. Dilute Gharda 4E-NA in water and apply as a coarse, low pressure spray using suitable application equipment. Thoroughly water immediately after treatment to wash the insecticide into the turf, except as noted. For best results, the lawn should be moist at the time of treatment. Spray when pests first appear; retreat when needed.

Pest*	Amount of Gharda 4E-NA In Water to Make		Specific Directions		
Ticks ¹ (American dog) (Cattle fever) (Gulf coast) (Lone ster)	1/4 fl oz	1 1/2 pt	1. For control of ticks infesting corrals, stockyards, holding pens and other outdoor livestock areas. Treat soil in corrals and pens, especially in corners, under and around fences, grassy areas, protected areas under feeders and shelters and other areas likely to serve as harborage sites for ticks that have removed themselves from their host. Spray surfaces to be treated until wet, but do not create excessive runoff. Note: This application is intended as a premise spray only. Do not use as a direct spray on livestock. Take care to avoid creating mist or drift which may come into contact with feed, water or livestock. Livestock must not be allowed in treated areas until spray deposits have dried.		
Pest*	Amount of Gharda 4E-NA per		Specific Directions		
	1000 Sq Ft	Acre			
Ants (including foraging fire ants) Armyworms (Beet) (Fall) (Yellowstriped) Centipedes Chiggers ¹ Chinch Bugs Clover mites Cutworms Crickets Earwigs Fiery Skipper Fire ants (mounds) ²	3/4 fl oz	1 qt	 Use Gharda 4E-NA for area control of ticks and chiggers infesting non-cropland areas such as roadsides, footpaths and trails, picnic and camping sites, parks and other recreational areas where these pests are present and create a nuisance or a possible public health problem. Do not allow public use of treated areas during application or until spray has dried. Apply Gharda 4E-NA in water at the rate of 1/2 pint/acre (equivalent to 1/2 fl oz/2,700 sq ft) using a hydraulic sprayer, mist applicator, knapsack sprayer, or other suitable hand- or power-operated spray equipment. Treat low underbush, grassy areas, weeds, and ground surface and debris using enough spray volume to obtain thorough coverage, usually 40 - 100 gal/acre. For individual fire ant mounds, apply Gharda 4E-NA as a drench, diluted at the rate of 1 fl oz (30 ml) per 4 gal of water. Gently sprinkle a total of 1 gal of the diluted emulsion over the surface of each 		
Fleas Gnats Grasshoppers Greenbugs June beetles		- -	mound using a gentle spray (such as a sprinkler can). Thoroughly wet mound and surrounding areas to a 4 ft diameter (12 sq ft). For best results, apply in cool weather, 65-80°F, or in early morning or late evening hours. Treat new mounds as they appear. Pressurized sprays may disturb the ants and cause migration, reducing product effectiveness.		

Superscripts refer to Specific Directions

Pest*	Amount of Gharda 4E-NA per		Specific Directions
	1000 Sq Ft	Acre	
Leafhoppers Lucerne moths Millipedes Mites (Clover) (Formula grass) (Winter grain) Mosquitos ³ Sod webworms ⁴ (Lawn moths) Sowbugs Springtails Ticks ¹	3/4 fl oz	1 qt	 Mosquitos coming to rest on areas treated for control of turf pests will be killed for varying periods of time after treatment, depending on exposure of treated areas to weathering conditions. For sod webworm, delay watering and mowing the treated area for 12-24 hours after treatment.
European crane fly	1 fl oz	1 1/2 gt	
Turfgrass weevil (Hyperodes) ¹	1 1/2 fl oz	2 qt	1. Spray suspected problem areas in mid-April and again in mid-May or as recommended by your local agricultural extension service specialist.
White grubs ¹ (Black turfgrass ataenius) (European chafer) (Japanese baetle larvae) (Southern masked chafer)	1 1/2-3 fl oz	2 qt-1 gal	1. For white grubs, spray when grubs are young and actively feeding near the soil surface, usually during late July and August or as recommended by your local agricultural extension service specialist. Immediately after spraying irrigate the treated area with 1/2 to 1 inch of water to wash the insecticide into the underlying soil.
Bluegrass billbugs'	3/4-3 fl oz	1 qt-1 gal	1. For bluegrass billbugs, spray early in the season when adults first appear. Re treat as needed.

*Superscripts refer to Specific Directions

Residential Citrus

Use Gharda 4E-NA to treat grapefruit, lemon, orange and other citrus trees or tree fruit in residential areas. Use lower rates for light infestations, higher rates for heavy infestations. Treat when insects become a problem or in accordance with the local spray schedule recommended by your state extension service specialist. Do not apply to citrus if temperature exceeds 95°F. Gharda 4E-NA is highly toxic to bees exposed to direct treatment. Do not apply to drought, heat stressed, or flowering trees. Restrictions: Do not make more than two applications per year. Do not make a second application within 30 days of the first application. Do not pick fruit for consumption until 21 days after application.

Pest	Amount of Gh	arda 4E-NA in Wa	ter to Make	Specific Directions
	1 gallon	3 gallons	100 gallons	
Aphids Katydids Lepidopterous larvae	1/10-1/5 ∯ oz	1/4-1/2 fl oz	1/2-1 pt	Use directions apply in all states.
Citrus thrips Mealybugs Scale insects (Black) (Brown soft) (California red) (Chaff) (Snow)	1/10-1/5 fl oz	1/4-1/2 fl oz	1/2-1 pt	Use directions apply in Florida only. California, apply as outside foliar coverage for citrus thrips and mealybugs through coverage of entire tree for scale insects.
Citrus rust mite	1/10-1/5 fl oz	1/4-1/2 fl oz	1/2-1 pt	Use directions apply in Florida only.

Pest Control on Outside Surface and Around Buildings

Apply Gharda 4E-NA as a residual spray to outside surfaces of buildings including porches, window frames, eaves, patios, garages, refuse dumps and other areas where pasts congregate or have been seen. Repeat treatment as needed to maintain effectiveness.

Pest	Amount of Gh	arda 4E-NA in V	Vater to Make	Specific Directions
	1 gallon	10 gallons	50 gallons	and a second
Ants	· Fo	r Band Treatmer	nt ^s	1. To help prevent infestation of buildings, treat a band of soil 6-10
Bees Carpenter ants Clover mites Cockroaches** Crickets Earwigs Fleas	1/12 fl oz	3/4 fl oz	4 fi oz	ft wide around and adjacent to buildings, also the building foundation to a height of 2-3 ft where pests are active and may find entrance. Use 4 fl oz of Gharda 4E-NA per 50 gal of water and apply as a coarse spray at the rate of about 10 gal spray mixture per 1,000 sq ft to thoroughly and uniformly wet the band area. 2. For scorpions, treat or remove accumulations of lumber, firewood, and other materials which serve as insect harborage sites.
Flies Hornets Millipedes	Fo	or Outside Surfa		
Mosquitos Scorpions ² Silverfish Sowbugs Spiders	1 1/3 fl oz	13 1/3 fl oz	2 qt	
Ticks Wasps Yellowjackets				

*Superscripts refer to Specific Directions.

**Controls American and smokey brown cockroaches.

Ornamentals

Use Gharda 4E-NA to treat flowers, shrubs, evergreens, vines, shade and flowering trees found to be infested with pests listed in the following table. Dilute Gharda 4E-NA with water according to directions given in the table and apply using suitable hand- or poweroperated spray equipment in a manner to provide complete and uniform coverage. For best results, apply a coarse spray to thoroughly wet both upper and lower leaf surfaces and infested limb and trunk areas. Attempt to penetrate dense foliage, but avoid overspraying to the point of excessive runoff. Treat when pests appear and repeat at 7 to 10 day intervals, if needed. Consult your state agricultural experiment station or extension service specialist for application timing and other specific use information.

Note: Environmental factors have significant effects on phytotoxic expression. Gharda 4E-NA has been tested on numerous ornamental plants without causing serious phytotoxicity. However, do not use on azaleas, camellias, poinsettias, rose bushes, or variegated ivy because of possible injury to these plants.

Pest*	Amount of Gharda 4E-NA in Water to Make			Specific Directions
	1 gallon	3 gallone	100 gallons	
Borers ¹ Clearwig moths (Ash) (Dogwood) (Lesser peachtree) (Lilac) (Oak) (Rhododendron)	1/3 fl oz	1 fl oz	1 qt	1. For borers, spply Gharda 4E-NA to the trunks and lower limbs of trees and shrubs when the adults begin to emerge. Consult your state agricultural experiment station or extension service specialist for proper time to treat. Apply uniformly as a coarse low-pressure spray.
Metallic wood (Bronze birch) (Flatheaded appletree) (Twolined chestnut) Longhorned beetles				
(Locust) (Red oak) Leafminers Needleminers (Jeffrey pine) (Lodgepole pine) (Spruce) Scale crawlers				
(Cottonycushion) (Cottony maple) (Euonymus) (Fietcher) (Florida wax) (Golden oak) (Hemispherical)				
(Lecanium) (Magnolia) (Oak kermes) (Oystersheil) (Pine needle) (San Jose) (Tea) (White birch)				
Borers (Cottonwood) (Peachtree) ¹	1 fl oz	3 fl oz	3 qt	1. For peachtree borers, apply Gharda 4E-NA in water to flowering trees and shrubs of the genus <i>Prunus</i> as a trunk spray before newly-hatched larvae enter the trees. Apply as a coarse, low-pressure spray. Thoroughly wet all bark erees from ground level to scaffold limbs.
Beetles [†] (Ambrosia) (Anobiidae) (Black turpentine) (Cottonwood leaf)	2 2/3 fl oz	8 fioz	2 gat	 For preventative treatment, apply the spray to the main trunk of trees in the early spring or when threat of attack exists from nearby infested trees.
(Ein Leaf) (European eim bark) (Flea) (Fuller rose) (Japanese) (June)				For remedial treatment, apply the spray to the main trunk of infested trees when damage occurs but before adult beetles begin to emerge.
(Native elm bark) (Southern pine) (Willow leaf) *Superscripts refer to Sp

Tree Pests

۰.

Use Gharda 4E-NA to treat shade and flowering trees, and evergreens found to be infested with pests listed in the following table. Dilute Gharda 4E-NA with water according to directions given in the table and apply using suitable hand- or power-operated spray equipment in a manner to provide complete and uniform coverage. For best results, apply a coarse spray to thoroughly wet both upper and lower leaf surfaces and to infested limb and trunk areas. Attempt to penetrate dense foliage, but avoid overspraying to the point of excessive runoff. Do not treat bearing fruit and nut trees with Gharda 4E-NA except as indicated in the Dormant Spray section. Treat when pests appear and repeat at 7 to 10 day intervals, if needed.

10F13

Consult your state agricultural experiment station or extension service specialist for application timing and other specific use information.

For effective control of leafrollers, spray should be applied before leaves are tightly rolled. For maple leafcutters on maple trees, apply spray to larvae as cases are being formed. Do not treat sugar maple trees intended for maple syrup production. For effective control of spider mites, when large numbers of eggs are present, apply a second spray after 3-5 days in the south or 7-10 days in the north after initial treatment to control newly- hatched nymphs.

Post*	Amount of Gh	arda 4E-NA in V	Vater to Make	Specific Directions
· · · · · · · · · · · · · · · · · · ·	1 gallon	3 gallons	100 gallons	
Beatles (Fuller rose) (Native elm bark) ¹ Leafhoppers Mahogany webworms Mealybugs Mimosa webworms	1/6 fl oz	1/2 fl oz	1 pt	1. To reduce twig and branch feeding by bark beetles, applications should be made in the spring or early summer.
Moths (Brownteil) (Cypress tip) (Douglas fir tussock) (Europeen pine shoot) (Gypsy) ² (Holly bud) (Nantucket pine tip) (Pendore) (Pitch pine tip) (Subtropical pine tip) (Tussock) Oakworms (Celifornia) (Orangestriped) (Redhumped) Redhumped caterpillars Thrips (exposed) Weevils (Blackvine) ³ (Pine reproduction) (Yellow poplar)				 To kill migrating and invading gypsy moth larvae, treat trunk and foliage. Blackvine weevils ere night feeders. Late afternoon spraying will give control in some areas.
Baatles (Cottonwood leaf) ¹ (Elm leaf) (Flea) (Willow leaf)	1/6-1/3 fl oz	1/2-1 fl oz	1 pt-1 qt	1. For cottonwood leaf beetles, use Gharda 4E-NA in water to control larvae and adults infesting cottonwoods. Make the treatment when field counts indicate damaging beetle populations are developing or present. For seedlings, use 8-20 gal of spray volume per acre.
Borers' Clearwing moths (Ash) (Dogwood) (Lesser peachtree) (Lilac) (Oak) (Rhododendron) Metallic wood (Bronze birch) (Flatheaded eppletree) (Twolined chestnut)	1/3 fl oz	1 fl oz	1 qt	 For borers, apply Gharda 4E-NA to the trunks and lower limbs of trees and shrubs when the adults begin to emerge. Consult your local state agricultural experiment station or extension service specialist for proper time to treat. Apply uniformily as a coarse law-pressure spray. For cranberry girdler larvae infesting Douglas fir seedlings, apply 1 quart of Gharda 4E-NA per acre. Direct spray at the lower crown and stems using 50 gal of water per acre. Irrigate immediately after application for soil penetration of 1-2 inches. Treat after egg laying during the summer.

	Pest*	Amount of Gh	arda 4E-NA in V	Water to Make	Specific Directions
		1 gallon	3 gallons	100 gallons	
والمستركمة فالمترافع والمرور بالمراكب المراغل ومرورون الماط المراجع والمراجع والمراجع والمراجع والمراجع	Longhorned baetles (Locust) (Red oak) Cranberry girdler larvae ² Leafminers Needleminers (Jeffrey pine) (Lodgepole pine) (Spruce)	1/3 fl oz	1 fl oz	1 qt	
	Scale crawlers (Cottonycushion) (Cottony maple) (Euonymous) (Fletcher) (Florida wax) (Golden oak) (Hemispherical) (Lecanium) (Magnolia) (Oak kermes) (Oystershell) (Pine needle) (San Jose) (Tea) (White birch)				
	Borers (Cottonwood) (Peachtree) ¹	1 fl oz	3 fi oz	3 qt	1. For peachtree borers, apply Gharda 4E-NA in water to flowering trees and shrubs of the genus <i>Prunus</i> as a trunk spray before newly-hatched larvae enter the trees. Apply as a coarse low-pressure spray. Thoroughly wet all bark areas from ground level to scaffold limbs.
	Beetles ¹ (Cottonwood leaf) (Eim leaf) (Flea) (Fuller rose) (Native elm bark) ² (Willow leaf)	1 1/3 fl oz	4 fi oz	1 gal	 For preventative treatment, apply the spray to the main trunk of trees in the early spring or when the threat of attack exists from nearby infested trees. For remedial treatment, apply the spray to the main trunk of infested trees or logs when damage occurs but before adult beetles begin to emerge. To prevent native elm bark beetles from overwintering in infested trees, apply Gharda 4E-NA in water to the bottom 9 feet of the trunk. Wet the trunk thoroughly but do not spray to runoff. Care should be taken to apply the spray right to the base of the root flare. Application can be made with either a backpack mistblower or a hydraulic pressure sprayer from spring through to early fall. To reduce the twig and branch feeding on uninfested trees deemed to be of high value, apply a water spray to the tree crown. Application should be made in the spring or early summer using a sprayer that will give thorough coverage to the tree crown.
	Beetles' (Ambrosia) (Anobiidae) (Black turpentine) (Blister) (European elm bark) (Japanese) (June) (Southern pine) (Spruce) Carpenter ants Termites	2 2/3 fl oz	8 fl oz	2 gai	1. For preventative treatment, apply the spray to the main trunk of trees in the early spring or when the threat of attack exists from nearby infested trees. For remedial treatment, apply the spray to the main trunk of infested trees or logs when damage occurs or before adult beetles begin to emerge.

Dormant, Spray

Use Gharda 4E-NA as a dormant or delayed dormant spray at the rates indicated to control the listed insects. Spray the entire tree to runoff using suitable ground spray equipment. Use the higher dosage of Gharda 4E-NA for severe infestations. Use oil as racommended by your state agricultural experiment station or extension service specialist.

Restrictions: Make only one application during the dormant season.
