**DANGER**

Keep Out of Reach of Children

Do not use, pour, spill or store near heat or open flame.

**NOT FOR HOME USE**

Read Instruction Label for additional use precautions, directions for use, recommendations and container disposal.

See side panels for poison precautions, symptoms, first aid treatment, information for physician and posting treated areas.

**WORK SAFETY RULES**

Use only when wearing the following protective clothing and equipment:
- Wear waterproof overalls, hat, rubber boots, rubber gloves.
- Wear safety goggles.
- Wear a pesticide respirator when approved by the Mine, Environment and Safety Administration (formerly the U.S. Bureau of Mines) and the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11.
- Wear heavy duty natural rubber gloves.

Keep unprotected persons and children away from treated areas or where there is danger of drift.

Do not rub eyes or mouth with hands. Do not smoke or eat.

Wash with soap and water. If you feel sick in any way STOP work and get help right away. Tell foreman or have someone call him. Call a physician, clinic or hospital immediately.

Always wash hands, face and arms with soap and water before smoking, eating or drinking.

After work, take off all work clothes and shoes. Shower, using soap and water. Wear only clean clothes when leaving job. Do not wear contaminated work clothes.

All protective clothing and equipment should be washed with soap and water after each use. Respirators should be cleaned and filter replaced according to instructions included with respirator.

**POISON SIGNS (Symptoms)**

Parathion is a very dangerous poison. If rapidly enters the body on contact with all skin surfaces, eyes and the contact with skin through wet clothes. Worker who shows any of the following poisoning signs must receive immediate medical treatment or he may die.

Symptoms of Poisoning Are:
- Immediate nausea, vomiting, cramps, blurred vision, nose-bleed, pupils, twitching of mouth and nose, muscle spasms and coma.

**POSTING TREATED AREAS**: Consult state regulatory agencies for posting regulations and requirements.

**FIRST AID TREATMENT**

In case of suspected poisoning:
- Give physician exposed to parathion: describe his condition. Medical help is available take following steps.

IF BREATHING HAS STOPPED, start artificial respiration immediately and continue until physician sees victim.

IF SWALLOWED and victim is awake (conscious) make him vomit quickly. First, give 100 ml water or strong salty water to work out heart attack of stomach. Then give 20 to 30 ml water to make victim vomit. Repeat by giving more water and make vomit again until vomit fluid is clear. Never give anything by mouth to an unconscious person. Have victim lie down and keep quiet.

IN CASE OF SKIN CONTACT, immediately wash any treated skin or clothing.

EYE CONTACT: If splashed in eyes, immediately flush with water for at least 15 minutes. If after first aid is given and physician can not come take victim to clinic or hospital.

Bring "Label Folder" Give to physician.

**NOTE TO PHYSICIAN**

**ANTIDOTE**: Administer atropine sulfate in large doses, 2.0 to 4.0 mg intravenously or intraperitoneal as soon as symptoms is overcome. Repeat at 5 to 10 minute intervals until signs of atropinization appear. 2-PAM chloride is also antidotal and may be administered in conjunction with atropin. Do not give morphine or tranquilizers.

Parathion is a strong cholinesterase inhibitor affecting the central and peripheral nervous system, producing cardiac and respiratory depression.

At first signs of pulmonary edema, the patient should be given supplemental oxygen and treated appropriately. Continued absorption of the poison may occur and fatal relapses have been reported after initial improvement. Very close supervision is indicated for at least 48 to 72 hours.

USE PRECAUTIONS
READ ALL PRECAUTIONS AND DIRECTIONS BEFORE USING. Use only for crops and claims recommended. This product is toxic to fish and wildlife. Keep out of lakes, streams, and ponds. Birds and other wildlife in treated areas may be killed. Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment, or disposal of wastes. This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service. In order that pesticidal residues on food and water for thorough coverage at first use. Do not apply within 15 days of harvest. The grower is responsible for residues on his crops as well as for damages caused by drift from his property to that of others. Consult state agricultural extension service or state agricultural experiment stations for additional information as the timing and number of applications needed will vary with local conditions.

CONTAINER DISPOSAL
1. Empty container into spray tank. Then drain in vertical position for 30 seconds
2. Add a measured amount of rinse water so container is 1/4 to 1/5 full
3. Rinse container thoroughly, pour into tank. and drain for 30 seconds. Add enough fluid (water) to bring tank up to level
4. Crush pesticide container and burn. Do not reuse.

DIRECTIONS FOR USE
Application can be made by aircraft or ground power equipment by trained personnel only using approved protective equipment. Do not apply with hand equipment. Pour specified amount of this product into nearly filled spray tank. Add balance of water to fill tank. Keep agitator running during filling and spraying operations. If mixture does not mix readily, but tends to separate as an oily layer, do not use as injury to plants may result. Do not combine with wettable powders unless previous use of the mixture has proven physically compatible and safe to plants. Always thoroughly emulsify this product with at least half of total water before adding wettable powders.
