3. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Martón Johnson Product Manager 31 Antimicrobial Programs Branch Registration Division (7505C)

MYACIDE 30

MYACIDE BT30 is a liquid microbiocide for use as a preservative to inhibit bacterial spoilage during manufacture, storage and use of industrial and household products.

ACTIVE INGREDIENT:

X

2-bromo-2-nitropropane-1,3-di	ol 30.0%
INERT INGREDIENTS:	70.0%
TOTAL	100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER

ſ	STAT	EMEN	T OF PRACTICAL TREATMENT				
	If swallowed		Drink egg whites, gelatin solution or, if these are not available drink large quantities of water. Do not administer liquids to an unconscious person. Call a physician.				
	If inhaled	-	Remove person to fresh air.				
	lf on skin	-	Immediately flush skin with plenty of water for 15 minutes.				
	lf in eyes		Immediately flush eyes with plenty of water for 15 minutes. Call a physician.				
		N	IOTE TO PHYSICIAN				
	Probable mucosal damage may contraindicate the use of gastric lavage.						
	SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

EPA REG.-NUMBER RO

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or clothing. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before re-use.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit, and the permitting authority having been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Keep away from heat.

PESTICIDE DISPOSAL

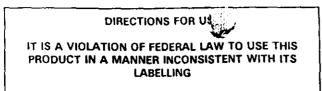

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL

Empty residue into application equipment. Triple rinse (or equivalent), then offer container for recycling or reconditioning, or puncture. Dispose of container in a sanitary landfill, or by incineration, if allowed by State and local authorities. If burned, stay out of smoke. ACCEPTED with COMMENTS in EPA Letter Dated:

FEB **7** 1997

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the particide registered under EPA Reg. No. 33753-19

GENERAL USE DIRECTIONS

MYACIDE BT30 inhibits the growth of spoilage bacteria during manufacture, storage, distribution and use of industrial and household products. It may be added at any convenient point during the manufacture process. Ideally it should be added as a final step just prior to packing of the product into bulk or sales packs. If a heating stage is involved in the manufacture add MYACIDE BT30 after this stage when the product has cooled to below 40°C.

ADHESIVES

Add 0.3 to 1.5 pints of MYACIDE BT30 per 100 lb total formulation weight. The addition is best accomplished by adding the MYACIDE BT30 in any water to be incorporated into the formulation.

WATER BASED PRINTING INKS AND FOUNT SOLUTIONS

In-can preservation - MYACIDE BT30 should be dosed at 280 to 1400 ml/cubic meter or 2.2 to 11.2 pints/1000 gallons based on the final formulation volume (100 to 500 ppm active ingredient).

In use fount solution - MYACIDE BT30 should be shock dosed at between 70 and 280 ml/cubic meter; 0.56 and 2.2 pints/1000 gallon depending on the contamination levels in the fount reservoir (between 25 and 100 ppm active ingredient) at a suitable point in the fount reservoir where there is adequate flow or turbulence to ensure quick mixing. MYACIDE BT30 may be shock dosed once "or" (Wice weekly as a normal routine. Where conditions "indicate, more frequent shock dosing may be required.

CONSUMER, HOUSEHOLD AND INSTITUTIONAL

Including use in dishwashing liquids, surface cleaners and polishes.

MYACIDE BT30 should be dosed at 280 to 1400 ml/cubic meter or 2.2 to 11.2 pints/1000 gallon based on the final formulation volume (100 to 500 ppm active ingredient).

WATER BASED RICULTURAL PESTICIDE

MYACIDE BT30 should be dosed at 280 to 1400 ml/cubic meter or 2.2 to 11.2 pints/1000 gallon based on the final formulation volume (100 to 500 ppm active ingredient).

STARCH, PIGMENT AND EXTENDER SLURRIES

For use in water based suspension concentrates.

MYACIDE BT30 should be dosed at 280 to 1400 ml/cubic meter or 2.2 to 11.2 pints/1000 gallon based on the final formulation volume (100 to 500 ppm active ingredient).

PAINTS, LATEX AND ANTIFOAM EMULSION SYSTEMS

For use in acrylic, styrene-acrylic, polyvinyl acetate and other latex emulsion concentrates and latex emulsion based paints. Also for the preservation of silicone and other antifoam emulsion systems.

MYACIDE BT30 should be dosed at 280 to 1400 mł/cubic meter or 2.2 to 11.2 pints/ 1000 gallon based on the final formulation volume (100 to 500 ppm active ingredient).

RAW MATERIALS

For use in the manufacture of industrial and consumer products.

MYACIDE BT30 should be dosed at 280 to 1400 ml/cubic meter or 2.2 to 11.2 pints/1000 gallon based on the final formulation volume (100 to 500 ppm active ingredient).

SURFACTANTS

For use include poionic nonionic, amphoteric and cationic surfactages, where supplied for the manufacture of industrial and consumer products.

MYACIDE BT30 should be dosed at 280 to 1400 ml/cubic meter or 2.2 to 11.2 pints/1000 gallon based on the final formulation volume (100 to 500 ppm active ingredient).

ACCEPTED with COMMENTS in EPA Letter Dated: FEB 7 1997
