
	U.S. ENVIRONMENTAL PROTECTION AGENCY Office of Pesticide Programs Registration Division (7504C) 401 "M" St., S.W. Washington, D.C. 20460	EPA Reg. Number: 33753-29	Date of Issuance: JAN 10 2002
	NOTICE OF PESTICIDE: <input checked="" type="checkbox"/> Registration <input type="checkbox"/> Reregistration	Term of Issuance:	
	(under FIFRA, as amended)	Name of Pesticide Product: Myacide HT	
Name and Address of Registrant (include ZIP Code): BASF MicroCheck Limited Mere Way, Ruddington, Nottingham NG11 6JS, United Kingdom			
<p>Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.</p> <p>On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.</p> <p>Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.</p> <p>This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:</p> <ol style="list-style-type: none"> Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4. Make the following label changes: <ol style="list-style-type: none"> Revise the EPA Registration Number to read, "EPA Reg. No. 33753-29." Place the appropriate "Establishment No." on the product labeling. 			
Signature of Approving Official: Marshall Swindell, Product Manager 33, RMBI, AD 		Date: JAN 10 2002	

c. Generate a "Storage and Stability" study on the above mentioned product. Please note that this study should kept on file. Currently, this study is not being requested.

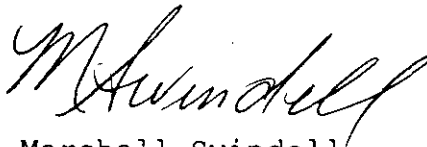

3. Submit two copies of the revised final printed label for the record.

The Confidential Statement of Formula, dated August 1st, 2001 is approved.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Marshall Swindell
Product Manager 33

BASF

US0102MYACIDHT

MYACIDE™ HT

Myacide HT is a liquid antimicrobial agent for use in controlling microbial contamination in latex emulsions and water dispersible paints, water based metal working fluids and the preservation of drilling muds and workover and completion fluids.

ACTIVE INGREDIENT:

Hexahydro-1,3,5-tris-(2-hydroxyethyl)-s-triazine 78.5%

INERT INGREDIENTS:

TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID

If inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor or treatment advice.
If on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes • Call a poison control center or doctor for treatment advice.
If in eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
If swallowed	<ul style="list-style-type: none"> • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-832-4357 for emergency medical treatment information.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

MYACIDE IS A TRADEMARK OF BASF AG

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Corrosive. Causes severe eye and skin damage. Harmful or fatal if swallowed. May cause skin sensitization. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, protective clothing, and chemical resistant rubber gloves when handling. Wash thoroughly with soap and water after handling, and before eating, drinking or using tobacco. Remove contaminated clothing and wash separately before re-use.

Applicators and other handlers must wear long-sleeve shirt and long pants, socks plus shoes, and chemical resistant gloves. Do not apply this product in a way that will contact workers or other persons. Follow manufacturer's instructions for cleaning/maintaining personal protective equipment (PPE). If there are no such instructions, for washables use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. If pesticide gets inside clothing remove clothing immediately, wash thoroughly, and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste.

CONTENTS: SEE PACKAGE

JAN 10 2002

Under the Federal Insecticide,
Fungicide, and Rodenticide Act as
amended, for the pesticide,
registered under EPA Reg. No.

33753-29**STORAGE AND DISPOSAL****PESTICIDE STORAGE**

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE

Store in a cool (less than 100°F) dry location. Keep container tightly closed when not in use. Do not store with strong oxidising agents or strong (concentrated) acids.

PESTICIDE DISPOSAL

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL

Empty residue into application equipment. Triple rinse (or equivalent) then offer container for recycling or reconditioning, or puncture. Dispose of container in a sanitary landfill, or by other procedures approved by state and local authorities.

CONDITIONS OF SALE AND WARRANTY

The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labelling, all of which are beyond the control of the Seller. All such risks shall be assumed by the Buyer. BASF MicroCheck Limited warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to above. BASF MICROCHECK LIMITED MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL BASF MICROCHECK LIMITED BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF MicroCheck Limited offers this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorised representative of BASF MicroCheck Limited.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELLING

LATEX EMULSIONS AND WATER DISPERSIBLE PAINTS

Add 0.1% (1000 ppm) to the emulsion or paint at any convenient time during the manufacturing operation. 1 gallon of product to 1000 gallons of paint added in areas of the manufacturing process that will allow through mixing of the biocide and paint will provide this dose rate.

WATER-BASED METALWORKING FLUIDS

For best results drain and clean the system before adding fresh metal working fluid.

To inhibit the growth of bacteria add 0.04 to 0.2% (400-2000 ppm) of Myacide HT directly to the use-diluted fluid in the metal cutting/grinding machinery sump to allow thorough mixing of the product and diluted fluid. For example, 0.16 pints of product to 10 gallons of metalworking fluid will provide a dose rate of 2000 ppm. Allow to circulate for about one hour before shutdown.

For the addition of any make-up fluid add the product at the same rates as above to use-diluted fluid and mix thoroughly before addition to the system.

Treatment of the in-use diluted metalworking fluid should be repeated every four weeks, or more frequently if excessive contamination occurs.

Myacide HT may be incorporated in metalworking fluid concentrate at a level that will provide 0.04 to 0.2% product concentration when the fluid is diluted with water for use. The concentrate manufacturer should ensure that any incompatibility will not affect efficacy.

Not for use in non-aqueous concentrates.

PRESERVATION OF DRILLING MUDS AND WORKOVER AND COMPLETION FLUIDS

Add sufficient volume to give a concentration of 500-1000 ppm Myacide HT by weight in the drilling mud system, workover or completion fluid. For example, 21-42 gallons per each 1000 barrels of drilling mud provides these concentrations. The dose rate in all instances is dependent on the expected initial and on-going level of contamination.

DRILLING MUDS

While the system is circulating, add the Myacide HT in a thin stream. Add additional product to maintain the proper concentration as the total volume of the system increases with the well depth.

WORKOVER FLUIDS

Add Myacide HT into the system and circulate the workover fluid system until the fluid returns clear. Shut the system down and idle for several hours. Remove the workover fluid. The well should be ready for productive use.

COMPLETION FLUID

Add Myacide HT to the completion fluid prior to pumping into the well system.
