NOTICE OF PESTICIDE

X Reregistration
of
Pesticide

Under the Federal Insecticide, Fungicide, and Rodenticide Act

NAME OF PESTICIDE PRODUCT

NISSAN T.C.C.A. TABLET

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Nissan Chemical America Corporation
303 South Broadway
Tarrytown, NY 10591

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) or sec. 4 when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product for shipment:

a. Add the phrase "EPA Registration No. 33906-8.

b. The Precautionary Statements must be revised in accordance with the enclosed Isocyanurate RED Attachment A.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA

☐ ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Ruth G. Douglas

ISOCYANURATE RED ATTACHMENT A

LABELING: (Statements are based on review of referenced acute toxicity data)

1. The signal word is "DANGER"
2. Revise the Precautionary Statements to read:

CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

3. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT.

IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF ON SKIN Wash with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals:

DANGER: Corrosive. Causes eye and skin damage. Do not get in eyes, on skin or on clothing. Wear rubber gloves when handling. May be fatal if swallowed. Irritating to nose and throat. Avoid breathing dust. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Strong Oxidizing Material. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, dirt, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. In case of fire, flood with large quantity of water. In the event of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Photographic Waterbath Applications

Use TCCA TABLET in the waterbaths of b/w film processors in the fields of phototypesetting, reproduction, microfilm, X-ray diagnostics and the production of circuit boards.

Use this product consistently to control the algae growth and slime formation in photographic waterbaths. TCCA TABLET prevents the constant cleaning of the walls and racks of the water tank.

Before TCCA TABLET is used for the first time, the water tank and water tank racks should be thoroughly cleaned.

TCCA TABLET must be totally submerged to function properly, and the waterbath should not be drained when the equipment is idle. TCCA TABLET should be placed in a well agitated area of the water tank, preferably right under or near the water inlet. In case of very narrow water tanks, TCCA TABLET may also be placed on the bottom of the tank, provided the water is sufficiently agitated there.

The formation of new algae is prevented by the release of the proper dose of available chlorine into the water. Dosage is automatic and depends on water quality, water consumption, and operating hours of the processor. The recommended start up dosage is one tablet (20 grams, approximately 0.71 oz) for 10 gallons of water.

Once placed in the water tank, there is no need for any maintenance. TCCA TABLET usually needs replacing every two to three weeks if the water tanks have not been refilled.

Do not use or apply TCCA TABLET in combination with any chemicals. Use TCCA TABLET only in waterbaths for the above uses.

(Side Panel Cont.)

Swimming Pool Applications

TCCA TABLETS - Slow dissolving tablets to provide continuous chlorination to control bacteria and algae.

Initially pre-condition your pool water with a stabilizing product. Follow directions on the label of that product.

RECOMMENDED DOSAGE: For each 15,000 gals. of pool water, place 7 tablets (5 oz. by wt.) in the skimmer basket. Allow 8 to 12 hrs. for chlorine residual to equalize. Initial treatment will last from 2 to 4 days depending on water temperature and flow rate through the skimmer. Chlorine residual should be maintained between 1.5 and 2.0 ppm as determined by a suitable test kit. If daily testing indicates the chlorine level to be low, increase the number of tablets in the skimmer basket. If daily testing indicates the chlorine level to be higher than 2.0 ppm, reduce the number of tablets accordingly.

Once every two weeks a shock dose of 5 ppm chlorine should be made to prevent the development of resistant species of algae. Use a superchlorinating product and follow directions on the label of that product. Keep pH of water between 6.5 and 7.6 as determined by a suitable test kit.

Re-entry into treated swimming pools is prohibited above levels of 3 ppm chlorine residual.

STORAGE AND DISPOSAL

Store in a cool, dry, ventilated area away from heat or open flame. Keep product dry in a tightly closed container when not in use. Do not allow water to get into container. Keep container off wet floors. Do not contaminate water, food or feed by storage or disposal. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
