***DIRECTIONS FOR USE: Read ALL the Label First!**

To be effective, existing weeds must be removed in early Spring or treatment made on freshly cultivated ground. Apply 1 pound per 100 square feet. The contents of this package treats 400 square feet of flower bed. Sift over ground as uniformly as possible. Water lightly after application. Do not treat dry, hard ground, do not cultivate ground after application. A second late Summer or Fall application gives year around weed free plantings. See cautions for plants that should *not* be treated.

Controls crabgrass, purslane, lambsquarters, red root pigweed, common chickweed, spotted spruce as well as other annual grasses and broad leaf weeds. Ragweed and smartweed are not controlled.

May be used around and under shade trees, evergreens, flowering shrubs and hedge rows. Also in groundcovers such as ivy and pachysandra. Do not use on dichondra. Does not prevent growth into treated areas by turf grasses.

May be used very effectively in rose beds and in iris and gladiolus plantings.

Treat annual flowers after transplanting from flats or after thinning and initial weeding. Do not treat immediately after seeding petunias, snapdragons and similar flowers.

STRAWBERRIES: New planting — apply overall immediately after transplanting. Established Planting — apply in the Fall and early Spring before weeds emerge. Do not apply after first bloom. Use ½ pound per 60 square feet or entire contents on 480 sq. ft. of bed.

VEGETABLES: Treat snap beans as soon as planted. Use around onion sets and after transplanting cabbage, cauliflower, broccoli, sweet potato slips and tomatoes. On tomatoes, defer treatment 4 to 6 weeks after transplanting, clean cultivate before making application.

*Cautions: Do not take internally. Avoid contact with eyes. Wash after handling or using. Do not contaminate feed or foodstuffs. Do not store near seeds, fertilizer or pesticides.

The following plants may be injured — Do Not use near these: Bugle weed, button pinks, carnations, dianthus, geum, ice plants (mesembryanthemum), pansy, phlox, portulaca, sweet william, telanthera, violets. Use around tulips, amaryllis and hosta is questionable.

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the use stated on the label when used in accordance
