DIRECTIONS FOR USE:

A highly refined kerosene oil for winter control of certain insects. Apply in dormant period before bud break in late winter or early spring. Do not apply when a hard freeze is to be expected as injury may result from the excess deposit. Spray so as to wet all twigs, limbs, and the trunk. Remove all loose bark prior to spraying. Scale may be protected by the "chisel". Always use carefully. Add to water and mix thoroughly. Do not use mixture after standing with out stirring.

APPLES, PEACHES, PLUMS, CHERRY, ALMOND, WALNUT, PEAR: Use 1/2 cup to 1 gallon of water (1 1/2 gal./100) to control scale, louse, and other insects.

ORANGE, LEMON, CITRUS: Use 1/2 cup to 1 gallon of water for scale, louse, and other insects. Do not use on young trees (under 10 ft.) and fruit.

ROSE, SHRUB, FRUIT TREE: Use 1/2 cup to 1 gallon of water (1 1/2 gal./100) to control scale, louse, and other insects.

FRUIT TREE: Use 1/2 cup to 1 gallon of water (1 1/2 gal./100) to control scale, louse, and other insects. Do not use on young trees (under 10 ft.) and fruit.

Caution: Do not use on fruit.

NOTE: Seller warrants that the product conforms to his chemical description and is suitable for the uses specified on the label. Seller does not warrant with respect to the use of the product for any other purpose, and the user assumes the risk of any such use.

DOSE AND
DIRECTIONS

To use in Acme Big Six and similar sprayers, measure the required amount of oil into the jar according to the number of gallons of spray to be used. Fill jar to proper mark with water. Stir until white cream emulsion forms. Attach to sprayer head and apply. Do not use after standing over a few minutes without re-mixing.
