Where a dosage range is indicated use the lower rate on young plants and early instars, and use the higher rate on mature plants, advanced instars, and adults. Thorough and uniform spray coverage is essential for effective control.

- ◆ Shake well before measuring. Keep container closed to prevent caking of contents. Best results are obtained by diluting measured amount of product with water in a separate container before adding to the sprayer.
- ◆ Apply when air is calm to avoid drift and contact with eyes and skin.
- ◆ Start applying at the farthest corner of the treatment area and work backward to avoid contact with wet surfaces. Allow spray to dry in treated areas before reentering.
- ◆ For trees taller than 10 feet, consider hiring a licensed professional.
- ◆ Spray thoroughly to wet upper and lower leaf surfaces, stems and branches.
- ◆ Subsequent planting of food and feed crops in treated soil must be made with crops on this or other carbaryl label(s).
