FOR INDOOR USE: Point valve away from face. Aim directly at nest of hornets, wasps and yellow jackets under rafters, etc. Do not spray in areas where foods and feedstuffs are exposed or handled.

GENERAL: Thoroughly saturate nest with spray, contacting as many insects as possible. To prevent insects from falling on skin and clothes, do not stand directly under nest. Best results can be obtained if nest is sprayed in late evening when most insects are at rest. If reinfestation occurs, repeat treatment.
