GENERAL WEED CONTROL:

Spray unwanted 'vegetation thoroughly to the point of runoff. Wilting will appear in 1 to 3 days and thorough browning in about 5 to 7 days. Repeat applications may be necessary, particularly for hard-to-kill perennials. The best kill is obtained on young plants and during hot, sunny weather.

LAWN RENOVATION:

The area to be treated should be mowed before treatment. Bermudagrass and other deep rooted perennials or uncovered foliage may require a second treatment. Reapply 5 days later if green areas remain. When foliage is all brown, matted areas should be raked and bare spots scarified. About 5 days after last treatment, water thoroughly and then seed at rate recommended for new lawns. Seed must be raked into soil. Keep seeded areas well watered.
