STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed, inhaled or absorbed through the skin. Do not breathe dust. Do not allow to contact skin, eyes or clothing. Wash hands and exposed skin before eating, drinking or smoking and after handling. Wash all contaminated clothing thoroughly before reuse.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention.

IF INHALED: Keep patient strictly at rest and transfer to hospital immediately to get medical attention.

IF ON SKIN: Wash with soap and warm water.

IF IN EYES: In case of eye contact, immediately flush eyes with plenty of water for at least 15 minutes.

NOTE TO PHYSICIAN: Contains Anticholinesterase Carbamate Insecticide. In case of overexposure, Atropine Sulfate 2 MG. (equivalent to 1/30 grain adult dose) should be given and repeated as necessary until fully atropinized.

Environmental Hazards: This pesticide is toxic to fish and wildlife. For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE: Store in original container in a locked storage area inaccessible to children and domestic animals.

PRODUCT DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse empty container. Rinse thoroughly before discarding in trash.

Do not use on or contaminate fruit, vegetables or other food or feed crops. Do not apply to humans, animals, clothing or bedding. Do not contaminate feed or food products or food preparation surfaces, dishes, kitchen utensils and food containers.

This product is for residual pest control in and on buildings and structures and their immediate surroundings. Permitted areas of use include, but are not limited to: houses, garages, trailers, campers, storage sheds and apartment buildings.

- INDOOR USE -

This product is intended for application with a shaker or puffer container to hiding and runway areas and those places where pests are found. The amount to be applied will vary with the site, but should usually be in the range of 1/3 to 2/3 ounces of dust per square yard.

COCKROACHES, ANTS, CRICKETS, SILVERFISH AND FIREBRATS: Thoroughly dust all areas where these pests crawl and hide, especially cracks and crevices around sinks, refrigerators and cabinets; behind baseboards; around doors and windows and in attics, basements and crawl spaces. For ants, apply to ant trails and around doors and windows where they may enter premises.

CARPENTER ANTS: Dust around doors and windows and other places where these pests enter premises. Where possible, locate and dust nests and surrounding areas.

BROWN DOG TICKS AND FLEAS IN BUILDINGS: Dust infested areas such as pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture and other places where these pests may hide. Old bedding of pets should be removed after treatment of pet area and replaced with clean fresh bedding. Additionally, ensure that pets are treated with an EPA approved product registered for pet use.

DO NOT TREAT ANIMALS OR THEIR BEDDING WITH THIS PRODUCT.

SPIDERS: Dust along and behind baseboards, window and door frames, corners, pipes, storage localities, attics, basements, crawl spaces and other areas where spiders may hide.

WASPS: It is best to treat wasp nests at night when insects are less active and have returned to the nest. Do not wear loose fitting clothing - take necessary precautions to avoid stings. For best results, carefully dust near nest and check one or two days after treatment to ensure complete kill, and retreat if necessary. If possible, remove and destroy nest to prevent hatching of new insects. For ground nests, carefully dust entrance and surrounding areas. Retreat in one or two days if wasp activity is still present. Do not use this product to treat nests overhead.

SOWBUGS, PILLBUGS, GROUND BEETLES, EARWIGS, MILLIPEDES, CENTIPEDES AND SCORPIONS: Apply around doors, windows and other places where these pests may enter. Treat baseboards, storage areas, and cracks and crevices, especially in dark, musty areas where these pests may hide.

- OUTDOOR USE -

PERIMETER TREATMENT: Use as a residual treatment for control of ants, brown dog ticks, centipedes, cockroaches, crickets, earwigs, firebrats, fleas, ground beetles, millipedes, pillbugs, scorpions, silverfish, sowbugs, spiders and wasps. Make a residual treatment around windows and doors, porches, screens, eaves, patios, garages, under stairways and in crawl spaces and other areas where pests hide.

To help prevent invasion of buildings and structures by the above pests, treat a band of soil and vegetation 6 to 10 feet wide around and adjacent to the building foundation and crawl spaces where pests are active and may find entrance. Apply thoroughly and uniformly to the band area. Pay particular attention to ant hills and wasp nests in the band area. Wasp nests in trees and shrubs may be treated as noted above.

FIRE ANTS: Stir 7 oz. into 2 gallons of water. Pour a small amount of material around the perimeter of the mound. Apply the remaining volume directly on the mound so as to penetrate insect galleries, using 2 gallons of mixture on mounds 8 inches or larger in diameter. Less mixture can be used on smaller mounds; however, thorough penetration of the insect galleries must be achieved. A second treatment may be necessary if complete control is not obtained.

Do not disturb the mound prior to application. If possible make applications after a recent rainfall. For best results apply in cool weather, 65-80°F, or in early morning or late evening hours. Treat new mounds as they appear. Pressurized sprays may disturb the ants and cause migration, reducing product effectiveness.

LIMITED WARRANTY AND DISCLAIMER.

The manufacturer warrants only that the chemical composition of this product conforms to the ingredient statement given on the label, and that the product is reasonably suited for the labeled use when applied according to the Directions for Use.

THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE EXPRESSLY DISCLAIMED. This limited warranty does not extend to the use of the product inconsistent with label instructions, warnings or cautions, or to use of the product under abnormal conditions such as drought, excessive rainfall, tomadoes, hurricanes, etc. These factors are beyond the control of the manufacturer or the seller. Any damages arising from a breach of the manufacturer's warranty shall be limited to direct damages, and shall not include indirect or consequential damages such as loss of profits or values, except as otherwise provided by law.

The terms of this Limited Warranty and Disclaimer cannot be varied by any written or verbal statements or agreements. No employee or agent of the seller is authorized to vary or exceed the terms of this Limited Warranty and Disclaimer in any manner.
