## INFLAMMABLE DIRECTIONS DE-BUGG SPRAY

FOR SPOT APPLICATION ONLY.

GENERAL DIRECTIONS: Use a coarse sprayer, preferably a 2½ gallon type. Spray into cracks and crevices around water pipes, basins, flush boxes (inside and out), conduit lines, fuse boxes, motors (including guards). Prior to application de-energize electrical equipment and after application allow time for oil to evaporate/dry before starting motors or placing switches in the ON position.

To control spiders, roaches, ants and silver fish, spray into cracks, crevices, and corners. Before spraying, remove dishes, cooking utensils from cabinets and shelves of cabinets, baseboards, sinks, window and door frames. Material removed from cabinets should only be replaced after the spray has dried and shelves have been covered with paper. If any of these utensils become contaminated, they should be thoroughly cleaned.

**CAUTION: DO NOT ALLOW CHILDREN IN TREATED AREAS UNTIL SURFACES ARE DRY.**

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME. Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.

Harmful if swallowed. Keep out of reach of children. This solution if brought in contact with skin can cause toxic symptoms. Avoid inhalation and skin contact.

In case of spillage on the skin, wash with soap and water.

Avoid contamination of foodstuffs.

Do not use on household pets or humans.

Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.
