pallet overhang, can affect package strength. Personnel should use clothing and equipment consistent with good pesticide handling.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**POTATOES, SEED PIECES:** As an aid in the control of seed piece decay caused by soil borne *fusarium*. CAPTAN 7.5 DUST will NOT protect the seed piece against bacterial diseases (such as soft rot or black leg caused by *Erwinia*) in or on the seed piece or in the soil. Captan will NOT protect against *fusarium* already established in or on the seed piece. Apply sufficient amount of CAPTAN 7.5 DUST to provide a thorough coverage (7 to 10 ounces per bushel of cut seed pieces or 10 ounces to 1 lb. per 100 lbs. of cut seed pieces). Whole or 1-drop seed will need less material. Depending on the number of cuts made in the seed piece, the amount of dust used will vary as a result of the number of surface areas exposed for treatment. Apply in convenient container or by duster attachment over belt. Cut pieces should be treated within 6 hours of cutting. If planting is to be delayed more than 1 to 2 days the treated pieces should be stored for 2 to 3 days in open crates before bagging. Do not use treated seed for food or feed purposes.

**NOTE TO USER:** Tuber damage and/or decay may occur on sandy soils under moist soil conditions and higher than normal soil temperatures. Do not use if these conditions can occur or if there has been a past history of seed piece decay due to this problem.
