Mr. J. Allen Dunlap III Platte Chemical Company P.O. Box 667 Greeley, CO 80632-0667

SEP 29 1994

18/5

Dear Mr. Dunlap:

)

Subject: Amendment- Revise per Diazinon Registration Standard

Diazinon AG 500 Insecticide

EPA Registration Number 34704-41

Your submission dated December 15, 1993

This amendment referred to above, submitted in connection with registration under FIFRA section 3(c)(7)(a), will be acceptable, provided that you:

- a. Under DIRECTIONS FOR USE change "Federal Law" to "Federal law".
- b. Under STORAGE AND DISPOSAL change "Federal Law" to "Federal law".
- c. Wherever "Twospotted spider mites" appears please change to read "Two-spotted spider mites".
- d. On page 5 of your label change "Do not apply to foodcrops grown in greenhouses." to read "Do not apply to food crops grown in greenhouses.".
- e. Update your label to comply with PR Notices 93-7 and 93-11.

Sincerely,

George T. LaRocca Product Manager (13) Insecticide-Rodenticide Branch Registration Division (H7505C)

# RESTRICTED USE PESTICIDE

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's Certification.

THIS PRODUCT MUST NOT BE USED ON GOLF COURSES AND SOD FARMS.

# IAZIN AG500 SEP 29 1914 Insecticide

ACCEPTED ith COMMENTS EPA Letter Dated

Under the Federal in ceticide, Fungicide, and Ruderli ide Act as amended, for the registered under EPA eg. No. 34704

For control of certain insects on fruits, nuts, vegetables, field crops, lawns, and ornamentals.

#### **ACTIVE INGREDIENT:**

Diazinon (O,O-Diethyl O-(2-Isopropyl-6-methyl-4-INERT INGREDIENT: 52% 100% TOTAL

> This product contains 4 lbs. Diazinon per dation. \*Contains xylene range aromatic solvent.

## KEEP OUT OF REACH OF CHILDREN CAUTION

**EPA REG. NO. 34704-41 NET CONTENTS** 

**EPA EST. NO. 279-CA-1** GAL. (

See Below For Additional Precautionary Statements and Directions For Use

IMPORTANT: Read the entire Directions for Use and the Notice before using this product. If lerms are not acceptable, return the unopened product containers at

37011

)

EXPCG10Y93

# PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if swallowed, inhaled or absorbed through skin. Causes moderate eye injury. Avoid contact with skin, eyes, or clothing. Avoid breathing vapor or spray mist. Wash thoroughly with soap and water after handling and before eating or smoking. Remove contaminated clothing and wash before reuse. Avoid contamination of food and feed, Food utensils such as tablespoons and measuring cups should not be used for food purposes after use in measuring pesticides. Keep out of reach of domestic animals. Do not use on humans, household pets or liveslock. Do not contaminate ornamental fish ponds. Do not permit children or pets to go onto treated areas until spray has dried.

#### **ENVIRONMENTAL HAZARDS**

This product is highly toxic to birds, fish and other wildlife. Birds, especially waterlowl, feeding or drinking on treated areas may be killed. Because of the migratory habits of Atlantic Coast waterfowl, do not apply this product to lawns in Nassau County, New York between November 1 and May 20. Do not exceed maximum permitted label rates. Rates above those recommended significantly increase potential hazards to birds, especially waterlowl. Avoid overlapping of sprays, if waterlowl, i.e., ducks or geese, can be expected in the treated area after treatment (except spot freatment), apply at least 1/4 inch of water immediately after spraying this product, however, stop watering before puddling occurs. Keep out of lakes, streams, ponds, tidal marshes and estuaries. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoil may be hazardous to aquatic organisms in neighboring areas. Shrimp and crab may be fulled at applications rates recommended on this label Do not apply where fish, shrimp, crab, and other aquatic life are imporfant resources. Do not contaminate water by cleaning of equipment or disposal of equipment washwaters

This pesticide is highly toxic to bees exposed to direct treatment or residues on binoming crops or weeds. Do not apply this pesticide or allow it to drift to blooming crops or weeds if bees are visiting the treatment area

#### PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill, or store near heat or open flame.

#### STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. DO NOT INDUCE VOMITING. Vomiting may cause aspiration pneumonia. Do not give anything by mouth if person is unconscious or convuls-

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

IF ON SKIN: Wash promptly with soap and water. Rinse thoroughly, Get medical attention.

IF IN EYES: Rinse eyes with plenty of water. Call a physician if irritation persists.

NOTE TO PHYSICIAN: This product is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine suitate by injection is antidotal, 2-PAM is also antidotal and may be administered, but only in conjunction with atropine. This product contains a xylene range aromatic solvent which may present an aspiration hazard. Gastric lavage may be indicated if product was taken internally.

#### **DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAU-TIONS ON THIS LABEL MAY RESULT IN POOR INSECT CONTROL. CROP INJURY, OR ILLEGAL RESIDUES.

#### CHEMICATION

#### APPLICATION THROUGH AN IRRIGATION SYSTEM (CHEMIGATION) - CRANBERRIES ONLY

DIAZINON AG500 may be applied alone or in combination with other pesticides registered for application through sprinkler irrigation systems to cranberries. To insure compatibility, pour the products into a small container of water in the correct proportions. After thorough mixing, let stand for five minutes, if the combination remains mixed, or can be remixed readily, the mixture is compatible.

Do not apply this product through any type of irrigation system to other crops. For chemigation, apply this product to cranberries only through sprinkler irrigation systems. Do not apply this product to cranberries through any other type of wrigation system.

Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.

Do not connect the irrigation system used for pesticide applicntion to  $\epsilon$ public water system unless the pesticide label-prescribed safety devices for public water systems are in place. A person knowledgeathr of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments, if the need arisus.

#### **Chemigation System Connected to Public Water Systems**

1. Public water system means a system for the provision to the outling of piped water for human consumption if such sistem has at least 15 service connections or regularly serves an average  $\omega$  at least  $2\sigma$  individtials daily at least 60 days out of the year

Chemigation systems connected to public water systems must contain i functional, reduced-pressure zone, backflow preventor (RPZ) or the functional equivalent in the water supply line upstream from the point of pesticide introduction. As an option to the BPZ, the water from the cubbic water system should be discharged into a reservoir tank prior to pesticide introduction. There shall be a complete physical break (air gap) between the outlet end of the fill pipe and the top or overflow rim of the resorred tank of at least twice the inside diameter of the fill pipe

#### **EPA REG. NO. 34704-41**

#### Sprinkler Chemidation

t. The system must contain a functional check valve, a vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the

injection pump,

- 3. The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.
- 4. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump mojor stops.
- 5. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected. 6. Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

#### Operating Instructions

١

1. Determine the acreage to be treated by the sprinkler system.

Measure the appropriate amount of DIAZINON AG500 needed to treat the acreage to be treated. Refer to the specific directions for use for cranberries for the application rate and the amount of water per acre.

 Add the pre-measured DIAZINON AG500 to the chemigation system supply tank and dilute with water if needed. Proper agitation is needed if DIAZINON AG500 is tank mixed with other pesticides registered for sprinkler chemigation application to cranberries.

 Start the irrigation system and bring the system up to full pressure, making certain that all sprinkler heads are functioning properly.

Engage the chemigation injection or venturi system to add the diazrnon to the impation lines.

 Continue to run irrigation system for a few minutes after supply tank is empty to allow material in the irrigation tines to reach the sprinkler heads furthest from the chemiqation injection point.

#### **WORKER SAFETY RULES**

REPEATED EXPOSURES TO CHOLINESTERASE INHIBITORS SUCH AS ARE CONTAINED IN THIS PRODUCT MAY, WITHOUT WARNING, CAUSE PROLONGED SUSCEPTIBILITY TO VERY SMALL DOSES OF ANY CHOLINESTERASE INHIBITOR.

When handling Diazinon AGS00, do not rub eyes or mouth with hands. If you feel sick in any way, STOP work and get help right away. See Practical Treatment Section of this label. When handling this product, wear the personal protective equipment listed on the following section.

#### PERSONAL PROTECTIVE EQUIPMENT

Long-sleeved shirt, long-legged pants, shoes and socks, and chemical-resistant gloves.

Do not apply this product in a way that will contact unprotected workers, either directly or through drift. Only protected handlers may be in the area during application.

#### **REENTRY STATEMENT**

Twenty-four hours must elapse between the time of application to vegetables, fruits, nuts, and field crops and the time a worker enters or is allowed to enter the treated area, unless the person entering the treated area is wearing the personal protective equipment listed above. For lawns, ornamentals, or non-crop areas, do not enter or allow entry into treated areas without personal protective equipment until sprays have dried.

Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information (See Note pelow).

In vegetables, fruit trees, or field crops, written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. Oral warnings must inform workers of areas or fields that may not be entered without specific personal protective equipment for 24 hours after application, and appropriate actions to take in case of accidental exposure, as described under STATEMENT OF PRACTICAL TREATMENT in the PRECAUTIONARY STATEMENTS on this label. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Oral warnings must be given if there is reason to believe that witten warnings cannot be understood by workers.

Written warnings must include the following information

#### WARMING

Real treated with (business AGS00 on route of apprix then 11) o not a ster without appropriate personal protective equipment or 24 fours after application.

in case of accidental exposure, flush eyes or skin with plenty of water. Call physician if irritation persists. Remove and wash contaminated ciothing before reuse.

OTE: The California Department of Agriculture has set a 5-day reentry for Diazinon on grapes, peaches, and nectatines. Five days should mapse between the time of application and the time a worker may enter the field to engage in any activity requiring substantial contact with treated foliage. When a mixture of two or more organophosphate pesticibes are applied in combination, the interval should be prolonged by adding to the largest applicable interval an additional 50% of that interval.

#### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsale is a violation of Federal Law. If pesticide, spray mixture or rinsale cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER: Triple rinse (or equivalent). Then puncture and dispose of in a sanitary landfill, or incinerate or burn, if allowed by state and local authorities. Stay out of smoke from burning container.

For minor spills, leaks, etc. follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup and disposal of wastes. In the event of a major spill, fire or other emergency, call 1-303-356-4400 or 1-800-424-9300 day or night.

#### **GENERAL INFORMATION**

DIAZINON AGS00 is an emulsifiable solution which, when diluted with water according to the directions, is intended for the control of insect pests of agricultural crops and other plants. Do not use on food crops grown in greenhouses. Do not use in barns or dwellings. Do not use on livestock.

In the directions for use which follow, best control is obtained when application is made at first sign of pests, Application should be repeated only as directed to maintain control.

To avoid spray drift, do not apply under windy conditions. Avoid spray overlap, since crop or plant injury may result.

#### **FRUIT AND NUT CROPS**

DIAZINON AG500 may be applied using ground or aenal application equipment as specified in the following table. This table indicates the minimum amount of water that can be used for the various methods of application. The rate of DIAZINON AG500 for aerial spray or concentrated spray applied to fruit trees by ground equipment is based on a citute full cover spray applied with conventional ground equipment at a rate of 300-400 gallons of water per acre. The specific amount of product to be used appears under the separate directions for use for each crop, if the Rate calls for 1 pt. of DIAZINON AG500 in 100 gallons of water, this amounts to 3-4 pts. of product per acre when applied at the usual dilute ground spray volumes of 300-400 gallons of water per acre. In no case should the amount of product used per acre exceed the maximum amount per acre per application that is specified in the Timing/Special Directions for individual crops.

<sup>\*</sup>PHI = Pre-Harvest Interval or the number of days between the last application and harvest; may vary based on use pattern selected. See specific directions for use on grapes.

\*\* - Dormant spray only.

Note: To protect bees, do not apply this product to fruit trees when trees or substantial numbers of weeds in the orchard are in bloom.

CROP	PEST	RATE	TIMING/SPECIAL DIRECTIONS
Almonds (CA only)	San Jose Scale, Parlatona Scale	1-11/2 pts. + 2-3 gallons dormant oil or 1-11/2 gallons superior type oil in in 100 gallons of water	Apply as a dormant spray. Do not apply more than 6 pts. of diazinon or 9 gallons of oil per acre.
Apricots	Aphids, Brown Mites (Clover Mites), Twospotted Spider Mites, Olive Scale Crawlers, San Jose Crawlers	f pt. in 100 gallons of water	Apply as infestations occur. Repeat application after 14 days if necessary.
	Olive Scale Crawlers	1/2 pt. + 11/2 gallons of light medium horticultural oil per 100 gallons of water	are present.
	Apricot Mealybugs	1 pt, per 100 gallons of water	Apply as a cover spray from petal fall to June. Allow 14 days between applications.

Notes: (1) Do not apply more than 4 pts. of product per acre per application and no more than 12 pts. of product per acre per season. (2) To avoid illegal residues, allow a minimum of 21 days between the last

application an	id harvest.		
Caneberries (CA, OR, and WA only) (Black-berries, Boysen-berries, Dewberries.		1 qt, per acre	Apply as insects occur. Repeat application after 14 days if necessary. Do not make more than 5 applications per season. Do not apply within 7 days of harvest or illegal residues may occur.
Logan bernes, Raspbernes)	Sawflies		Apply in a minimum of 100 gallons of water per acre. (700 gallons per acre maximum)
			For Raspberry Fruitworms make one application when blossom buds separate. Make a second application immediately before blossoms open.

свое	PEST	RATE	TIMING/SPECIAL DIF ECTIONS
Careternes ( contid.	Dryterry Mites	1-2 qts, per acre	Apply as a dormant splay in the early Spring when canes are still on the ground and buds are closed. Make a second application when buds are well developed but still closed.
			Apply in a minimum of 100 gallons of water per acre. Do not apply within 7 days of harvest or illegal residues may occur.
	Raspberry Crown Borers, (Raspberry Root Borers)	2 qts. per acre	Apply a single application in a minimum of 100 gallons of water per acre as a drench to the crown and lower canes in the Spring before buds break.
Cherries	Eyespoited Bud Moths, Fruit Tree Leafrollers	1 pt. in 100 gallons of water	Apply in cover sprays as infestations occur beginning at petal fall. Repeat application after 7 days if necessary.
	Leathoppers	t pt. in 100 gallons of water	Make 3-4 applications beginning at petal fall and continuing through the growing season as infestations occur. Allow 7 days between applications.
	Cherry Fruitflies	1/2-1 pt. in 100 gallons of water	Make 3-4 applications beginning when adult flies begin to emerge and repeating at 10 day intervals.
	Black Cherry Aphids	1 pt. in 100 gallons of water	Apply as a cover spray when aphids appear. Repeat application after 10 days if necessary.
	San Jose Scale Crawlers	1 pt. in 100 gallons of water	Apply during the pre-pink stage or when crawlers first appear.
Natas (4) S	Cherry Rust Mites	1/2-1 pt. in 100 gallons of water	Apply to trees as a single supplemental spray after harvest.

Notes: (1) Do not make more than 3 applications per season. (2) Do not apply more than 4 pts. of product per acre per application and no more than 12 pts. of product per acre per season. (3) Allow a minimum of 21 days between the last application and harvest.

Cranberries	Blackheaded Fireworms (Rhopobota naevana)	2 qts. in a minimum of 15 gallons of water per acre for ground application and up to 400 gatlons of water per acre for chemigation.	Apply when pest appears. Repeat application after 14 days if necessary. A maximum of 6 applications per season is permitted. Do not apply within 7 days of harvest or illegal residues may occur.
	Cranberry Fruitworms	3 qts. in a minimum of 15 gallons of water per acre for ground application and up to 400 gallons of water per acre for chemigation	Apply as pest appears. Repeat application after 14 days if necessary. A maximum of 4 amplications per season is ps. mitted. Do not apply within 7 days of harvest or iffecting residues may occur.

Note: This product may be applied to cranberries through sprinkler irrigation. Refer to the Chemigation section for appendic chemigation directions for use.

<sup>&</sup>quot;PHI = Pre-Harvest interval or the number of days between the last application and harvest.

Notes: 1) Soil Incorporation: Following application of this product to control vegetable soil insects, immediately incorporate the product into the soil to the recommended depth (see TIMING/SPECIAL DIRECTIONS) using a rotary hot, cultivator, disk, harrow, or other suitable means. For control of surface cultivorrits, incorporate 2-3 inches, for subterranean cultivorms incorporate 3-6 inches, 2) To Protect Bees: Foliar applications of this product should not be made to peas or beans if these crops or weeds in the treatment area are in bloom, or to comiduring the pollen shed period.

CROP	PEST	RATE	TIMING/SPECIAL DIRECTIONS
Beans (Lima, Pole or Snap) (succulent only)	Culworms	2-4 qts. per acre	Broadcast just before planting and immediately incorporate into the soil. (See Soil Incorporation Note.)
	Wireworm	3-4 qts. per acre	Broadcast just before planting and immediately incorporate into the top 4-8 inches of soil.
	Black Bean Aphids, Mexican Bean Beetles, Dipterous Leatminers	1-11/2 pts. per acre	Apply as insects occur. Repeat application, as necessary, every 5 days. Do not make more than 3 applications per season. Do not apply within 7 days of
			harvest or illegal residues may occur.
	Cucumber Beetles	3/4 pt, per acre	Bean forage or bean hay may be led to dairy and beef cattle and sheep. Wait 4 days following treatment if forage is to be cut for hay.
		_	Make cucumber beetle application in 100 gallons of water per acre.
			Notes: 1) Diazinon will not control organophosphale- resistant lealminers. 2) To protect bees, do not apply foliarly if the crop or weeds in the treatment area are in bloom.
Beans, Lima (succulent only)	Leathoppers, Spider Mites	1 pt. per acre	Apply as pests occur. Repeat application, as necessary, every 5 days. Do not make more than 1 of the change of the compositions per season,
			Do Lot upply within 7 days of harvest or illegal residues have count
			Br an to age or bean hay may be fed to dairy and best rattle and sheep Wait to days tolowing treatment if the total is to be cut for hay.
			Note: To protect these do mit apply toliarly if the LTLp c weeds in the treatment area are in bloom

#### FIELD CROPS

Soil and foliar applications of DIAZINON AG500 should always be applied as a spray in sufficient water to ensure thorough coverage. For foliar applications, observe stated time intervals between last application and harvest, as well as intervals between applications and fotal number of applications that can be made per season.

#### Pre-harvest Interval (PHI\*) for Foliaf Applications

Стор	PHI* (Days)
*fobs	•4
Sugar Beets	* 4
1000	<del></del>

<sup>\*</sup>PHI > Pro Harvest Interval or the number of days between the last application and harvest

			والمدارية الأمداري والم
Sugar deets (	Wireworms	3-4 qts. per acre	Broadcast just before planting. Incorporate into soil 4-6 inches.
			Do not apply more than 4 qts. of this product to the soil, per season.
	Beet Leathoppers, Dipterous Leatmners, Aphids	ंग्रेब-1 pt. per acre	Apply as insects occur. Repeat application, as necessary, every 7 days. Do not make more than 5 applications per season. Do not apply within 14
			days of harvest.  Note: Diazinon will not control organophosphate-resistant leafminers.
	Grass- hoppers	1 pt. per acre	Apply as insects occur, Repeat application, as necessary, every 7 days. Do not make more than 5 applications per season.
			Do not apply within 14 days of harvest.

Note: Tops may be fed to beef and dairy animals.

#### **GRASSLAND INSECTS**

Ditch Banks, Roadsides, Wasteland, Noncrop Areas, Barrier Strips Grasshoppers: Spray 3/4-1 pt. per acre in water (minimum of 1 gallon of water per acre) for aerial applications or a minimum of 5 gallons of water per acre for ground applications or in oil (a minimum of 1 gallon of oil per acre) when insects first appear, preferably in the nymphal stage. Thorough coverage of the foliage is essential.

Do not graze or use treated grass for forage or feed.

### **INSECT CONTROL ON ORNAMENTALS**

To control certain insects on Arborvitae, Azalea, Birch, Boxwood, Camellia, Carnation, Chrysanthemum, Douglas Fir, Elm, Gladioli, Hawthorn, Holly, Juniper, Lilac, Locust, Maple, Oak, Pine, Ornamental Plum, Poplar, Rhododendron, Rose, Spruce, and Willow, apply the recommended rates indicated below. Try to spray underside of leaves and penetrate dense foliage.

Insects	Amount of DIAZINON AG500 to Use		
	Rate per 3 gations of water	Rate per 100 gallons of water	
Aphids, Bagworms, Carnation Bud Mites, Carnation Shoot Mites, Clover Mites, Cyclamen Mites, Dipterous Leafminers, European Pine Shoot Moths, European Red Mites, Flea Beetles, Holly Bud Moths, Leafhoppers, Obscure Root Weevils, Omniverous Leaftiers, Privet Mites, Scale Crawlers (Cottonycushion, Lecanium, Pine Needle, San Jose, Soft), Thrips, Twospotted Spider Mites, Juniper Webworms, Whitellies	1/2 ft. 02.*	1 pt,**	
Apple-and-Thorn Skeletonizers. Cotoneaster Webworms, Fall Webworms, Hemlock Chermes, Oak Loopers, Obliquebanded Leafrollers, Pear Slugs, Tent Caterbillars	11/2 1 OZ *	3 pts.**	

<sup>111</sup> oz = 2 tablespoons

Precaution: Do not use on Ferns, Poinsettia, Hibiscus, Papaya, Pilea, and Gardenia, since injury to the plants may occur. Mimosa Webworms: Mix  $49 \ ez$  in 3 gallons of water for 1 pt. in 100 gallons of water) and apply as a thorough foliar spray when adults first appear Mahn a second and third application at 4-5 week intervals.

<sup>15</sup> fl oz = 1 pint

**EPA REG. NO. 34704-41** 

LAWN PEST CONTROL

(EXCLUDING GOLFICE MASES AND

Precautions: Birds, et al.

treated areas may be a

this label. Because of the maps, ...,

not apply in Nassau County, New York between November 1 and May 20. Do not exceed maximum permitted label rates, since rates above those recommended significantly increase potential hazards to birds, especially waterfowl. Avoid overlapping sprays. If waterfowl, i.e., ducks or geese, can be expected to enter treated area after treatment (except spot treatments), water lawn with at least 0.25 inch water immediately after application, however, stop watering before puddling occurs.

To control pests listed below, apply recommended rates.

Peete	Rate/H	300 aq. ft.	Remarks
	CIAZINON AGSIN	Water	
Lawn Chinch Bugs	2-3 fl. oz.	3 gallons	Use higher rate for longer residual control and in lawns of dense growth such as St. Augustine lawns.
Ants, Armyworms, Bermudagrass Mites, Clover Mites, Crickets,	2-3 #. oz.	3 gallons	Spot spray ant hills and wasp ground nest openings.
Cutworms, Digger Wasps, Earwigs, Frit Flies, Lawn Billbugs, Leathoppers, Sod			For digger wasps, apply product at dusk when wasps are not active.
Webworms (Lawn Molhs), Sowbugs (Pillbugs), Springtails (Collembola)			For frit flies, mow grass and water well before treatment but delay application until grass is ory.
			For billbug control apply when activity is first observed or when chewed or brown grass is present, indicating damage from this insect.
Brown Dog Ticks, Chiggers, Fleas	3 fl. oz.	3 gai'ons	Note: Do not apply to animals.
			For brown dog ticks, spray grass and under shrubbery, particularly near house.
Hyperodes Weevils	3 fl. oz.	3 gallons	Treat problem areas in mid-April and again in mid-May.
Millipedes	3 fl. oz.	3 gallons	
Rhodesgrass Scales	3 fl. oz.	3 gallons	Apply when crawlers first emerge.
White Grubs (such as Japanese Beetle Larvae, European Chaler, Southern Chaler)	3 II. oz.	3 gallons	Apply any time between late July and early October.

#### **NUISANCE PESTS IN OUTSIDE AREAS**

Ants, Boxelder Bugs, Brown Dog Ticks, Chiggers, Clover Miles, Cockroaches, Crickets, Earwigs, Fleas, Flies, Millipedes, Sowbugs (Pillbugs), Spiders, Springtails (Collembola)

Mix 3 ff. oz. in 3 gallons of water and thoroughly spray window and door screens, sills, foundations, porch and patio walls, entranceways, walks, garbage cans, tree trunks, and into cracks and other places where insects can hide.

To prevent entry into houses, spray a five foot band of soil around the house next to the foundation and spray the foundation of the house to a height of 2-3 ft. Repeat application as necessary

Do not apply to animals. Do not treat plants (other than tree franks) at this nuisance rate.
