ALMONDS: Brown Rot, Shot Hole (Coryneum Blight) - Use 2 pounds per 100 gallons of water in prebloom, blossom and petal fall periods. An additional application should be made 5 weeks after petal fall using 2 pounds per 100 gallons of water. Scab - Use 2 pounds in 100 gallons of water. Apply at petal fall and at 5 weeks after petal fall. Do not use later than 5 weeks after petal fall.

APPLES: Scab - Use 1 to 1 1/2 pounds in 100 gallons of water in pre-blossom, blossom and early cover sprays. Do not apply within 7 days of harvest. Apples may be injured by zinc compounds under certain conditions. Bursary Rot (Oregon and Washington) - Use 1 1/2 to 2 pounds in 100 gallons of water beginning 12 to 14 days after the calyx stage and repeating as necessary in summer sprays. Perennial Canker (Oregon) - Use 1 to 1 1/2 pounds in 100 gallons of water in pre-blossom and calyx sprays.

APRICOTS: Shot Hole Fungus - Use 2 pounds per 100 gallons of water. Apply in pre-bloom, blossom and petal fall through early cover sprays.

BEANS (SNAP, LIMA): Anthracnose - Use 2 pounds per acre in sufficient water for thorough coverage when plants are small. Increase to 3 pounds per acre on large plants. Make applications at 7 day intervals starting when true leaves appear. Do not apply to snap beans later than 4 days before picking.

BLACKBERRIES: Evergreen Blackberry Canker (Pacific Northwest) - 1 1/2 to 2 pounds between mid-June and early July. Do not make more than 1 application.

BLUEBERRIES: Mummy Berry - 3 1/2 pounds at loose bud scale and 7 days later. No applications later than 3 weeks after full bloom. Use 200 gallons of spray per acre.

CELERY: Early Blight (Cercospora), Late Blight (Septoria) and Damping-Off - 1 1/2 to 2 pounds or 1 pound of Clean Crop ZIRAM plus 1 pound 95% Farnam Vertable Powder at weekly intervals beginning in the plant bed or at 3 to 5 day intervals during severe conditions. Remove residues by trimming and washing.

CHERRIES: Brown Rot Blossom Blight - Use 1 1/2 pounds per 100 gallons of water. Apply in pre-bloom, blossom and petal fall stages of growth. Leaf Spot - Use 1 1/2 pounds per 100 gallons of water. Apply in petal fall, shuck fall stage and approximately two weeks after shuck fall. Do not apply later than two weeks after shuck fall.

CUCUMBERS, MELONS, PUMPKINS, SQUASH: Downy Mildew, Alternaria Leaf Blight, Anthracnose, and Angular Leaf Spot - 1 1/2 to 2 pounds at 7 to 10 day intervals under conditions favorable to disease or at 3 to 5 day intervals when disease conditions are great. Increase rate to 3 pounds per 100 gallons of water per acre after plants vine.

NECTARINES: Peach Leaf Curl and Shot Hole - 1 1/2 to 3 1/4 pounds at dormant and popcorn stages. Fruit Brown Rot - 1 1/2 to 2 pounds at petal fall, 2 weeks later, and additional applications at 1 to 2 week intervals beginning near the beginning of last month before picking. Remove residues by wiping or brushing if applied during the last two weeks before picking.

ORNAMENTALS: Azaleas and Camellias (Petal Blight) - Begin at first bloom. Repeat at 7 to 10 day intervals through bloom. Spray towers and drench much and later beneath bushes. 1 1/2 to 2 pounds at 3 to 5 day intervals as required. Chrysanthemums and Snapdragons (Leaf Spot) - 1 1/2 to 2 pounds every 7 to 10 days or as required. Begin before disease is expected to appear or at first sign of disease.

PEACHES: Peach Blight (Coryneum) and Leaf Curl - Use 2 to 3 pounds in 100 gallons of water in the fall before heavy rains. For Leaf Curl alone, use 2 to 3 pounds in 100 gallons of water as a dormant application prior to bud swell. Brown Rot and Peach Blight (Coryneum) - Use 2 pounds in 100 gallons of water in pre-bloom, blossom and petal fall sprays. May be used in early cover and before harvest. Remove excess residue by wiping or washing.

PEARS: Scab - Use 1 to 1 1/2 pounds in 100 gallons of water in pre-blossom, blossom and early cover sprays. Do not apply within 7 days of harvest. Storage Rot (Oregon) - Use 1 to 1 1/2 pounds in 100 gallons of water as pre-harvest sprays.

PECANS: Scab - 2 pounds four times at 21 to 28 day intervals when tips of small nuts become brown. A fifth application in August may be required when danger of disease is great.

PINE SEEDLINGS: Fusiform Rust in Plant Beds - 2 pounds at 3 to 5 day intervals from emergence to mid-June.

STRAWBERRIES: Leaf Spot - 1 1/2 to 2 pounds when blossom bud shows and repeat when first blossoms open. Gray Mold (Botrytis) - 1 1/2 to 2 pounds at 10 day intervals, starting at early blossom stage and making 3 to 5 sprayings. Remove residues by washing if sprayed as late as 7 days before picking.

TOMATOES: Anthracnose, Early Blight - Use 2 to 3 pounds per 100 gallons of water per acre at 7 to 10 day intervals starting 2 to 4 weeks after plants are set. Under severe disease conditions apply 3 pounds in 180 to 200 gallons per acre at 7 day intervals. Late Blight - Alternate 1 1/2 to 2 pounds with maneb at weekly intervals. Begin application when first fruit forms.

GREENHOUSE TOMATOES: Gray Mold - 1 1/2 to 2 pounds weekly or twice weekly under severe conditions.
