### USE PRECAUTION

Some plants are susceptible to injury from sulfur under certain climatic conditions. The user is advised not to use sulfur on any crop unless local use has proven that sulfur is safe in that locality. During periods of high temperature, sulfur may burn foliage and fruit. Do not make sulfur applications at excessively high temperatures. Do not use SULFUR 6 FLOWABLE with oil or within 4 weeks of an oil application unless applied with a dormant oil to winter-dormant woody plants.

### DIRECTIONS FOR MIXING Before Using, Stir Until Smooth

Pour recommended amount in partially filled spray tank. Keep agitator running during filling and spraying operation. **DO NOT ALLOW MIXTURE TO STAND.** Failure to maintain agitation will cause SULFUR 6 FLOWABLE to settle and may necessitate manual stirring to redispense.

The strong adhesive properties of SULFUR 6 FLOWABLE act as a sticker on the plant, and the sticking characteristic necessitates the flushing of equipment with water after each day's use. Sulfur in any form is corrosive material. **TO REDUCE THE EFFECT, EQUIPMENT SHOULD BE FLUSHED DAILY.**

### RECOMMENDATIONS

Use of this material in a manner other than in accordance with this label may cause serious plant, crop, or personal injury, excessive residues, unsatisfactory control or other unintended consequences.
