MALATHION METHOXYCHLOR SPRAY

ACTIVE INGREDIENTS: BY	WEIGHT
Methaxychior: 1,1,1-trichloro-2,	
2-ble(p-methoxyphenyl) ethane	. 24.0%
Maisthion: O,O-dimethyl phosphorodithicate	
of diethyl mercaptoeuccinete	
MERT INGREDIENTS: **	. 52.6%
TOTAL	100.0%
**Contains xylene range aromatics.	
(Contains 2 lbs. Maisthion and 2 lbs. Methoxychior per g	alion)

KEEP OUT OF REACH OF CHILDREN CAUTION

See Below for Additional Precautionary Statements NET CONTENTS 21/2 GALLONS

EPA REG. NO. 34704-205 EPA EST. 34704-CO-3

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if swallowed. Avoid contact with skin. Avoid L nathing spray mist.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish, aquatic invertebrates, and aquatic life stages of amphibians. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

PHYSICAL HAZARDS

Do not use or store near heat or open flame.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching the back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

If Inhaled: Remove victim to fresh air. Apply artificial respiration if indicated.

If On Skin: Remove contaminated clothing and wash affected areas with plenty of soap and water.

If in Eyes: Flush with plenty of water. Call a physician if irritation persists. Note to Physician: This product may cause cholinesterase inhibition. Atropine is antidotal. 2-PAM may be effective as an adjunct to atropine.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

Apply MALATHION METHOXYCHLOR SPRAY at recommended rates with ground or serial equipment to thoroughly cover foliage and fruit. Mix MALATHION METHOXYCHLOR SPRAY in water using the appropriate volume of water for equipment to be used (for example, 3 to 20 gallons of water per scree for aircraft or ground concentrate sprayers and greater amounts for high volume sprayers).

Begin application at first sign of infectation (for fruits, begin at petal fell unless otherwise specified) and repeat at 7-14 day intervals or as

needed. Do not apply within the number of days to harvest as indicated in () immediately following each crop.

REENTRY STATEMENT

Do not enter or allow entry into treated areas until sprays have dried to perform hand labor tasks. A person may enter the area to perform other tasks only if the person is wearing the personal protective equipment listed on the label for a pesticide handler.

Do not apply this product in a way that will contact unprotected workers, either directly or through drift. Only protected handlers wearing long pants, long sleeved shirts, socks, shoes and chemical resistant gloves may be in the area during application.

Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information. The area being treated must be vacated by unprotected persons.

Written or oral warnings must be given to workers who are expected to be in a freetaid area or in an area about to be treated with this product. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Written or oral warnings must include the following information:

CAUTION

(Insert area or field description) treated with Malathion, Methoxychlor on (insert date of application.) Do not enter treated areas without protective clothing until sprays have dried. In case of accidental exposure: Call a doctor (physician), clinic or hospital immediately. Exposin that the victim has been exposed to Malathion, Methoxychlor and describe his condition.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed by storage or disposal. Do not store under conditions which might adversely affect the container or its ability to function properly.

STORAGE: Store in sale manner. Store in original container only. Keep container tightly closed when not in use. Reduce stacking height where local conditions can affect package strength. Do not store below temperature of 32° F. Personnel should use clothing and equipment consistent with good pesticide handling.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Metal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. Plastic: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burnings if burned, stay out of smoke.

RECOMMENDATIONS FOR USE

ALFALFA (7), CLOVER (7): To control Atalta, Caterpillers, Altalta Waeville (Larvae), Fall Armyworms, Flee Beetles, Japanese Beetles, Leafnoppers, Lygus Bugs, Spittle-Bugs, apply at rate of 2-3 Ots./acre. Mails full coverage confication on foliage. Repeat as infestations warrant. Openet treat doing bloom.

BEANS (Dry & Succulent) (3): Use 21/2 Ots./A for Aphide, Cucumber Beetles, Markican Bean Beetle and Potato Leafhir:per. Use 3 Ots./A for Flee Beetles, Japanese Beetles and Corn Earworm. Do not graze os feed treated cowpe

BEETS (Garden & Table) (7) (14 if top: are used as tood or feed): Use 3 Ots./A for Blister Beetles and Flee Brunes.

SLACKBERRY (14), BOYSENBERRY (14), DEWBERRY (14), LOĞAÑ-BERRY (14), RASPBERRY (14), Use 31/z Cla./A on foliage as needed to control Aphids, Japanese Beetle, Rose Chater, Rose Leethopper, Rose

MALATHION METHOXYCHLOR SPRAY

EPA REG. NO. 34704-205

Scale and Strawberry Weevil.

BLUEBERRY (3): Cherry Fruitworm—Use 1 Qt./A. Three applications at 10 day intervals beginning just after petal fell. Jepanese Beetle—Use 2

BROCCOLI (14), BRUSSELS SPROUTS (14), CABBAGE (7), CAULI-FLOWER (7), KALE (14), & KOHLRABI (7): Use 21/2 Qts./A for Aphids and Flee Beetles. For Diamond Back Caterpillars, Cabbage Looper & Cross-Striped Cabbage Worm spray on foliage every 7 days, beginning when insects appear.

CUCUMBERS (1): Use 31/a Pts./A to control Spider mites. Use 31/a Qts./ A for Cucumber Beetles and Aphids.

CHERRIES (Sweet & Tart) (7): Black Cherry Aphid---Use 1 Qt/100 gale. dilute spray when aphids appear about time buds are breaking, and 10-14 days later, or in summer. Lesser Peach Tree Borer—Use 2 Qts./100 gals. dilute apray to trunks and scaffold limbs four times at 3-week intervals, beginning with emergence in June. Cherry Fruitworm—Use 2 Ots/100 gals. dilute spray four weeks after petal fall. Cherry & Black Cherry Fruit Flies—Use 21/2 Pts/100 gals. dilute spray. Begin all treatments when first flies are trapped. Japanese Beetle—Use 1 Qt/100 gals. dilute spray. Plum Curculio—Use 3 Qts/100 gals. dilute spray. Petal fall and once or twice more 7-10 days apart. Rose Chafer-Use 2 Ots/100 gals, dilute spray when insect is present. San Jose & Forbes Scales-Use 2-21/2 Pts/100 gals, dilute spray three weeks before & immediately

CURRANT (14), & GOOSEBERRY (14): Currant Aphid-Use 4 Qts./A as leaf buds are opening or later if infestation occurs. Imported Currantworm—Use 4 Qts./A when worms appear,

EGGPLANT (7): Use 31/2 Qts./A for Aphida. Use 21/2 Qts./A for Eggplant Lace Bug and Spider Miles.

GRAPES (14): European Fruit Lecanium-Use 39/4 Pts./A when newly hatched nymphs are migrating over vines, usually shortly after bloom. Grape Berry Moth—Use 2 Qts./A at petal fall. 7-14 days later, when second brood eggs are found (35-45 days after bloom) and 14 days later. Grape Mealybug—Use 39/4 Pts./A when overwintered nymphs move out from under bank to base of buds or onto grape clusters (just before or after bloom); repeat in 10 days if needed. Japanese Beetles—Use 1 Qt./ A Rose Chafer—Use 2 Qts/A when adults first appear, usually near bloom of Concord grapes. Two spotted Spider Mite-Use 1 Qt./A when miles first appear, and 7 days later if infectation is heavy. CAUTION: May injure the Ribler, Italia, Cardinal & Almeria varieties if applied after clusters access.

LETTUCE (Head & Leaf) (14): Use 2-4 Qts./A to control Aphids, Use 21/2 Ots/A for Leefhoppers, Diamond Back Caterpillars and Cross-striped Cabbace Worm.

PEACHES (21) & APRICOTS (21): Green Peach, Black Cherry, Black Peach, & Rusty Plum Aphids—Use 1 Qt./100 gals, dilute spray early in season when aphide appear. Lesser Peach Tree Borer-Use 2 Qts./100 gals. dilute spray. See Cherry directions, begin in May. Japanese Beetles—Use 1 Ot./100 gals. dilute spray when beetles appear; repeat after 10-14 days if needed. Plum Curculio—2-3 Pts./100 gals. dilute spray 3-4 times, 7-10 days apart, beginning at shuck-off.

PEAS (7): Use 2-21/z Qt./A for Aphids. For Pea Weevil use same dosage and spray foliage during early bloom period before eggs are laid. Do not graze or feed treated pea vines or pea hay to livestock.

PEPPERS (3): Use 3 Ots/A for Flee Beetles and Pepper Maggot & Aphide

POTATOES (0): Use 1-2 Qts./A for Leafhoppers when they first appear; repeat every 10 days as needed.

RUTABAGA (7), TURNIPS (7) (14 if tops are to be used as food or feed): Use 21/2 Qts./A for aphids and Diamond Back Caterpillars. Use 3 Qts./A for Flee Beetles

SPINACH (10): Use 21/2 Qts./A for Alfalfa Looper, Aphids and Beet Webworm.

SQUASH (1): Use 31/2 Qts./A for Aphids, Cucumber Beetle and Putato

STRAWBERRY (3): Use 2-4 Qts./A on foliage as needed to control Field Cricket, Lygue Buge, Spittlebuge & Thrips. Use 2-31/z Ots./A on foliage as needed to control Flex Beetles, Strawberry Leaf Beetle, Strawberry Weevil. Use 2-3 Qts./A on foliage as needed to control Potato Leathoppers, Strawberry Leaf Roller, Strawberry Root Weevil and Whiteflies. Use 31/z Qts./A on foliage as needed to control Aphids. CAUTION: dosages above 31/z Qts./A should not be applied within 14 days of hervest.

SWEET CORN (7): Use 2 Qts./A for Japanese Beetle. Spray on silks and

TOMATOES (5); Use 21/2 Qts./A for Aphide and Spider Mites, Use 31/2 Qts:/A for Blister Beetles and 4 Qts:/A for Drosophile

FLOWERS & ORNAMENTAL SHRUBS: Oyster Shell Scale & Euronymus Scale—Use 21/z Pts./A Aphide, Spider Mites, White Fly, Thrips, Meely Bugs, Japanese Beer'e Adult, Four Lined Plant Bug, Tarnished Plant Bug, Rose Leefhopper, Poteto Leefhopper—Use 39/4 Pts /A. Beg-worms, Juniper Scale—Use 21/2 Ots./A. Soft Brown Scale—Use 51/4 Pts./A Pine Needle Scale—Us > 5 Ots./A. Apply in summer when intesta-tion occurs. Repeat in 10-12 days. For scales, apply when crawters have

settled on follage. CAUTION: Do not use on certain ferns, including Boston Meldenheir and Pteris, as well as some species of Crassula, because of possible injury to these ornamentals. Do not apray privet or vibernum and avoid repeated applications to evergreens. Do not apray when temperatures are abnormally high.

ORNAMENTAL SHADE TREE INSECTS: To control May Beetle, Lace Bugs on Oak and Sycamore, Tuesock Moth, Fall Webworm, Jepanese Beetle, Forest Tent Ceterpiller, Eastern Tent Ceterpiller, Gypsy Moth, Elm Leaf Bestle and Cankerworms on & ade trees, use 1-2 Qts. per 100 gals. dilute spray in conventional sprayers. When using a mist blower, dilute one part Spray to 3 parts water using approximately 1-2 Pts. per 35-50 foot tree. CAUTION: Chinese Elms may be injured by toliar sprays of high dosage sprays when applied with conventional spraying equipment, especially under conditions of drought and high temperature, Do not spray when temperatures are abnormally high. Avoid repeated applications to measures. tions to evergreens.

MOSQUITO CONTROL

MALATHION METHOXYCHLOR SPRAY is effective in the control of Mosquitoss, both Adult and Larva on non-Agricultural land and may be applied as a fog or mist from suitable equipment. Remove motor vehicles from spray area or wash immediately after spraying. Spray may damage paint finish.

ADULT MOSQUITOES

THERMAL FOG EQUIPMENT: Thermal fogging is more effective in early morning and late evening. Application time for control of adult mosqui-toes should coincide with time of most activity of the mosquito. Avoid thermal fogging when winds exceed 5 miles per hour as effectiveness is reduced.

	Fuel OII	MALATHION METHORY- CHLOR SPRAY	Concen- tration	Aco Pale
For 100 gads. of Spray Solution	96.5 gals.	3.5 gals.	1%	0.5 lb. actual per acre
For 5 gals. of Spray Solution	4 gals, plus 7 pints	1 pint	1%	0.5 lbs. actual per acro

Note: 5-7 gals, of Thermal Fog Spray solution should cover 1 acre.

SPRAYING EQUIPMENT: Mist blowers or Sprayers require mixing of the MALATHION METHOXYCHLOR SPRAY in water solution and applying as a mist to areas frequented by Adult Mosquitoss.

	Water	MALATHON METHORY- CHLOR SPRAY	Concen- tration	Acro Rate
For 160 gale. of Spray Schelon	96 gain.	4 gais.	1%	0.5 lbs. actual per acre
For 5 gale. of Spray Solution	4 gals, plus 7 pints	1.5 punts	196	0.5 lbs. actual per acre

Note: 5 to 7 gals, of spray solution should cover 1 acre.

AIRCRAFT SPRAYING: Over large land areas. For low volume spraying mix 1 gal, of MALATHION METHOXYCHLOR in 15 gals, of light fuel oil or cosolvent (such as Exxon HAN, Sinclair 110, etc.) and apply approx. 4 gals, per acre.

MOSQUITO LARVAE

On non-agricultural land, beaches and other public park are

SPRAYING: Mist blowers or Power Spreyer. Mix 1 pt. of MALATHION METHOXYCHLOR SPRAY in either light fuel oil or water to make 10 gals. of spray and apply to 1 acre (equivalent to 1 gal. per 100 gals.). Spray marshland, swamps and low lying areas, standing water and puddles. Thorough even coverage is essential for effective control. Application rate should be equivalent to 0.2 lbs. actual per acre sprayed. Repeat as necessary for control. Apply only to known Mosquito Breeding sites and in Approved Spray are:

Shrimp and Crab may be killed at application rates recommended diffilis label. Do not apply where these are important resources.

WARRANTY

PLATTE WARRANTS THAT THIS PRODUCT CONFORMS TO THE CHEMI-CAL DESCRIPTION ON THE LABEL THEREOF AND IS REASONABLY FIT CAL DESCRIPTION ON THE LABEL THEREOF AND IS REASONABLY FIT FOR THE PURPOSES STATED ON SUCH LABEL ONLY WHEN USED IN ACCORDANCE WITH THE DIRECTIONS UNDER NORMAL USE COLUMN TIONS, IT IS IMPOSSIBLE TO ELIMINATE ALL RISKS INHERENTLY ASSOCIATED WITH THE USE OF THE PRODUCT. CROP INJURY, I REFFECTIVENESS, OR OTHER UNINTENDED CONSEQUENCES MAY HESULT BECAUSE OF SUCH FACTORS AS WEATHER COMMITTENS, PRESENCE OF OTHER MATERIALS, OR THE MANNER OF USE OR APPLICATION, ALL OF WHICH ARE BEYOND THE CONTROL OF PLATTE. IN NO CASE SHALL PLATTE BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR CASE SHALL PLAITE BE LIABLE FOR CONSEQUENTIAL, SPECIAL MINDRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. ALL SUCH RISKS SHALL BE ASSUMED BY THE BOYER. PLAITE MAKES NO WARRANTIES OF MERCHANTABILITY OR RITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR METERS. WARRANTY EXCEPT AS STATED ABOVE.
