

CLEAN CROP<sup>®</sup>  
DIPEL<sup>®</sup> 10G  
BIOLOGICAL INSECTICIDE

For Control of European Corn Borer  
Larvae on Corn and Tobacco Budworm on Tobacco

ACTIVE INGREDIENT:

Bacillus thuringiensis, var. kurstaki,

1600 International Units of Potency per mg.\*..... 0.32%

INERT INGREDIENTS: ..... 99.68%

TOTAL ..... 100.00%

\*This product contains 0.726 Billion IU/lb.

KEEP OUT OF THE REACH OF CHILDREN (12 pt.)

CAUTION (18 pt.)

EPA REG. NO. 34704-254

EPA EST. NO.

NET WEIGHT \_\_\_\_ LBS.

<sup>®</sup>CLEAN CROP is a Registered T.M. of United Agri Products, Inc.

<sup>®</sup>DIPEL is a Registered T.M. of Abbott Laboratories.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

CAUTION

Avoid inhalation or contact with eyes.

ENVIRONMENTAL HAZARDS

Keep out of lakes, ponds, or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

RE-ENTRY STATEMENT

Do not enter treated areas without protective clothing until dusts have settled. Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information. Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons. Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Written or oral warnings must include the following information:

#### CAUTION

(Insert area or field description) treated with Bacillus thuringiensis on (insert date of application.) In case of accidental exposure: Call a doctor (physician), clinic or hospital immediately. Explain that the victim has been exposed to Bacillus thuringiensis and describe his condition. For further information see the "PRECAUTIONARY STATEMENTS" portion of the pesticide label. Do not enter treated areas without protective clothing until dusts have settled. Oral warnings must include the same information that is in the written warnings.

#### GENERAL INFORMATION

Dipel 10G is a granular formulation of Bacillus thuringiensis, variety Kurstaki, designed specifically as a selective insecticide for control of European Corn Borer and Tobacco Budworm. For practical determinations of active ingredient, Dipel 10G can be expressed as a 10% formula of Dipel WP. The active ingredient in Dipel 10G is a stomach poison and therefore must be eaten by larvae to be effective. Climatic extremes such as heavy rain or strong wind shortly after treatment may act to remove Dipel 10G from the feeding zone making re-treatment necessary.

#### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.  
**PROHIBITIONS:** Do not store under conditions which might adversely affect the container or its ability to function properly. Such conditions include, but are not limited to, positioning of the container in storage, storage temperature, potential for crushing or damage due to stacking, and penetration of moisture.

**STORAGE:** Store in a cool, dry place.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product which cannot be disposed of by use according to label instructions must be disposed of at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

APPLICATION

Crop	Pest	Rate	Comments
Seed Corn, Field Corn, Popcorn, and Sweet Corn	European Corn Borer ( <i>Ostrinia nubilalis</i> ), First and Second Generation	10 lbs./acre	Ground or aerial equipment First Generation: Apply Dipel 106 directly to corn whorls. Treat seed corn when 25 percent of plants show shot hole feeding in the whorls and field corn when 35 percent of whorls show feeding. Larvae should be small and present at this time. Satisfactory control cannot be ex- pected if treatment is delayed to higher injury levels or after larvae have begun stalk boring. Second Generation: Apply Dipel 106 when a field count shows 100 egg masses per 100 plants and the first hatch is occurring. Under conditions of intensive population pressure, a second application may be necessary.
Tobacco	Tobacco Budworm ( <i>Heliothis virescens</i> )	5-10 lbs/acre	Ground Equipment Apply Dipel 106 by hand or properly calibrated mechanical ground equipment.
