UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

WASHINGTON, D.C. 20460

MAR 1 5 1996

CFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBCTANCES

5491500

Mr. J. Allen Dunlap III Registration Manager Platte Chemical Co. P.O. Box 667 Greeley, CO 80632

Dear Mr. Dunlap:

Subject: Revised Cotton Use Directions Clean Crop Phorate 20G EPA Registration No. 34704-259 Your Application Dated July 25, 1995

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable, and a stamped copy is enclosed for your records.

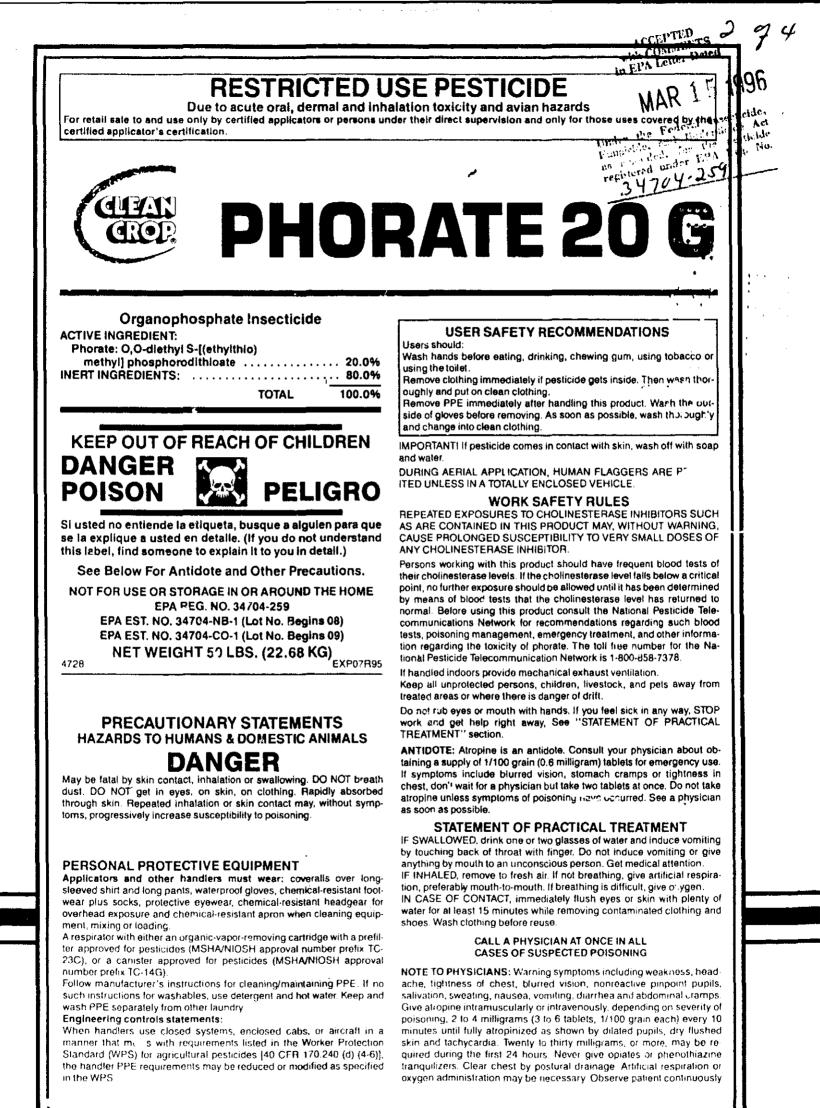

It is understood that the word "POISON" appears in red on a contrasting background.

Sincerely yours,

mam

Robert A. Forrest Product Manager (14) Insecticide-Rodenticide Branch Registration Division (7504C)

# PHORATE 20 G

### EPA REG. NO. 34704-259

for at least 48 hours. Allow no further exposure to any cholinesterase inhibitor until cholinesterase regeneration has taken place as determined by blood tests.

Pralidoxime chloride (2-PAM; PROTOPAM chloride) may be effective as an adjunct to atropine. Use according to label directions.

#### **ENVIRONMENTAL HAZARDS**

This pesticide is extremely toxic to fish and wildlife. Birds feeding in treated areas may be killed. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Collect or incorporate granules that are spilled during loading or are visible on soil surface in turn areas. Do not contaminate water when disposing of equipment washwaters.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

IMPORTANTI Read precautionary statements before using this product.

PHORATE 20 G should be applied with a granular pesticide applicator properly calibrated to assure accurate placement and proper dosage.

No not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

#### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard ard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours.

Each 48 hour REI is increased to 72 hours in outdoor areas where average rainfall is less than 25 inches a year.

Exception: if the product is soil-injected or soil incorporated, the Worker Protection Stanc d, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls over

Row Spacing

long-sleeved shirt and long pants, waterproof gloves, chemicalresistant footwear plus socks, protective eyewear and chemicalresistant headgear for overhead exposure. 4

9

and an an exercise of the

Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.

## STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container. Do not store under conditions which might adversely affect the container or its ability to function properly. Such conditions include, but are not limited to, positioning of the container in storage, storage temperature, potential for crushing or damage due to stacking, and penetrating of moisture.

STORAGE: Store in safe manner. Store in original container only: Store in cool, dry place. Keep container tightly closed when not in use. Once a bag has been opened, use it completely. Reduce stacking height where local conditions, such as humidity or pallet overhang, can affect package strength. Personnel should use clothing and equipmen. listed under "PRECAUTIONARY STATEMENT" when handling open con-

tainers. SPILLED MATERIAL, block to prevent spreading of spill. Scoop and sweep into a disposable container, whether it occurs indoors; or in the field.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

#### NOTICE

PLATTE WARRANTS THAT THIS PRODUCT CONFORMS TO THE CHEMI-CAL DESCRIPTION ON THE LABEL THEREOF AND IS REASONABLY FIT FOR THE PURPOSES STATED ON SUCH LABEL ONLY WHEN USED IN ACCORDANCE WITH THE DIRECTIONS UNDER NORMAL USE CONDI-TIONS. IT IS IMPOSSIBLE TO ELIMINATE ALL RISKS INHERENTLY ASSO-CIATED WITH THE USE OF THIS PRODUCT. CROP INJURY, INEFFECTIVENESS, OR OTHER UNINTENDED CONSEQUENCES MAY RESULT BECAUSE OF SUCH FACTORS AS WEATHER CONDITIONS, PRESENCE OF OTHER MATERIALS, OR THE MANNER OF USE OR APPLI-CATION, ALL OF WHICH ARE BEYOND THE CONTROL OF PLATTE. IN NO CASE SHALL PLATTE BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. ALL SUCH RISKS SHALL BE ASSUMED BY THE BUYER. EXCEPT AS EXPRESSLY PROVIDED HEREIN, PLATTE MAKES NO WAR RANTIES, GUARANTEES, OR REPRESENTATIONS OF ANY KIND, EITHER EXPRESSED OR IMPLIED, OR BY USAGE OF TRADE, STATUTORY OR OTHERWISE, WITH REGARD TO THE PRODUCT SOLD, INCLUDING, BUT NOT LIMITED TO, MERCHANTABILITY, FITNESS FOR A PARTICULAR PUR-POSE, USE OR ELIGIBILITY OF THE PRODUCT FOR ANY PARTICULAR TRADE USAGE. BUYER'S OR USER'S EXCLUSIVE REMEDY, AND PLATTE'S TOTAL LIABILITY, SHALL BE FOR DAMAGES NOT EXCEEDING THE COST OF THE PRODUCT.

## **RECOMMENDATIONS FOR USE**

Crop	Controlled	Rate PHORATE 20 G	Application	Remarks			
BEANS	Mexican Bean Section	41/2 to 93/4 ozs. per 1000 ft of row for	Distribute the granutes evenly in the row to the side of				
	Lesthoppers, Aphids, Ly- gus Bugs, Thrips, Mites	any spacing (minimum 30-inch spac- ing) 41/2 to 7 ozs. per 1000 ft. of row for any row spacing (minimum 30-inch spac-	the seed at planting time. Do not place PHORATE 20 G granules in direct contact with the seed.	of treatmont.			
FIELD CORN. Applications at Planting Time	and Seedcorn Maggots Corn Rostworms, Mites, Seed Corn Beelle (lowa and Itinois Only), Reduc- tion of Wireworms (North Central and Southeastern	ing) 8 ozs. per 1000 ft of row for any row spacing (minimum 30-mch row spac- ing)	Place granules in a 7-inch bend over the row directly behind the planter shos in front of the press wheel.	Do not place PHORATE 20 G granules : a diffect contact with seed. One additional application can be styrter for cultivation OR over corn later in the season.			
Application at Cultiva- lion	States only)		Apply granules at time of cutivation in a band at base of plants just ahead of cutivation showed so as to cover granules with soil. Apply in June as soon as Root- worms activity is observed.	Do not make any later spokestions after cultivision treatment.			
FIELD CORN: Application Over the Plant	European Corn Borer (1st brood) Corn Rootworms	5 lbs. per acre	Apply granules into the whort of the plant prior to lassel umergence by ground or air equipment. Apply granules into the whort of the plant by ground or air equipment.	Do not graze or cut for forage within 30 day r <sup>+</sup> tress- ment. Do not make more than one application over plant. Do not apply under prolonged drc upt con 't- tions. Consult your state experiment stat 3. c <sup>-</sup> . tr 'e			
SWEET CORN: Application at Planting Time	Corn Rootworms, Mites. Seed Corn Beetle (lows & Illinois only), Reduction of Wireworms (North Centrel and Southeastern States only.)	6 ozs. per 1000 ft. of row for an/ row spacing (minimum 30-inch row	Place granules in z 7-inch band over the row directly behind the planter the in front of the press wheel.	extension service for proper terring of appl cation. Do not place PHORATE 20 G granules in direct contact with seed. One additional treatment can be make at cuttivistion.			
Application at Cultiva- tion			pply granules at time of cultivation in a band at base of plants just ahead of cultivator shovels so as to cover cules with soil. Apply in June as soon as rootworm artitrity is observi 3.	Do not make any later applications after "with stip- treatment.			
COFTON: Al Planting Time	Early season Thrips, Aphids, Mites & Leaf Min- ers	3 ozs. per 1000 ft. of row tr any row specing (minimum 30-inch 42 ang or no more than 3.3 lbs./A.)	D. Tbute the gr., ules evenly in the furrow at planning time. Soil temperature, moisture and titth should be favorable for good germination and emergence.	Suggested for areas where a limited period of protec- tion against early season peets is necessary for good cotton growth. Use 2 lbs. PHOPATE 20 G per acre for hill-dropped cotton. Do not leed treated hey or forage to livestock.			
	Mites, Thrips, Aphids, Black Cutworms, Lesthop- pers, White Files and Leaf Miners.	8 to 9 ozs per 1000 ft. of row for any row specing (minimum 36 inch spec- ing or no more than 8.2 be.A.) 6 to 7.5 oz per 1000 ft, of row for 30- inch row specing or no more than 8.2 be.A.	Distribute the granules evenly in the furrow at planting time. Soil temperature, moletaner and tith should be fevorable for good germination and emergence. Under advarse conditions plant stand may be affected.	Recommended for areas requiring an extended period of mile control as well as early season protection against other cotion pests. The higher rate is any gested for heavier soil. Do not feed treated hay or forsge to livestock.			
COTTON: At Side-Dressing Time (Irrigated cotion only)	Miles from spring to early summer	9 to 12 ozs. per 1000 ft. of row for any row spacing (minimum 36 inch spec- ing or no more than 10 9 lbs/A) 9 to 10 oz per 1000 ft. of row for 30-inch row spacing or no more than 10.9 lbs/ A.	Incorporate granules into soll as a side-dress applica- tion deep enough to avoid disturbance by future cutti- vations.	irrigate as soon as possible after treatment. Do not apply later than 60 days before harvest. Do not feed treated hay or lorage to investock.			
PEANUTS: At Planting Time	Thrips, Leafhoppers	51/s ozs. per 1000 lt. of row lor any row spacing (minimum 24-inch spacing)	Distribute the granules evenly in the furrow at planting time. For best results, plant peanuts when soil temper- atures are favorable for establishing goori , eanut stands.				
Al Pagging Time	Southern Corn Rootworms and Leathoppers	11 oz. per 1000 ft. of row for any row specing (minimum 24-inch specing)	Distribute the granules as a band over the fruiting zone at pagging time. Work into the top few inches of soli immediately.	This treatment will also control late infestations of leaf- hoppers. Do not graze or lead treated hey or forage to livestock.			
POTATOES.	Aphids, Leafhoppers, Leaf Miners, Paytids, Flea Bee- tie Larvae and reduction of Flea Beetle Aduits.	LIGHT OR SANDY SCILS: 111/r ozs. per 1000 ft. of row for any row spacing (minimum 32-inch ar scing) HEAVY OR CLAY SOILS: 17 in iteration ft. of row for any row specing (mini- aum 32-inch specing)	Distribute the granules evenly in the furrow or granules may be banded on each side of the row at planning time.	Wall B0 days after treatment before harvesting pota toes.			
	Colorado Potato Bestle (sarty season control)	HEAVY OR CLAY SOILS: 171/4 ozs. per 1000 ft. of row for any row spacing (minimum 32-inch spacing)					
SORGHUM. Al Planting Time	Aphids (Greenbugs)	6 ozs. per 1000 ft. of row for any row spacing (minimum 30-inch spacing)	Place granules 2 inches to side and 1 inch below the seed at planting or as a 7-inch band over the row just prior to press wheel.	Do not place PHORATE 20 G granules in direct contact with seed. A second application of granules may be applied topically later in the secon.			
Alt if Plant Emergence	Aphids (Greenbugs) Banks Grass Mites (excluding Trans-Pecce area of Texas)	47/e lbs. per acre	Broadcast granules into the whorts of the plants by air or ground equipment	Make only one application after plant emergence. Do not noply within 28 days of hervest.			
SOYBEANS.	For the early season control of Maxican bean beate and leafhoppers	9 ozs. per 1000 lt ol row for any row specing (minimum 30-inch row spec- ing)	Dist sould the granules evenly in the row to the side of the seed at plenting time.	Do not lead this follage of sealed acytowns: Crop Injury may result when preplant incorporated or preemer- gence applications of metribucin harblackses or other soll-applied organophosphate pesticides are used in conjunction with this product.			
	Seedcorn maggots	9 ozs. per 1000 ft of row for any row specing (minimum 30-inch row spec- ing)	Distribute the granules evenly in the row to the side of the seed at planting time, or place granules in a $\mathcal{T}$ band over the row directly behind the planter shoe in front of the press wheel				
SUGAR BEETS.	Aphids, Beet Root Mag- gots, Leafhoppers, Mites, Leaf Miners	41/2 ozs. per 1000 ft of row for any row spacing (minimum 20-inches spacing)	Application should be made by dvilling or broadcast al seeding time	Do not place PHORATE 20 G granules in direct contact with the seed. Do not apply within 30 days of harvest Do not lead sugar best top or siteps to dary cattle. Consult your state experiment station or state exten- sion service for proper timing of application in your area.			
	Aphids, Mites	47/8 to 71/2 lbs. per acre	Apply to foliage when plants are dry. Use the higher rate to dense foliage for good coverage. Foliar applica- tion by air may be used for aphd control when wel soil prohibits ground application.				
SUGAR CANE Florida)	Wireworine	191/2 Ris. per acre	Apply in a 10 to 12 inch band directly on the seed piece and surrounding soil in the open furrow immediately before covering	Do not graze or feed treated hay or forage to investock			
WHEAT Application at Planking Fime	Grasshoppers, Aphids (Western and North Cen- tral States only) Hessian Fly	1.2 oz per 1000 h of row for any row specing (minimum 8 inch specing)	Apply the granules in the seed furrow at planting time	Do not feed or graze foliage within 45 days of treat- ment Do not make any later applications after planting time treatment			
Application Over the Plant	)	47/8 lbs peracre	Broadcast the granules evenly over the field by air equipment when aphids first appear	Do not apply over plants if application was made at planting time Do not make wore than cine application over the plants. Do not apply within 70 days of herves of grain Do not feed or graze bilage within 28 days of
