DIRECTIONS

This product should be applied as a coarse (large droplet) spray-in spot treatment of localized surface areas only.

Hoaches and Waterbugs Remove all dishes, food and utensils from the area to be sprayed. Make spot applications to infested roach haunts — behind sinks, into cracks and crevices, the underside of all drawer2, baseboards, pipeholes in walls, and cracks of kitchen cupboards. Inspect and treat other areas in the house where infestation is evident. Pay particular attention to bathrooms, cracks and crevices in closets, dresser drawers and frames.

Ants Spiders Silverlish, Crickets Earwigs, Firebrats, Centipedes, Millipedes, Scwbugs and Springtalls. Spray areas where these pests are found or may hide including dark corners of rooms and closets, cracks and crevices, along baseboards and door sills and frames, behind and beneath sinks, stoves, refrigerators, and cabinets, and around garbage cans, plumbing and other utility installations. Pests driven out of hiding places should be sprayed directly. Spray ant trails, nests, and points of entry. Repeat treatment as required.

right Bertles Make localized application to areas of the floor and baseboards Spray directly into cracks and under carpets where insects may be found. Treat crevices, cracks and infested areas of shelving in closets Repeat as necessary.

or An Dog Ticks. Spray infested areas around baseboards, window and door frames, wall cracks, sleeping quarters of pets and localized areas of floors and floor coverings. Repeat as necessary. Bedding should be replaced in animal quarters after treatment. Do not treat animals.

THE MORQUIDES and Clover Mittes. Use only on outdoor surfaces, Spray outside surfaces of windows and door frames and other areas where pests may enter the home. Flies and mosquitoes coming to rest on treated surfaces will be killed. Repeat treatment when effectiveness diminishes.
