28 Gallons

SUMMER QUIK MIX LIGHT MEDIUM

DIRECTIONS FOR MIXING

Use only in equipment with mechanical or paddle agitation. Be sure spray tank is clean. With enough water in tank to cover agitator shaft add desired amount of this material to the tank with agitator in motion. Pump this mixture through the overflow and back into tank for about two minutes. If this mixture turns white, it indicates good emulsification. Test a small amount of Summer Quik Mix Light Medium with the proposed water supply to ensure satisfactory emulsification. If this mixture turns white, it indicates good emulsification. DO NOT USE IF MATERIAL DOES NOT EMULSIFY. Fill the tank with water, adding other desired materials as tank is filling. Keep agitator running at all times.

DIRECTIONS FOR USE

Apply when pests first appear and repeat as necessary. Apply the following recommended rates in sufficient water to thoroughly cover one acre. Do not use in undiluted form.

OLIVES use 1½ to 2½ gallons of this material per 100 gallons of water in dormant, delayed dormant or summer periods for the control of Olive Scale, Black Scale and Oleander Scale.

PEARS after harvest for the control of Blister Mite, Bud Mite and Red Spider Mites, use at the rate of 1½ to 2 gallons in combination with 4 to 6 pounds of Kolofog® per 100 gallons of dilute spray.
