# DIAZINON 50WP

## Insecticide

In Water Soluble Packets.  
For Agricultural or Commercial Use Only

### ACTIVE INGREDIENT:

Diazinon: O,O-diethyl O-(2-isopropyl-4-methyl-4-pyrimidinyl) phosphorothioate .50.0%

INERT INGREDIENTS:.....50.0%

TOTAL 100.0%

For control of certain insects on fruits, nuts, vegetables, field crops, ornamentals and turf.  
For specific insects, refer to use directions.

KEEP OUT OF REACH OF CHILDREN

## WARNING AVISO

PRECAUCION AL USUARIO: Si usted no lee inglés, no use este producto hasta que le sea  
quiera lo haya sido explicado ampliamente.

### STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container. Do not store under conditions which might adversely affect the container or its ability to function properly. Such conditions include, but are not limited to, positioning of the container in storage, storage temperature, potential for crushing or damage due to stacking, and penetration of moisture.

STORAGE: Store in safe manner. Store in original container only. Store in cool, dry place. Do not store below freezing (32°F). Handle carefully when stored at temperatures of less than 50°F to avoid breakage of packets. Exposure to moisture or excessive handling of water soluble packets may cause breakage. Keep container tightly closed when not in use. Reduce stacking height where local conditions, such as humidity or pallet overhang, can affect package strength. Personnel should use clothing and equipment consistent with good pesticide handling.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CARRIER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, etc. If allowed by State and local authorities, by burning. It burned, stay out of smoke.

This outer package contains water soluble packets of DIAZINON 50WP inner packets and their contents dissolve in water. Do not open packets. Do not excessively handle packets or allow them to become wet prior to adding to the spray tank.

See Attached Booklet For Additional Precautionary Statements And Directions For Use.

INDIVIDUAL "PACKET" LABELING

# DIAZINON 50WP

Insecticide  
IN WATER SOLUBLE PACKETS

EPA REG. NO. 34704-

This product may be applied through irrigation systems—chemigation—for application to CRANBERRIES only. Apply this product only through solid set sprinkler irrigation systems. Do not apply this product through any other type of irrigation system.

Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from nonuniform distribution of treated water.

If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.

Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place.

A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

## CHEMIGATION SYSTEMS CONNECTED TO PUBLIC WATER SYSTEMS

Note: Platte Chemical Company does not encourage connecting chemigation systems to public water supplies. The following information is provided for users who have diligently considered all other application and water supply options before electing to make such a connection.

Public water system means a system for the provision to the public of piped water for human consumption if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year.

Chemigation systems connected to public water systems must contain a functional, reduced-pressure zone, backflow preventer (RPZ) or the functional equivalent in the water supply line upstream from the point of pesticide introduction. As an option to the RPZ, the water from the public water system should be discharged into a reservoir tank prior to pesticide introduction. There shall be a complete physical break (air gap) between the outlet end of the fill pipe and the top or overflow rim of the reservoir tank of at least twice the inside diameter of the fill pipe.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

The pesticide injection pipeline must contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops, or in cases where there is no water pump, when the water pressure decreases to the point where pesticide distribution is adversely affected.

Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

## SPRINKLER CHEMIGATION

The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.

Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

Mix in clean supply tank the recommended amount of this product for acreage to be covered, and needed quantity of water.

Provide constant mechanical agitation in supply tank to keep this product suspended throughout application operations.

Use sufficient gallonage of water to obtain thorough and uniform coverage, but not cause runoff or excessive leaching. This will vary depending on equipment, pest problem and stage of crop growth. Application of more or less than optimal quantity of water may result in decreased chemical performance, crop injury or illegal pesticide residues.

Meter this product into the irrigation water uniformly during the period of operation.

Do not overlap application. Follow recommended label rates, application timing, and other directions and precautions for crop being treated.

This product must not be used on golf courses and sod farms.

# DIAZINON 50WP

## Insecticide IN WATER SOLUBLE PACKETS

### ACTIVE INGREDIENT:

Diazinon: O,O-diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate.....	50.0%
<b>TOTAL</b>	<b>100.0%</b>

Diazinon 50WP is a water-soluble powder

For Agricultural or Commercial Use Only.

For control of certain insects on fruits, nuts, vegetables, field crops, ornamentals and turf.

For specific insects, refer to use directions.

## KEEP OUT OF REACH OF CHILDREN WARNING AVISO

PRECACION AL USUARIO. Si usted no les trae, no use este producto hasta que le etiqueta lo haya sido explicada ampliamente.

EPA REG. NO. 34704-

\* CLEAN CROP is a Registered T.M. of United Agri Products, Inc.

### GENERAL INFORMATION

DIAZINON 50WP should be mixed with sufficient water to assure thorough coverage unless otherwise noted in the Directions for Use. Best control is obtained when application is made at first sign of insects. Applications should be repeated as necessary to maintain control.

Since DIAZINON 50WP is a water-soluble powder formulation, constant agitation is necessary during application.

To spray mixture, drop the required number of unopened, water-soluble packets of DIAZINON 50WP into the spray tank while filling with water to the desired level. Be certain packet and its contents have completely dissolved and dispersed before applying spray. Operate agitator while mixing and applying.

Do not open packets or allow them to become wet prior to adding to the spray tank. Wear gloves when handling. If all water-soluble packets are not used, store remaining packets in resealed, outer package.

Do not apply this product through any type of irrigation system except for use on cranberries. Refer to cranberry section of label for referral to chemigation directions.

### FRUIT AND NUT INSECTS

DIAZINON 50WP may be applied using ground or aerial application equipment. For dilute ground sprays, mix specified rate of DIAZINON 50WP and apply at 300 to 600 gals. of water per acre. For concentrate ground sprays, use "equivalent rates" of DIAZINON 50WP in minimums of 20 to 50 gals. of water per acre. For aerial applications, use equivalent ground rates\* of DIAZINON 50WP in minimums of 2.5 gals. of water per acre. Observe stated time intervals between test application and harvest.

\*NOTE: The rate of DIAZINON 50WP for concentrate ground and aerial sprays is based upon a dilute ground spray with conventional ground equipment applied at 300 to 600 gals. of water per acre. If directions call for 1 lb. of product per 100 gals. of water, this amounts to 3 to 8 lbs. of DIAZINON 50WP per acre when applied as dilute ground spray volumes.

Almonds

Mites, twig borers. Apply 1.1% lbs. DIAZINON 50WP per 100 gals. of water as infestations develop.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

### WARNING

May be fatal if swallowed. May be absorbed through skin. Do not breathe dust or spray mist. Avoid contact with skin, eyes, and clothing. Wash thoroughly after handling and before eating or smoking. Avoid contamination of food and feed. Keep out of reach of domestic animals. Do not use on humans or household pets. Do not permit children or pets to go onto sprayed grass until spray has completely dried.

### STATEMENT OF PRACTICAL TREATMENT

If swallowed: Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

If inhaled: Remove victim to fresh air. Apply artificial respiration if indicated.

If on skin: Remove contaminated clothing and wash affected areas thoroughly with soap and water.

If in eyes: Flush eyes with plenty of water. Call a physician if irritation develops or persists.

Note to Physician: Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidote. 2-PAM is also antidote and may be administered, but only in conjunction with atropine.

### ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams, ponds, tidal marshes, and estuaries (except for influence from treated watercourses before). Do not apply in water that will be used for recreational purposes and human and livestock consumption. Shrimp and crab may be killed at application rates recommended on this label. Do not apply where fish, shrimp, crab, and other aquatic life are important resources. This product must not be used in areas where impact on threatened or endangered species is likely. Contact your State Fish and Game Agency before applying this product.

Apply this product only as specified on the label. This pesticide is highly toxic to bees especially when remaining on the treated area. Do not spray on flowers, cover crop, or weeds blooming in the area. Bees are attracted to flowers and may be killed to provide the maximum possible period of bee activity.

### DIRECTIONS

It is a violation of Federal Law to use this product without its labeling.

### RE-ENTRY TIME

Do not enter treated areas without protective clothing means, at least, a hat or other shirt and long legged trousers or a coverall covering the body. Including the joints and ten states may require more restrictive use with this product. Consult your State Department of Agriculture for information. Do not apply this product in such a way as to expose workers or other persons. The area protected persons.

Written or oral warnings must be given treated area or in an area about to be treated. Give it if there is reason to believe that workers. When oral warnings are given, customarily understood by workers. Written warnings must include the following:

### WARNING

(Insert area or field description) treat application. Do not enter treated areas or spray have dried. In case of accident, call, clinic or hospital immediately. Report to Diazinon and describe his use of the "STATEMENT OF PRACTICAL TREATMENT". Oral warnings must include the same information.

Scales (including San Jose, parlatoria, black, brown, apricot, Mite eggs (including European red mite, brown mite), Twig borers, Aphid eggs (including apple, black cherry, mealy plum), Mealybugs. Apply as a dormant spray 1-1½ lbs. DIAZINON 50WP plus 2-3 gals. of dormant oil or 1-1½ gals. superior type oil per 100 gals. of water.

Almond hulls may be fed to livestock.

### Apples

Leafhoppers: Apply 1 lb. per 100 gals. of water in 3-5 applications beginning at petal fall and continuing through the growing season, or apply as infestations develop.

Scales (including San Jose, parlatoria, black, brown, apricot), Mite eggs (including European red mite, brown mite), Twig borers; Aphid eggs (including apple, black cherry, mealy plum); Mealy bugs. Apply as a dormant or delayed dormant spray 1 lb. of DIAZINON 50WP plus 2 gals. dormant oil or 1-1½ gals. superior type oil per 100 gals. of water.

Eyespot bud moth, Fruit tree leafroller, Mealybug. Mix 1 lb. per 100 gals. of water. Make 3-8 cover spray applications, beginning in the pink stage.

Do not apply within 14 days of harvest.

### Apples and Pears

Coddling moth, Rosy apple aphid, Green apple aphid, Woolly apple aphid, Miles. Mix 1 lb. DIAZINON 50WP per 100 gals. of water. Make 3-8 cover spray applications, beginning with the first cover. Applications should be timed according to insect infestations.

Apple maggot. Mix 1 lb. of DIAZINON 50WP per 100 gals. of water. Make at least 3 cover spray applications while flies are active and laying eggs.

San Jose scale crawlers, Forbes scale crawlers. Mix 1 lb. per 100 gals. of water. Apply early in the season when crawlers first appear. If infestation warrants, make a second application 7-10 days later.

Note: Miles will be suppressed if DIAZINON 50WP is used in the regular cover spray program. Slight russetting may occur on some varieties of apples, such as Golden Delicious.

Do not apply to apples or pears within 14 days of harvest.

### Apricots

Scales (including San Jose, parlatoria, black, brown, apricot, Mite eggs (including European red mite, brown mite), Black cherry, mealy plum), Mealybug. DIAZINON 50WP plus 2 gals. of dormant oil per 100 gals. of water.

Aphids, Brown mite (Clover mite). Two San Jose scale crawlers. Mix 1 lb. per 100 gals. of water. Make 3-8 cover spray applications.

Orchard scale crawlers. Mix 1/2 lb. of DIAZINON 50WP plus 2 gals. of dormant oil per 100 gals. of water.

Apricot mealybug. Mix 1 lb. per 100 gals. of water. Make 3-8 cover spray applications.

Do not apply within 10 days of harvest.

### Blueberries

Cranberry fruitworm, Cherry fruitworm, European red mite. Mix 1 lb. per 100 gals. of water. Make 3-8 cover spray applications.

Orchard scale crawlers. Mix 1/2 lb. of DIAZINON 50WP plus 2 gals. of dormant oil per 100 gals. of water. Make 3-8 cover spray applications.

Do not apply within 7 days of harvest.

### Caneberries (Blackberries, Boysenberries, Raspberry)

Leafhoppers, Thrips, Aphids. Two San Jose scale crawlers. Mix 1 lb. per 100 gals. of water and apply up to 200 gals. in sufficient water for thorough coverage.

Raspberry fruitworm. Apply at the above repeat application immediately before harvest.

Dryberry mite. Mix 2 lbs. per 100 gals. of water. Make 3-8 cover spray applications when canes are still on the ground. Make application when the buds are well developed.

Raspberry crown borer (Raspberry root borer). Mix 1 lb. per 100 gals. of water and apply as a drench to the crown area in the spring before berries begin to form.

Do not apply within 7 days of harvest.

\* Application can be made in 4.8 gals. of water per 1000 sq. ft. Thoroughly water treated areas immediately following application.

\*\* Application can be made in 12.0 gals. of water per 4000 sq. ft. Thoroughly water treated area immediately following application.

Boulder bugs: Spray bugs outside the home with 8 oz. in 4 gals. of water. At the same time, spray thoroughly around foundation, windows, doors, tree trunks, and into cracks and other places where the insects hide.

### CONDITIONS OF SALE AND WARRANTY

The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application all of which are beyond the control of Platte Chemical or the Seller. All such risks shall be assumed by the Buyer. Platte Chemical warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use subject to the inherent risks referred to above. Platte Chemical makes no other express or implied warranty of Fitness or Merchantability or any other express or implied warranty. In no case shall Platte Chemical or the Seller be liable for consequential, special, or indirect damages resulting from the use or handling of this product. Platte Chemical and the Seller offer this product, and the user accept it, subject to the foregoing Conditions of Sale and Warranty, which may be varied only by agreement in writing signed by a duly authorized representative of Platte Chemical.
