AND THE COURSE

1,000 Sq. Ft.

8 ounces

After applying 8 ounces of this product to 1000 square feet of lawn, remove finger from hole on right side of nozzle. Apply water only, evenly, over treated area for approximately 3 minutes. To continue application of product to another area of lawn, place finger over hole on right side of nozzle to start siphon.

(1 fl. oz in 3 gals of water covers 125 sq. ft.)

HOW TO USE SPRAYER

Connect spray nozzle to hose. Rubber washer should be checked for proper position. Determine area to be treated. For example, 1,000 sq. ft. = an area measuring 20 ft. X 50 ft. When applying, check area being treated against measuring guide on side panel. Spray pattern can be tested. (without discharging product) by not placing finger over hole on right side of nozzle.

Remove bottle cap and screw bottle into nozzla (save bottle cap for storage after use). Check siphon tube for for proper position. Do not squeeze bottle while attaching nozzle, or during application as contents may discharge. To store unused product: Turn off water supply at tap. Remove bottle from sprayer and replace original bottle cap Remove nozzle from hose and rinse in clear water.

Hold sprayer attached to hose in one hand and turn on the water at the tap. Clear water will discharge when water is turned on at tap. Let clear water run until all air is discharged from hose. When ready to treat, place finger over hole. on right side of nozzle and this product will mix automaticalty at the proper ratio. To stop flow of product, remove finger from hole to break siphon action

While holding sprayer at waist level, point in direction away from face and body. Walk back and forth at a brisk, steady pace. Overlap slightly for uniform coverage. Marks on right. side panel indicate square feet coverage. For certain areas, it may be more convenient to stand still and direct spray. across treated area in a broad sweeping motion.

DO NOT INTERCHANGE NOZZLES FROM ONE PRODUCT TO ANOTHER.
