### STORAGE AND DISPOSAL

**CONTAINER DISPOSAL:** Do not reuse bag. Wrap bag and put in trash.

### INSECT CONTROL

**GENERAL:** Apply recommended amount uniformly to golf course turf grass areas using any hand or power operated gravity or rotary type spreader designed for application of granular materials. Treat when insects first appear and thereafter as needed. Use highest rate stated for a pest when the infestation is severe. To help obtain uniform distribution, apply one-half the required amount of product in one direction; then apply the balance at a right angle. Immediately after application sprinkle the turf with 30 gallons of water per 1000 sq. ft. (unless otherwise specified) so as to wash the granules into the zone of insect infestation. Keep children and pets off treated areas until this material is washed into the soil and grass is dry. Do not mow for 24 hours.

**CHINCH BUGS**—Apply 2.3 lbs. per 1000 sq. ft. (11.5 lbs. per 5000 sq. ft.) when activity or damage appears. To prevent damage apply as soon as daily temperatures reach 80 degrees and repeat every 2 months.

**ANTS, CRICKETS, GRASSHOPPERS AND SOWBUGS (Pillbugs)**—Apply 2.3 lbs. per 1000 sq. ft. (11.5 lbs. per 5000 sq. ft.).

**CUTWORMS, EARWIGS**—Apply 1 1/2 lbs. per 1000 sq. ft. (8 lbs. per 5000 sq. ft.).

**EUROPEAN CRANE FLY LARVAE (MAGGOT)**—For control use 2.3 lbs. per 1000 sq. ft. Make application when damage is noticed or there are in excess of 20 larvae per sq. ft. Contact your Cooperative Agricultural Extension Service for proper timing to treat in your area.

**PERIMETER TREATMENT**—To help prevent infestation of industrial plant sites by **Ants, Crickets, Earwigs and Sowbugs (Pillbugs)**: Treat a band 6 to 10 feet wide where pests are active. Distribute granules uniformly using the appropriate rates listed above for the pests to be controlled.

**IMPORTED FIRE ANT—MOUND TREATMENT:** To control fire ants apply 4 tablespoons to each mound. For best results apply in cool weather, 65-80 degrees F., or in early morning or late evening hours. Treat new mounds as they appear.

**BILLBUG LARVAE**—Apply 2.3 lbs. per 1000 sq. ft. when larvae are present.

**NOTE**—Mosquitoes coming to rest on areas treated for control of golf course turf pests will be killed for varying periods of time after treatment, depending on exposure of treated areas to weathering conditions.
