PRODUCT INFORMATION

CAPTAN SEED TREATER WITH LINDANE is a dust-base agricultural insecticide and fungicide especially formulated for seed treatment at planting time. This product is formulated to help lubricate the planter box and assure smooth, even seed flow to the furrow. **CAPTAN SEED TREATER WITH LINDANE** is formulated for use in the treatment of seeds for protection against wireworms, seed corn maggots, and certain other soil-borne insects as well as providing fungicidal protection at planting time. Where seedling blight, damping-off, or seed decay normally occurs, combine this product with a full dosage of protection fungicide that is registered for use as a seed treatment.

FOR IMPROVED MIXING OF PRODUCT WITH SEED: For **DRY TREATMENT**, mix product with the seed in any commercial or barrel treater, until thoroughly coated. For **PLANTER BOX** method, fill the box only half full of seed and half the required amount of product and mix thoroughly with a stick. Then add the remainder of the seed to the box and all the rest of the required amount of product to the seed, again mixing thoroughly.

SEED TREATMENT DOSAGE RATES

Type of Seed	Oz. Per 100 Lbs.
Barley	4 oz.
Corn	4 oz.
Sorghum	4 oz.
Oats	2 oz.
Rye	2 oz.
Wheat	2 oz.

**SEED TREATMENT: DO NOT USE TREATED SEED FOR
FOOD, FEED OR OIL PURPOSES.**

Treated seed should be labeled in accord with all the applicable requirements of the Federal Seed Act. The Federal Seed Act requires that seed treated with a pesticide must contain a dye which imparts an unnatural color to the seed if the seed is intended to be moved in interstate commerce. Labels attached to treated seed must state, "Treated seed must not be used for food, feed or oil purposes." and "Exposed treated seed may be hazardous to birds and other wildlife. In the event that treated seeds are spilled and cannot be salvaged, completely cover them with soil away from bodies of water." Only seed of high germination with good vigor should be treated with this product. Poor seed may suffer greater injury. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Store treated seed in a dry place until planted so that excess moisture will evaporate. If seed is stacked when wet, heat may develop which could impair germination.

STORE ALL TREATED SEED IN A COOL, DRY PLACE.
