MAR | | 1997

Subject: Simazine 4L Flowable Herbicide EPA Registration No. 34704-687 Application and Letter Dated July 19, 1993, Request To Amend the Registration by Deleting Use Sites: Asparagus, Artichokes, Sugarcane, Forida Citrus, and Florida Turf; and To Amend the Noncrop Use Rate To a Maximum of Approximately 4.2 Pounds Active Ingredient per Acre

> Simazine 80W Herbicide EPA Registration No. 34704-685 Application and Letter Dated July 19, 1993, Request To Amend the Registration by Deleting Use Sites: Asparagus, Artichokes, Sugarcane Florida Citrus, and To Amend Noncrop Rate

Simazine 90WDG Herbicide EPA Registration No. 34704-686 Application and Letter Dated July 19, 1993, Request To Amend the Registration by Deleting Use Sites: Asparagus, Artichokes, Sugarcane, Florida Citrus, Florida Turf, and To Amend Noncrop Rate and To Amend Name of Product

The requested amendments to the subject pesticide product registrations under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) as amended, have been reviewed and the use deletions have been processed in accordance with PR Notice 91-1. There were no objections to the requested use-deletions that were announced in this Agency's Federal Register Notice, (58FR:60630, November 17, 1993). The labeling submitted for each of these products is acceptable under Act, provided that you:

- 1. Revise the proposed labeling to conform with the Worker Protection Standard for pesticide product as described in PR Notice 93-7 and 93-11.
- 2. Revise the proposed labeling to conform with the PR Notice 93-3 and 93-8, to reflect appropriate statement to prohibit application to water.

- 3. In case of EPA Registration No. 34704-686, submit labeling to reflect the name change requested.
- 4. Submit one (1) copy of the final printed labeling of each of the products before you release these products for shipment under the subject labeling.

If these conditions are not complied with, these registrations will be subject to cancellation in accordance with FIFRA, Section 6(e). Your release for shipment of these products under the subject labeling constitutes acceptance of these conditions.

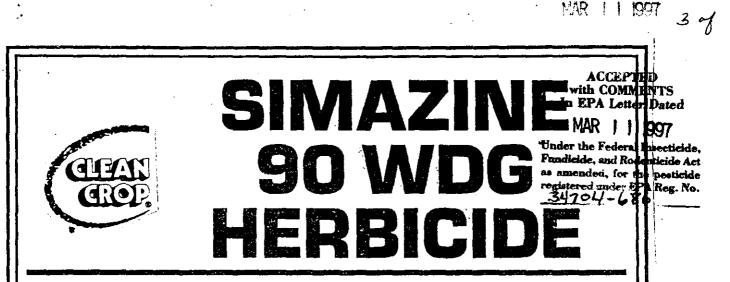

A stamped copy of each product label is enclosed for your records.

Sincerely yours, for Joanne I. Miller Product Manager (23) Fungicide-Herbicide Branch Registration Division (7505C)

ACTIVE INGREDIENT:

26770

KEEP OUT OF REACH OF CHILDREN CAUTION

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Drink 1 or 2 glasses of water and induce vomiting by buching back of throat with finger. Do not give anything by mouth to an unconscious person. Get medical attention. IF ON SKIN: Wash with pienty of water. Get medical attention if initiation

Persists.

IF IN EYES: Flush with water for 15 minutes. Get medical attention. See Below For Additional Precautionary Statements EPA REG. NO. 34704-686

EPA EST. NO. ______

POUNDS 02P90

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful it swallowed. Wash thoroughly after handling. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist.

ENVIRONMENTAL HAZARDS

Simazine is a chemical which can travel (seep or leach) through soil and can contaminate ground water which may be used as drinking water. Simazine has been lound in ground water as a result of agricultural use. Users are advised not to apply Simazine where the water table (ground water) is close to the surface and where the soils are very permeable, i.e., well-drained soils such as loamy sands. Your local agricultural agencies can provide further information on the type of soil in your area and the location of ground water.

Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes.

Do not apply when weather conditions favor drift from areas treated.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Chemigation: Do not apply this product through any type of irrigation system.

REENTRY STATEMENT

Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons. Appropriate protective clothing should consist of HAT_LONG-SLEEVE SHIRT_LONG PANTS AND BOOTS.

Do not enter treated area without protective clothing until sprays have dried.

Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. Oral warnings must be given if there is a reason to believe that written warnings cannot be understood by workers. When oral warnings are given, warnings shall be given in a language customarily understood by workers.

Written or oral warnings must include the following information: CAUTION

(insert area or field description) treated with Simazine on (insert date

or application).

Do not enter treated area until sprays have dried.

Because certain states may require more restrictive reentry intervals for various crope treated with this product, consult your State Department of Agriculture for further information.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food or feed by storage or disposal. Do not store under conditions which might adversely affect the container or its ability to function properly. Such conditions include, but are not limited to, positioning of the container in storage, storage temperature, potential for crushing or damage due to stacking, and penetration of moisture.

STORAGE: Store in a safe manner. Store in original container only. Store in cool, dry place. Reduce stacking height where local conditions, such as humidity or pallet overhang can affect package strength. PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, apray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide and Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incinenzion, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

GENERAL INFORMATION

Apply this herbicide before weeds emerge or after removal of weed growth. Simazine controls a wide variety of annual broadleaf and grass weeds when used at selective rates in agricultural crops and ornamental plantings. When used at higher, nonselective rates in noncrop areas, it also controls many perennial broadleaf and grass weeds.

Where a range of application rates is given, use the low rate on coarser textured soil and soil lower in organic matter; use the high rate on finer textured soil and soil higher in organic matter.

To avoid spray drift, do not apply under windy conditions. Avoid spray overlap, as crop injury may result.

Since this product enters weeds mainly through their roots, moisture is needed to move it into the root zone. Very dry soll conditions and lack of rainfall following application may necessitze shallow cultivation.

This product is noncorrosive to equipment, nonflammable, and has low electrical conductivity.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAU-TIONS ON THIS LABEL MAY RESULT IN CROP INJURY, POOR WEED CONTROL, AND/OR ILLEGAL RESIDUES.

EPA REG. NO. 34704-686

5

APPLICATION PROCEDURES

Ground application: Use conventional ground sprayers equipped with nozzles that provide accurate and uniform application. Be certain that nozzles are uniformly spaced and the same size. Calibrate sprayer before use and recalibrate at the start of each season and when changing carriers. Unless otherwise specified, use a minimum of 20 gais, of spray mixture per scre.

Use a pump with capacity to (1) maintain 35-40 psi at nozzles, (2) provide sufficient agitation in tank to keep mixture in suspension, and (3) to provide a migimum of 20% bypass at all times. Use centrifugal pumps which provide propeller shear action for dispersing and mixing this product. The pump should provide a minimum of 10 gals./minuta/100 gals. tank size circulated through a correctly positioned sparger tube or jets.

Use screens to protect the pump and to prevent nozzles from clogging. Screens placed on suction side of pump should be 16-mesh or coarser. Do not place a screen in the recirculation line. Use 50-mesh or coarser acreens between the pump and boom, and where required, at the nozzles. Check nozzle manufacturer's recommendations.

For band applications, calculate amount to be applied per acre as follows:

band width in inches	broadcast rate		amount needed per
row width in inches	per ticre	*	acre of field

Aerial application: Use aerial application only where specified in the use directions. Apply in a minimum of 1 gal, of water for each 1-1.5 bs. of herbicide applied per acre. Avoid application under conditions where uniform coverage cannot be obtained or where excessive spray drift may occur.

Avoid application to animals or humans. Flagmen and loaders should avoid inhalation of spray mist and prolonged contact with skin, and should wash thoroughly before eating and at the end of each day's operation.

Mixing procedures—all uses: (1) Be sure sprayer is clean and not contaminated with any other materials, or crop injury or sprayer clogging may result. (2) Fill tank 1/4 full with clean water, nitrogen solution or complete fluid tertilizer. (3) Start agitation. (4) Be certain that the agitation system is working properly and creates a rippling or rolling action on the liquid surface. (5) Pour product directly from bag into tank. (6) Continue filling tank until 90% full. Increase agitation if necessary to maintain surface action. (7) Add tank mix herbicide(s) after this product is thoroughly suspended. (8) Finish filling tank. Maintain agitation to avoid separation of materials. (9) Empty tank as completely as possible before refilling to prevent buildup of emulsifiable concentrate residue from possible tank mix herbicides. (10) If an emulsifiable concentrate film starts to build up in tank, drain it and clean with strong detergent solution or solvent. (11) Clean sprayer thoroughly immediately after use by flushing system with water containing a detergent.

Compatibility test: To determine the tank mix compatibility of this product with liquid fertilizer, crop oil, spreaders, or recommended pesticides, use this test method. Nitrogen solutions or complete fluid fertilizers may replace all or part of the water in the spray in all/sta and corn. Since liquid fertilizers can vary, even within the same analysis, check compatibility each time before use. Be especially careful when using complete suspension or fluid fertilizers as serious compatibility problems are more apt to occur. Commercial application equipment may improve compatibility in some instances. Check compatibility using this procedure:

- 1. Add 1 pint of fertilizer to each of 2 one-quart glass jars with tight lids.
- To one of the jars add 1/4 tsp. of a compatibility agent approved for this use (1/4 tsp. is equivalent to 2 pts. per 100 gais. spray). Cap and shake until mixed. Examples of compatibility agents include Compex* and Unite*.
- 3. To both jars add the appropriate amount of herbicide(s). If more than one herbicide is used, add them separately with dry herbicides lirst, flowables next, and emulsifiable concentrates last. After each addition, cap and shake until thoroughly mixed. The appropriate amount of herbicides for this test follows (assuming a spray volume of 25 gals. per acre):

Dry herbicides:	For each pound per acre add 1.5 teaspoons to each jar. Fluff up wettable powder products
	before measuring.
I insid bothicking	For each pint per acre add 0.5 teaspoont to

each jar.

For a spray volume other than 25 gals, per acre, change the teaspoons added to each jar as follows:

25 gals. x no. teaspoons given above	=	teaspoons to
desired gals, spray volume per acre		add to each jar

 After adding all ingredients, put lkis on and tighten. Shake jars vigorously one minute. Let the mixtures stand 15 minutes and then look for separation, large flakes, precipitates, grease, gels, medium to heavy city film on the jar, or other signs of incompatibility. Determine if the compatibility agent is needed in the spray mixture by comparing the two jars. If either mixture separates, but can be remixed readily, the mixture probably can be sprayed as long as good agitation is used. If the mixtures are incompatible, test the following methods of improving compatibility: (A) slumy the dry herbicides(s) in water before addition, or (B) add 1/z of the compatibility agent to the fertilizer and the other 1/z to the emulalifiable concentrate or flowable herbicide before addition to the mixture. If still incompatible, do not use the materials mixed in the same spray tank. 4 01

ROTATIONAL CROPS AND PERENNIAL CROP REPLANTING To avoid crop injury, observe the following precautions: (1) If rotating treated land the year following application, plant only corn, unless otherwise stated in this label. (2) If replanting perennial crops or if rotating land to crops other than corn, do not apply this product in the year preceding planting these crops.

FRUIT AND NUT CROPS

Apply the spray to the orchard or vineyard floor avoiding contact with fruit, foliage, or stems. Recommended rates are based on broadcast treatment. For band applications or spot applications around fruit or nut trees, reduce the broadcast rate of this product and water per acre in proportion to the area actually sprayed.

Precautions (All fruit and nut crops): To avoid crop injury, 1) Apply only to orchards or groves where trees have been established 12 months or more unless specified differently. 2) Make only one application per year, except as noted otherwise. 3) Do not use on gravelly, sand, or loamy sand soil. 4) Immediately following application, limit overhead sprinkler irrigation to 1/2 inch.

Almonds and Peaches (CA only)

Apply 1.1-2.2 lbs, per treated acre in a 2-4 ft, band on each side of the tree row. Apply before weeds emerge in late fall or early winter. Weeds controlled by 1.1 lbs, include burclover, common chickweed, wild mustard, and shepherdspurse. Apply only once per year.

Precautions: To avoid crop injury, 1) Do not treat trees established in the grove less than 3 years. 2) Do not treat the Mission (Texas) variety of almonds. 3) Do not apply to almond trees propagated on plum rootstocks. 4) Do not replant almonds or peaches in treated soil for 12 months after treatment. 5) Do not apply on soil with less than 1% organic matter, 6) Do not treat areas where water will accumulate.

Apples, Pears, Sour Cherries Apply 2.2-4.4 lbs. per acre.

Avocados

CA and FL only: Apply 2.2-4.4 lbs. per acre after final preparation of grove.

Precaution: Do not apply on gravelly, sand, or loamy sand soil.

Blueberries and Canoberries (blackberries, boysenberries, loganberries, rasoberries)

Apply 2.2-4.4 lbs. per acre in the spring of apply as a split application of 2.2 lbs. per acre in the spring plus 2.2 lbs. per acre in the fall. Apply in a minimum of 40 gats, of water per acre.

On plantings less than 6 months old, use 1/2 the above rate.

To control quackgrass, apply 4.4 lbs. per acre in the fall or split the application applying 2.2 lbs. per acre in the fall plus 2.2 lbs. per acre in the spring, when quackgrass is actively growing.

Note: Do not apply when truit is present, or illegal residues may result. Cranberries

MA: Apply up to 4.4 lbs, per acre either before spring growth begins or in the fall after harvest.

Other areas: Apply 2.2 lbs. per acre before spring growth begins. Filberts

Apply 2.2-4.4 lbs. per acre in the fall or apply a split application of 2.2 lbs. per acre in the fall plus 2.2 lbs. per acre in the spring.

Precautions: 1) If trees are planted on a hillsuice, excessive soil erosion may result from the elimination of weeds. 2) Dr not rise on gravelly, sand, or loamy sand soil.

Note: Do not apply when nuts are on the ground during the hanest period.

Grapes

Apply 2,2-5.3 lbs. per acre any time between itary suring.

Precaution: Do not use in vineyards established less than three years, or crop injury may occur.

Grapefruit, Lemons, Oranges

AZ (Lemons and Oranges only): Apply a split application of 1.75 "bs. peracre in the spring plus 1.75 lbs. per acre in the fall.

CA: In grapefruit, lemons, and oranges, apply 2.2-4-4 lbs. per acre in a single application; or apply 2.2 lbs. per acre in the fall and 2.2 lbs. per acre in the spring.

SIMAZINE 90 WDG HERBICIDE

EPA REG. NO. 34704-686

Precaution: Do not use in the Imperial, Coachella, or Palo Verde valleys, or crop injury may result.

Ft (Grapefulit and Oranges only): Apply only once per year. For control of weeds listed under ANNUAL WEEDS CONTROLLED, apply 7.1-10.8 lbs. per acre in the apping: to also control milkweed vine, use 8.9-10.6 lbs. per acre arther preemergence or before vines are 12 inches balt. TX (Grapefulit and Oranges only): Apply 4.4-5.3 lbs. per acre.

Precautions (All areas): To avoid crop injury, 1) Do not use in nurseries, 2) Do not apply to bedded grapefruit, lemons, or oranges, 3) Do not apply to trees under stress from freeze damage for one year after the freeze.

Macadamia Nuta

Apply 2.2-4.4 lbs. in 50 gais, of water per acre before harvest and just prior to weed emergence. Repeat application as necessary.

Note: Do not apply when nuts are on the ground during the harvest period, as illegal residues may result.

Olives

Apply 2.2-4.4 lbs. per acre following grove preparation in the fall, Repeat annually in midwinter.

Peaches, Plums, Sweet Charries

Apply 1.75-4.4 lbs. per acrs. Apply in late fail to early spring prior to weed emergence.

Precautions: To avoid crop injury, 1) Peaches: use only in AR, LA, MO, OK, TX, and states east of the Miss. River. For CA see specific directions in the section "Almonds and Peaches (CA only)." 2) Plums and sweet cherries: use only in MO and states east of the Miss. River except TN. Pecana

Apply 2.2-4.4 lbs, per acre before weeds emerge in the spring.

Precautions: To avoid crop injury, 1) Do not use west of the Pecos River in TX or in NM, AZ, or CA. 2) Do not make applications to transplanted trees that have been established less than two years in the grove.

Note: Do not apply when nuts are on the ground, or lilegal residues may result. Do not allow animals to graze treated fields.

Strawberries

Oregon and Washington: For control of chickweed, groundsel, mustard, and shepherdspurse, apply broadcast 1.1 lbs. per acre. In fields where overhead irrigation is used to activate this product, apply after harvest at time of bed renovation. In fields where overhead irrigation is not available, apply during early October through November.

Precautions: To avoid crop injury, 1) Make only one application per growing season. 2) Do not apply within 4 months after transplanting.

Walnuta

Apply 2.2-4.4 lbs. per acre. Leveling and furrowing operations after application will lessen effectiveness of weed control.

Note: Do not apply when nuts are on the ground, or illegal residues may result.

FIELD CROPS

Com

Nitrogen solutions or complete fluid fertilizers may replace all or part of the water as a carrier in the spray. Determine the physical compatibility of this product with fertilizer before use. Refer to the General information section of this label for a compatibility test. Do not apply after corn has emerged as there is danger of liquid fertilizers causing crop injury.

Preemergence: Apply before weeds and corn emerge. Use the appropriate rate in the table below.

Preplant: Apply in the spring after plowing at the appropriate rate in the table below. Apply before, during, or after final seedbed preparation. It soil is tilled or worked after application, avoid deep incorporation. Best meaults will be obtained when this product is applied within 2 weeks before planting. Under dry weather conditions, preplant applications may give better weed control. If weeds develop, particularly under relatively dry conditions, a shallow cultivation will generally result in better weed control.

Soli texture	Broedcest* rate per acre
Coarse-textured soit: Sand, slit, and loam that is low in organic mat- ter	2.2 lbs.
Medium-textured sol: Soll containing a moderate amount of clay and organic matter	2.6 lbs.
Fine-textured soli: Loam that is high in organic matter and clay (including dark prairle solis of Corn Belt)	3.3 lbs.
Organic soll: Peat, muck, and high-organic clay	4.4 lbs.

59

*For calculation of band treatment rate, see the General Information section.

To control quackgrass: Apply 3.3-4.4 lbs. per acre in the fall. Plow two to three weeks later, or if erosion is a problem, delay plowing until spring.

Precautions: 1) Do not apply more than 4.4 lbs. per acre to corn per year. 2) Do not rotate to any crop except corn until the following year or injury may occur. 3) After harvest, plow and thoroughly till the soil in fall or spring to minimize possible injury to spring-seeded rotational crops, regardless of the rate used. 4) If more than 3.3 lbs. is used per acre (or equivalent rate in a band), a crop of untreated corn should precede the next rotational crop. 5) Do not apply preplant incorporated in corn in the High Plains and Intermountain areas of the West (including central and western KS, western NE, western OK, and the Panhandle of TXD where rainfall is sparse and erratic or where irrigation is required. 6) In the High Plains and Intermountain areas of the West where rainfall is sparse and erratic or where irrigation is required, use this product to control weeds in com only when com is to follow com or when a crop of untreated com is to precede another rotational crop. 7) In western MN and eastern parts of the Dakotas, NE, and KS, do not plant soybeans following com treated with this product if more than 2.2 lbs. per acre (or equivalent rate in a band) was applied or injury may occur. 8) Injury may occur to soybeans planted in north-central and northwest IA, south-central and southwest MN, northeast NE, southeast SD, and other areas the year following application on soils having a calcareous surface layer. 9) Do not plant sugar beets, tobacco, vegetables (including dry beans), spring-seeded small grains, or small-seeded legumes and grasses the year after an application, or injury may occur.

Note: Do not graze treated areas, or illegal residues may result.

Buggircane

Apply 2:24.4 lbs. per acre at planting or after harvest if ratioon crop is to be grown, but before weeds or sugarcane emerge. This product may also be applied interline directed or over the sugarcane to provide continuing control of germinating weeds.

Precautions: To avoid crop injury of the sal residues, 1) Do not apply more than one 2.2-4.4 lbs. application over the plants or more than two interline-directed applications. 2) Do not apply after close-in. 3) Total application should not exceed 11.1 lbs. per acre crop cycle.

Note-Do not feed or graze treated forage to livestock.

NURSERIES, CHRISTMAS TREE PLANTINGS, SHELTERBELTS

Nurseries (see list below)

Apply 2.2-3.4 bs. in at least 25 gals. of water per acre in fall or spring. Precaution: To avoid plant injury, do not apply for at least one year after transplanting.

Christmas The Plantings and Shelterbelts (res 4st below) Remove weed growth before application. Apply 2,2-3,4 lbs. k. at k.1,t 25 gals, of water per acre after transplanting. Use the same rate for annual maintenance applications.

For quackgrass control apply 4.4 lbs. per acre in the fall or apply a split application of 2.2 lbs. per acre in the fall plus 2.2, lbs. per acre is carty spring, after quackgrass begins growth.

Precautions: To avoid tree injury, 1) Do not use on seedbeds or cutting beds. 2) in CA, OR, and WA do not apply to Christmas trees or shelterbei's sconer than one year after transplanting. In other areas, do not apply to Christmas trees or shelterbeit transplants less than three years of age. 3) Do not use until soil is firmly settled around roots. 4) Do not apply more than once a year, except as directed for quackgrass control.

St Augustinegrass, Centipedegrass, and Zoysia Grass Apply 2:2-4.4 ibs. per acre, according to soil texture as indicated below. Muck or 4.4 ibs. Old beds within 2 cays attertifting of and peat

		NEW DOOS	ging ging
Sandy soil	2.2 lbs.	Old bods	within 2 days after lifting of sod
		New bede	7-10 days after sprigging or plug
			വസ്വ

If weeds regrow, apply an additional 2.2 lbs. ch-muck or pez, or 1.1 lbs. on sandy soil.

Precautiops: On newly sprigged turfgrass, temporary slowing of growth or yellowing may occur following application. To avoid turf injury 3) Do not apply within 30 days before cutting or lifting. 2) Use only or turfgrass reasonably free of infestations of insects, nematodes, and diseases.

VEGETABLE CROPS

Asparagus (Established) Apply 2.2-4,4 lbs. per acre to beds established one year or mare

Apply once per year either after disking in the spring before weeds emerge, or following harvest after removal of existing weed growth. Spring application must be made at least 3 days before first putting.

Precautions (WA and OR only): To speed crop injury, 1) Do not apply on gravelly, sand, or loarny sand soil, 2) Do not allow integation water to stand ∇ to form pools in the field,

Artichokes

N

Apply 2.2-4.4 lbs, per acre as a directed spray after the last tall village.

Precautions: To avoid crop injury, 1) Do not apply on grave y, Sand, or loarny sand soil. 2) Apply only once per year.

NONSELECTIVE WEED CONTROL ON NONCROP LAND

Best results are obtained when this product is applied before woeds emerge. If weed growth has begun and removal is not feasible, include a contact or translocated herbicide in the spray.

This poduct provides long-term weed control on industrial sites, highway medians and shoulders, railroad rights of way, lumber ands, petroleum tank farms, and in noncrop areas on farmer, such as around buildings, equipment and tool storage areas, along tences, roadsides, and lanes.

Aerial applications may be made where it is leasible. Use at least 1 gal. of water for each 0.9 lb. of this product for both ground and ancial applications. Use more water if practical.

Precautions: 1) Do not use this product for nonselective weed control on land to be cropped, near adjacent desirable trees, shrubs, or plants, or in greenhouses, or injury may occur. 2) Do not use in areas accessible to livestock or allow livestock to graze, treated weed foliage.

To control annual broadleaf and grass woods (including barnyardgrass, cheat, crabgrass, common turbing and turbing barnyardturevine, and turkey mollein) apply 5.3-11.1 lbs. per acte To control most annual and many perennial broadleaf and grassweeds (including quackgrass, bluegrass, redtop, burdock, Canada thistile, orchardgrass, purpletop, smooth brome, dogfennel, and plantain) apply 11.1-82.2 lbs. per acre.

To control fract-to-kill perennial weeds (including builthistle and sowthistle) apply 22-244.4 lbs. per acre. For longer residual control in regions of high suinfall and s long

For longer residual control in regions of high mintall and a long growing season, apply 22.2-44.4 lbs. per acre.

NOTICE OF WARBANTY

Platte warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for the purposes stated on such label, only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of the product. Grop injury, ineffectiveness or other unintended consequences pay result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Platte. In no case shall Platte be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the buyer. Platte makes no warranties of Merchantability or fitness for a particular purpose nor any other express or implied warranty except as abled above.

SIMAZINE 90WDG can be used to provide residual control or suppression of certain weeds on industrial sites, highway medians and shoulders, railroad rights-of-way, lumber yards, petroleum tank farms, and in noncrop areas on farms, such as around buildings, equipment and fuel storage areas, along fences, roadsides, and lanes. Aerial applications may be made where it is feasible. Use at least 1 gal. of water for each 0.9 lb. of this product for both ground aerial applications. Use more water if practical. To control or suppress susceptible annual broadleaf and grass weeds (such as barnyardgrass, cheat, crabgrass, common, lambsquarters, foxtail, ragweed, puncturevine, and turkey mullein), apply up to 5.3 lbs, per acre. To broaden weed control spectrum,

or in areas where triazine resistant weeds are present, it is recommended to tank mix SIMAZINE 90WDG with other compatible herbicides registered for use on noncrop areas. For example, certain diuron, bromacil, glyphosate and 2,4-D formulations are registered for such use. Observe the most restrictive label statements of the various tenk mix products used.

NOTICE

PLATTE WARRANTS THAT THIS PRODUCT CONFORMS TO THE CHEMICAL DESCRIPTION ON THE LABEL THEREOF AND IS REA-SONABLY FIT FOR THE PURPOSES STATED ON SUCH LABEL ONLY WHEN USED IN ACCORDANCE WITH THE DIRECTIONS UNDER NORMAL USE CONDITIONS. IT IS IMPOSSIBLE TO ELIMINATE ALL RISKS INHERENTLY ASSOCIATED WITH THE USE OF THIS PROD-UCT. CROP INJURY, INEFFECTIVENESS, OR OTHER UNINTENDED CONSEQUENCES MAY RESULT BECAUSE OF SUCH FACTORS AS WEATHER CONDITIONS, PRESENCE OF OTHER MATERIALS, OR THE MANNER OF USE OR APPLICATION, ALL OF WHICH ARE BE-YOND THE CONTROL OF PLATTE. IN NO CASE SHALL PLATTE BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. ALL SUCH RISKS SHALL BE ASSUMED BY THE BUYER. EXCEPT AS EXPRESSLY PROVIDED HEREIN, PLATTE MAKES NO WARRANTIES, GUARANTEES, OR REPRESENTATIONS OF ANY KIND, EITHER EXPRESSED OR IMPLIED, OR BY USAGE OF THADE, THE DRAFT OF USE OR HANDLED OR BY USAGE OF THADE,

WARRANTIES, GUARANTEES, OR REPRESENTATIONS OF ANY KIND, EITHER EXPRESSED OR IMPLIED, OR BY USAGE OF TRADE, STATUTORY OR OTHERWISE, WITH REGARD TO THE PRODUCT SOLD, INCLUDING, BUT NOT LIMITED TO, MERCHANTABILITY, FIT-NESS FOR A PARTICULAR PURPOSE, USE OR ELIGIBILITY OF THE PRODUCT FOR ANY PARTICULAR TRADE USAGE.
