What is this product and what will it do?

KLEENUP® Spot Weed & Grass Killer is a "spot" weed killer for individual weeds. It will kill all vegetation contacted. The weed killer moves throughout the weed, killing roots and all. Gives complete kill of weeds in lawns, flower beds, around trees and shrubs, in walks, driveways, gravel and bark mulch. NOTE: Spot treatment in a lawn will cause dead spots until regrowth occurs.

What will I see?

The Aerosol produces a foaming spray action which marks the weed as treated and helps reduce drift. Weeds will show browning, yellowing, and wilting usually within 1 week and complete kill within 2-4 weeks.

DIRECTIONS

Shake can just before using and occasionally during use. Invert can, hold at arm's length and point can at weed as you press button. Do not press button when can is in upright position. Stand close to weed (1 to 2 feet) with can aimed at weed and away from face. Push down briefly on button. Spray to cover center of weed. Do not overspray. The foaming spray action will make it easy for you to see coverage. One application will kill most weeds listed. If certain tough weeds, i.e., Nutgrass, Bermudagrass, Canada Thistle or Field Bindweed (Wild Morning Glory) are not completely controlled within 4 weeks, repeat application. Treated areas in lawns can be reseeded 7 days after application. Do not apply when rainfall is expected within 24 hours of application as weed control will be reduced.

IMPORTANT

This product is a non-selective weed killer and will kill all vegetation contacted. Be careful when treating weeds not to spray surrounding desirable grasses and plants or they will also be killed. If spray drift accidentally contacts desirable foliage, wash off immediately with water.

STORAGE AND DISPOSAL
