Ronstar[®] 0.67% on Fertilizer

For sale to and use by professional applicators only. Not for sale to or use by homeowners/consumers.

A Pre-emergent Weed Control Product plus a Quality Fertilizer for use on varieties of Perennial Bluegrass. Bentgrass, Bermudagrass, Buffalograss, Perennial Ryegrass, St. Augustine grass, Seashore Paspalum, Tall Fescue and Zoysia. Also For Use Around **Ornamental Shrubs, Vines, Trees & Ground Covers.**

ACTIVE INGREDIENT:

Oxadiazon*		 	 	0.67%
OTHER INGRE	EDIENTS:	 	 	99.33%
			TOTAL	100.009/

Refer to Fertilizer Tag for Analysis

*CAS [19666-30-9] Contains RONSTAR® Herbicide. A registered trademark of Aventis, Inc.

•Not for use on home lawns.

•For use on golf courses, nurseries, parks, sod farms, athletic fields, and other recreational and ornamental turforass.

KEEP OUT OF REACH OF CHILDREN WARNING—AVISO

Si usted no entiende la etiqueta, busque a alguien para que 58 la explique a usted en detalle (If you do not understand the label, find someone to explain it to you in detail.)

EPA REG. NO. 34704-834

EPA EST. NO.

NEW CONTENTS 50 POUNDS (22.68 KG) IHT

EXP 12/05

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMA

WARNING: Causes substantial but temporary eye injury. Wear protective eyewear (goggles, face shield or safety glasses). Causes skin irritation. Do not get in eyes, on skin or clothing. Harmful if swallowed, absorbed through the skin, or inhaled. Avoid breathing dust, contact with skin, eyes or clothing. Remove contaminated clothing and wash clothing before reuse. Wash thoroughly with soap and water after handling. Do not allow domestic animals to graze treated areas. Avoid contamination of feed and foodstuffs.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Loaders, applicators, and other handlers must wear: Long-sleeved shirt and long pants, and Shoes plus socks. Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. ACCEPTED

with COMMENTS in EPA Letter Dated

2 1 MAR 2008

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

34704-834

	FIRST AID
IF SWALLOWED:	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF IN EYES:	 Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.
IF ON SKIN:	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED:	 Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for further treatment advice.

EIDOT AID

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL: 1-800-301-7976.

Have this product container or label with you when calling a poison control center, or doctor, or when going for treatment.

USER SAFETY RECOMMENDATIONS

Users should:

Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly of through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Do not apply this product through any type of irrigation system. Apply only as specified on this label.

A maximum application rate of 895 pounds of product per acre per year (equivalent to 6 pounds al/A/year), except in areas where there is heavy weed infestation. In areas of heavy weed infestation, the maximum application rate is 1194 pounds of product per acre per year (equivalent to 8 pounds ai/A/vear).

A maximum single application rate of 597 pounds of product per acre (equivalent to 4 pounds ai/A)

Not for use on home lawns

Ronstar[®] 0.67% on Fertilizer EPA REG. NO. 34704-834

For best results, water-in the product as soon as practical after application.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains

requirements for the protection of agricultural workers on sod farms, and nurseries, and handlers of agricultural posticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: Shoes plus socks, and chemical-resistant gloves made of any waterproof material.

Controls Crabgrass, Goosegrass, Poa Annua, Annual Sedge and other weeds as listed, on Golf Courses, Commercial Lawns, and other Athletic and/or Recreational Ornamental Turf.

WHERE, HOW MUCH AND WHEN TO USE ON TURFGRASS

This product may be used at full rate or as a "split application in established perennial Bluegrass, Bentgrass (see restrictions), Bermudagrass, Buffalograss, Perennial Ryegrass, St. Augustinegrass, Seashore Paspalum, Tall Fescue, and Zoysiagrass turf, at apartment/condominium complexes, corporate and public parks, golf courses, sod farms, athletic fields, playgrounds, cemeteries and other ornamental and recreational turfgrass areas. Not for use on home lawns. The turf should be free of leaves and thatch and in condition to allow granules to reach the soil surface. Know the square footage of the area to be treated and uniformly apply using a granule spreader. Do not apply to turf when it is wet. When using at full rate do not overlap spreader applications, especially on St. Augustinegrass since discoloration "streaking" may temporarily occur from the "doubled rate".

See section on this label entitled PRECAUTIONS IN USING ON TURFGRASS for the maximum rate for St. Augustinegrass and Bentgrass of 3 lbs. a.i. per acre which is equivalent to 10.2 lbs. of this product per 1,000 sq. ft. After applications, if rain is not expected within 24 hours, sprinkle irrigate the treated turf with up to a ¼ inch of water to get maximum weed control and quicker response from the fertilizer nutrients. This product is a pre-emergence herbicide and must be applied prior to weed seed germination (see map of U.S. on this label). It will not control growing weeds.

**See section on this label entitled FOR SPRING APPLICATION ON GOLF COURS-ES for instructions to apply the 3 lb. or 4 lb. A.I. rate as a SPLIT APPLICATION.

Crabgrass, Goosegrass and other annual weeds as listed.	3 to 4 lbs. a.i./A 450 to 600 lbs. product/acre	10.2 to 13.6 lbs./1,000 sq. ft.	For use in Bluegrass, Bent- grass, perennial Ryegrass and Tall Fescue, Make application in the fall after turi has become dormant. For late fall applica-	

Annual Bluegrass Control in Bermudagrass Fairways Overseeded with Perennial Ryegrass only.

Weeds Controlled	Lbs. a.i. / Acre	Lbs. of Product	Directions - Refer to Map
	Lbs. product/acre	per 1,000 sq. ft.	of U.S.
Annual Bluegrass (Poa annua spp.)	2 lbs. a.i/A 300 lbs/acre	6.0 lbs/1,000 sq. ft.	Apply in late summer to early fail prior to Poa annua spp., seed germination. Any Poa annua spp. established when this product is applied will not be controlled. It should not be applied closer than 60 days to overseeding. Do not use where poa trivialis is present in the overseed mixture. Apply the full 2 lb. ai. rate in one applied co.

NOTE: In many areas annual bluegrass exists as at least two biotypes or subspecies of Poa Annua. The true annual biotype, "Poa Annua spp. Annua" which germinates from seed every year is controlled while the biotype, "Poa Annua spp. raptans" which behaves like a premnial and survives through the summer, as an established plant, cannot be controlled. Consult the extension service or university weed specialist in your area for more information concerning your locale.

Annual Weed Control during establishment from "Sprigs" of Bermudagrass, Zoyslagrass, and Seashore Paspalum.

Weeds Controlled	Lbs. a.l. / Acre Lbs. product/acre	Directions - Refer to Map of U.S.
Crabgrass and Goosegrass, Annual Sedge and other annual weeds.	2 to 3 lbs. a.I/A 300 to 450 lbs. per acre	For Bermudagrass make application immediately prior to, or, immediately after sprigging.

For Seashore Paspalum and Zoysiagrass make application 10 to 14 days after sprigging. Applications made close to the time of sprigging may cause objectionable Seashore Paspalum injury. Disturbance of the soil surface after application may disrupt the herbicide barrier and reduce effectiveness. For best results sprinkler irrigate the "sprigged" area with up to ¼ inch water after application.

NON-AGRICULTURAL USES REQUIREMENTS

The requirements of this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms. forests, or nurseries.

Thoroughly wash face and hands with soap and water after exposure and before eating or smoking. Wear protective clothing including long-sleeved shirt and impervious gloves when handling. Launder exposed clothing before reuse.

FOR SPRING APPLICATION ON GOLF COURSES

The 3 lb. and 4 lb. a.i. per acre rates may be applied as a split application. Weed control and better turf management can be programmed by splitting the a.i. per acre rate of active ingredient into two separate applications. For example to accomplish this in region #5 (See map of U.S. on this label); first apply 1.5 lbs. a.i./for required 3 lbs. a.i./acre rate) or first apply 2 lbs. a.i acre (for a 4 lb. a.i./acre rate) as the 1st application 1 to 2 weeks before estimated weed seed germination or in late December or early January; then follow with the second "½ rate" in 60 days or the first of March. The timing for these applications should be closely programmed to the geographic region (see map of U.S. on this label) and adjusted to an "early" or "late" split if applied to new turf areas first under turf management where weed pressure is expected to be heavy.

Bermuda & Paspalum Directions - Refer to U.S. Map on this label.

For Bermudagrass make application immediately prior to or after after sprigging. For Seashore Paspalum apply 10 to 14 days after sprigging. Applications made close to the time of sprigging may cause objectionable paspalum injury. Disturbance of the soil surface after application may disrupt the herbicide barrier and reduce effectiveness. For best results sprinkler irrigate the "sprigged" area with up to ¼ inch water after application.

tions, seeding into treated areas should be delayed until 4 months after greenup.

Ronstar[®] 0.67% on Fertilizer EPA REG. NO. 34704-834

PRECAUTIONS IN USING ON TURFGRASS and also PRECAUTIONS WHEN SEEDING

For St. Augustinegrass and Bentgrass turf, DO NOT exceed the rate of 3 lbs. of active ingredient per acre which is equal to 10.2 lbs. of this product per 1,000 sq. ft. DO NOT apply to Bentgrass turf mowed less than 3/a inch. This product may cause discoloration of Bentgrass, Bermudagrass and St. Augustinegrass but this discoloration is temporary and normally outgrown within 2 to 3 weeks. Avoid contact with flowers and shrubs except as recommended elsewhere for ornamental plants on this label. DO NOT apply to newly seeded areas. Seeding into treated areas should be delayed until 4 months after treatment.

DO NOT apply to Dichondra or Centipedegrass. DO NOT use on golf course putting greens or tees because of the varying cultural practices used.

* For the weeds with 1 asterisk above, use 3 to 4 lbs. a.i. per acre (equal to 450 lbs. to 600 lbs. of this product per acre or 10.2 lbs. to 13.6 lbs. per 1,000 sq. ft.).

**For the difficult-to-control weeds with 2 asterisks above, use the 4 lbs.a.i. per acre (equal to 600 lbs. of this product/acre or 13.6 lbs. per 1,000 sq. ft.)

NOTE: For newly seeded lawns do not apply this product until after the second cutting. For best turi management, place new grass seed in the fall of the year. Spring pre-emergence weed control can then be applied.

SPREADER SETTINGS

Spreader settings are calculated to apply the recommended rates of active ingredient per acre based on this product bulk density of 50 to 60 lbs. per cubic foot. Settings will vary if your turfgrass requires this EPA registered herbicide/fertilizer combination product with a lighter bulk density. To check your spreader settings refer to the spreader manual or manufacturer. Test apply enough product to cover 500 sq. ft. based on the amount of product a.i. you wish to apply per acre. Select a suitable rate from the Pre-emergence Weed Control chart on this label. Adjust and record the setting if required. Apply as directed on this label.

Spreader Settings	for 2 lbs. a.i./Acre	for 3 lbs. a.I./Acre	for 4 lbsi./Acre
Cyclone B3-Pro	#2.75	#3.25	#3.9
Scotts Pro R-8A	#H	#1+	#J+

Plan on an approximately 3 mph spreader speed to obtain best coverage. Know the exact square footage before application. Incorrect application will result in poor weed control.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store product in its original bag, in a cool, dry, locked place out of reach of children. In case of spill, sweep up, and use according to directions or dispose of as follows.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA regional office for guidance.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned stay out of smoke.

ESTABLISHED ORNAMENTALS and GROUND COVERS

3

Ronstar® 0.67% ... Fertilizer EPA REG. NO. 34704-834

WHERE, HOW MUCH, AND WHEN TO USE AROUND ORNAMENTALS

Can be applied anytime of the year prior to weed seed germination to both newly transplanted and established actively growing or dormant ornamental plants where both weed control and fertilization is desired. Rainfall or overhead irrigation ¼ inch water will improve weed control actively. Do not mix into soil. Disturbing or cultivating the soil after treatment may reduce weed control. Do not apply granules to wet foliage or under conditions in which granules will collect on leaves, if so, sprinklerirrigate the plants to move granules off foliage and down to soil level. Do not apply in greenhouses as plant injury may likely result. Use the higher application rates for areas that have a history of heavy weed growth and if possible rake, cultivate and smooth the soil surface by breaking up clumps. Broadcast the granules evenly over the prepared soil by applying 2 lbs. to 4 lbs. active ingredient per acre, equal to 300 to 600 lbs. of this product/acre or 6.8 to 13.6 lbs. per 1,000 sq. ft.
