NOV 26 2012

Subject Label Notification per PRN 98-10
Product Name Chaser Turf Herbicide
EPA Registration Number 34704-928
Application Dated August 20, 2012

Dear Dr Mason,

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for Chaser Turf Herbicide (EPA Reg No 34704-928) dated August 20, 2012. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please contact Emily Hartman of my staff at (703) 347-0189 or hartman.emily@epa.gov

Sincerely,

A handwritten signature in cursive script that reads "Beth Bunbar".

**CHASER® TURF HERBICIDE
EPA REG NO 34704-928**

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION Harmful If Swallowed • Prolonged Or Frequently Repeated Skin Contact May Cause Allergic Skin Reactions In Some Individuals

Personal Protective Equipment (PPE)

Some materials that are chemical resistant to this product are barrier laminate nitrile rubber neoprene rubber and viton If you want more options follow the instructions for category E on an EPA chemical resistance category selections chart

All mixers, loaders, applicators, and other handlers must wear

- Long sleeved shirt and long pants
- Shoes and socks
- Chemical resistant gloves when applying with any handheld nozzle or equipment mixing or loading cleaning up spills or equipment or otherwise exposed to the concentrate
- Chemical resistant apron when mixing or loading cleaning up spills or equipment or otherwise exposed to the concentrate and
- Protective eyewear

Follow manufacturer s instructions for cleaning/maintaining PPE If no such instructions for washables exist use detergent and hot water Keep and wash PPE separately from other laundry

See engineering controls for additional requirements

Engineering Controls

When handlers use enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170 240 (d) (4 6)] the handler PPE requirements may be reduced or modified as specified in the WPS

USER SAFETY RECOMMENDATIONS

Users should

- Wash hands before eating drinking chewing gum using tobacco or using the toilet
- Remove clothing/PPE immediately if pesticide gets inside Then wash thoroughly and put on clean clothing If pesticide gets on skin wash immediately with soap and water
- Remove PPE immediately after handling this product Wash the outside of gloves before removing As soon as possible wash thoroughly and change into clean clothing

ENVIRONMENTAL HAZARDS

This pesticide may be toxic to fish and aquatic invertebrates Do not apply directly to water to areas where surface water is present or to intertidal areas below the mean high water mark Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas Do not contaminate water when disposing of equipment wash waters or rinsate

This chemical has properties and characteristics associated with chemicals detected in groundwater The use of this chemical in areas where soils are permeable particularly where the water table is shallow may result in groundwater contamination Application around a cistern or well may result in contamination of drinking water or groundwater

Notice Read the entire label Use only according to label directions **Before using this product, read Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies at end of label booklet If terms are unacceptable, return at once unopened**

PHYSICAL OR CHEMICAL HAZARDS

Combustible Do not use or store the product near heat or open flame

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling
Read all Directions for Use carefully before applying

Do not apply this product in a way that will contact workers or other persons either directly or through drift Only protected handlers may be in the area during application For any requirements specific to your state or tribe consult the agency responsible for pesticide regulator

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR part 170 This Standard contains requirements for the protection of agricultural workers on farms forests nurseries and greenhouses and handlers of agricultural pesticides It contains requirements for training decontamination notification and emergency assistance It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with any thing that has been treated such as plants soil or water is

- Coveralls
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170) The WPS applies when this product is used to produce agricultural plants on farms forests nurseries or greenhouses

Restricted Entry Interval For use on residential and other turf sites (excluding sod farms and turf grown for seed), do not enter or allow people (or pets) to enter the treated area until sprays have dried

GENERAL INFORMATION

Foliage sprays should be applied during warm weather when weeds are actively growing Application under drought conditions may provide less than desirable results Use low spray pressures to minimize spray drift **Apply this herbicide in a manner to avoid contacting nearby susceptible crops or other desirable plants and to avoid contaminating water intended for irrigation or domestic use Read and follow all use precautions given on this label**

GENERAL PRECAUTIONS and RESTRICTIONS

Apply this product only as specified on this label

Be sure that use of this product conforms to all applicable regulations

Use of this product in certain portions of California Oregon and Washington is subject to the January 22 2004 Order for injunctive relief in Washington Toxics Coalition et al v EPA C01 0132C (W D WA) For further information please refer to <http://www.epa.gov/esp/wtc/>

In Arizona The state of Arizona has not approved Chaser® Turf Herbicide for use on sod farms

For ground application only

Chemigation Do not apply this product through any type of irrigation system

Do not enter or allow people (or pets) to enter the treated area until sprays have dried

Do not apply this product in a way that will contact workers or other persons either directly or through drift Only protected handlers may be in the area during application

Do not apply Chaser Turf Herbicide directly to or otherwise permit it to come into direct contact with cotton grapes tobacco vegetable crops flowers fruit or ornamental trees or other desirable broadleaf plants and do not permit spray mists containing it to drift onto them

Do not apply to exposed roots of shallow rooted trees or shrubs

Chaser Turf Herbicide is formulated as a low volatile ester However the combination of spray contact with impervious surfaces such as roads and rocks and increasing ambient air temperatures may result in an increase in the volatility potential of this herbicide increasing a risk for off target injury to sensitive crops such as grapes and tomatoes

In handgun applications drift can be reduced by using low pressure Teejet® flat fan raindrop or other drift controlling nozzles Standard flat fan nozzles may also be used at no more than 20 psi At this pressure the spray pattern may be narrower

At high temperatures vapors from this product may injure susceptible crops growing nearby Excessive amounts of this herbicide in the soil may temporarily inhibit seed germination and plant growth

Most cases of groundwater contamination involving phenoxy herbicides such as 2 4-D have been associated with mixing/loading and disposal sites Caution should be exercised when handling 2 4 D pesticides at such sites to prevent contamination of groundwater supplies

CHASER® TURF HERBICIDE
EPA REG NO 34704-928

Use of closed systems for mixing or transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

SPRAY DRIFT MANAGEMENT

A variety of factors including weather conditions (e.g. wind direction, wind speed, temperature, relative humidity) and method of application (e.g. ground, aerial, airblast) can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

2,4-D esters may volatilize during conditions of low humidity and high temperatures. Do not apply during conditions of low humidity and high temperatures.

Droplet Size

When applying sprays that contain 2,4-D as the sole active ingredient or when applying sprays that contain 2,4-D mixed with active ingredients that require a Coarse or coarser spray, apply only as a Coarse or coarser spray (ASAE standard 572) or a volume mean diameter of 385 microns or greater for spinning atomizer nozzles.

When applying sprays that contain 2,4-D mixed with other active ingredients that require a Medium or more fine spray, apply only as a Medium or coarser spray (ASAE standard 572) or a volume mean diameter of 300 microns or greater for spinning atomizer nozzles.

Wind Speed

Do not apply at wind speeds greater than 15 mph. Only apply this product if the wind direction favors on-target deposition and there are not sensitive areas (including, but not limited to, residential areas, bodies of water, known habitat for nontarget species, nontarget crops) within 250 feet downwind. If applying a Medium spray, leave one swath unsprayed at the downwind edge of the treated field.

Temperature Inversions

If applying at wind speeds less than 3 mph, the applicator must determine if a) conditions of temperature inversion exist or b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

Susceptible Plants

Do not apply under circumstances where spray drift may occur to food, forage, or other plantings that might be damaged or crops there rendered unfit for sale, use, or consumption. Susceptible crops include, but are not limited to, cotton, okra, flowers, grapes (in growing stage), fruit trees (foliage), soybeans (vegetative stage), ornamentals, sunflowers, tomatoes, beans, and other vegetables, or tobacco. Small amounts of spray drift that might not be visible may injure susceptible broadleaf plants.

Other State and Local Requirements

Applicators must follow all state and local pesticide drift requirements regarding application of 2,4-D herbicides. Where states have more stringent regulations, they must be observed.

Equipment

All ground application equipment must be properly maintained and calibrated using appropriate carriers or surrogates. The boom length must not exceed 75% of the wingspan or 90% of the rotor blade diameter. For ground boom application, do not apply with a nozzle height greater than 4 feet above the crop canopy.

ADJUVANT USE When an adjuvant is to be used with this product, Loveland Products, Inc. recommends using **LI 700®** for drift control and defoaming. The use of **Compadre®** at 0.125% v/v is recommended.

Preparing The Spray Chaser Turf Herbicide in water forms an emulsion (not a solution) and separation may occur unless the spray mixture is agitated continuously. Fill the spray tank about half full with clean water. Then add the Chaser Turf Herbicide and complete filling the tank with agitation running. Mix thoroughly and continue moderate agitation while spraying.

8/9

CHASER® TURF HERBICIDE
EPA REG NO 34704-928

LABELED USES
Turf

Broadcast Treatment of Residential, Commercial, and Recreational Turf and Commercial Sod Farms

Apply 1.0 to 2.0 quarts (0.5 to 1.0 pound acid equivalent) of Chaser Turf Herbicide in enough water to make 20.0 to 200 gallons total spray per acre to control broadleaf weeds growing in tall fescue bluegrass or perennial ryegrass turf. **Do not** use on other grass species such as bentgrass or St. Augustine grass unless injury can be tolerated. Chaser Turf Herbicide at 3.0 pints per acre (0.75 pound acid equivalent) or 1.1 ounces per 1000 square feet will provide control of most weeds listed. The use of 4.0 pints per acre (1.0 pound acid equivalent) or 1.47 ounces per 1000 square feet is suggested for those followed by (a). Optimum control of those species followed by (b) has been obtained when 2 applications of 3.0 pints per acre (0.75 pound acid equivalent per acre) have been made 4 weeks apart. Apply from early spring through early fall when weeds are growing. Applications should be made 4 weeks apart to minimize grass injury.

Newly seeded turf should be mowed 2 or 3 times before being treated. Do not water for 24 hours after application. Do not reseed for 3 weeks after application.

Broadcast Application Restrictions for Residential, Commercial, and Recreational Turf Postemergence Limited to 2 applications per year. Use a maximum of 6.0 pints Chaser Turf Herbicide (1.5 pounds acid equivalent) per acre per application. The maximum seasonal rate is 6.0 quarts Chaser Turf Herbicide per acre (3.0 pounds acid equivalent per acre) excluding spot treatments.

Broadcast Application Restrictions for Commercial Sod Farms A maximum of 2.0 quarts of Chaser Turf Herbicide per acre may be applied up to 2 times a year to control a variety of broadleaf weed species which may germinate at different periods. Limited to 2 applications per year. Do not exceed a maximum of 8.0 pints Chaser Turf Herbicide per acre (2.0 pounds acid equivalent per acre) per application. Observe a minimum of 21 days between applications.

Spot Treatment of Residential, Commercial, and Recreational Turf and Commercial Sod Using Portable Sprayers

Mix 1.0 to 2.0 fluid ounces (0.01 to 0.03 pound acid equivalent) of Chaser Turf Herbicide in enough water to make 3.0 gallons of spray (1.0 to 2.0 quarts per 100 gallons of spray) and apply at any time broadleaf weeds are susceptible by wetting foliage of undesirable plants to point of runoff.

IN CASE OF AN EMERGENCY

In case of an emergency endangering health or the environment involving this product call 1 866 944 8565

AGRICULTURAL CHEMICAL

Do not ship or store with food feeds drugs or clothing

STORAGE AND DISPOSAL

Do not contaminate water food or feed by storage or disposal

PESTICIDE STORAGE Store above 10 °F or agitate before use

PESTICIDE DISPOSAL Pesticide wastes are toxic. Improper disposal of excess pesticide spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL Nonrefillable container Do not reuse this container to hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning it may be allowable to temporarily hold rinsate or other pesticide related materials in the container. Contact your state regulatory agency to determine allowable practices in your state.

Once cleaned some agricultural plastic pesticide containers can be taken to a container collection site or picked up for recycling. To find the nearest site contact your chemical dealer or manufacturer or contact The Agricultural Container Recycling Council (ACRC) at www.acrecycle.org. If not recycled then puncture and dispose of in a sanitary landfill or incineration or if allowed by state and local authorities by burning. If burned stay out of smoke.

Triple rinse or pressure rinse container (or equivalent) promptly after emptying

(For packages equal to or less than 5 gallons) Triple rinse as follows Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. **Pressure rinse as follows** Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

(For packages with capacities greater than 5 gallons or 50 pounds) Triple rinse as follows Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth ensuring at least one complete revolution for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. **Pressure rinse as follows**
