

## DIRECTIONS FOR USE IN SWIMMING POOLS:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Initial Dose:** add 1 gallon 5% *Aqua-Blue* swimming pool algaecide to 25,000 gallons of pool water.

**Maintenance Dose:** add 1 quart 5% *Aqua-Blue* swimming pool algaecide to 25,000 gallons of pool water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose. Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of 5% *Aqua-Blue* for each 5,000 gallons of fresh make-up water added per week. When swimming season is over, add 1 gallon of 5% *Aqua-Blue* to 25,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

When 5% *Aqua-Blue* is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* and *Phormidium retzii* (blue-green algae), *Lyngbya versicolor* (blue-green) and other swimming pool algae.

5% *Aqua-Blue* is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other water-treating chemicals. 5% *Aqua-Blue* works best when added by itself directly to pool water. 5% *Aqua-Blue* at use dilution is non-corrosive to inanimate surfaces.

## DIRECTIONS FOR USE IN OUTSIDE SPAS/ WHIRLPOOLS/ HOT TUBS:

**Initial Dose:** Add 25.6 ounces of 5% *Aqua-Blue* Swimming Pool Algaecide per 5,000 gallons of water. Initial dose is used upon filling of Spa/Whirlpool/Hot Tub Bath.

**Maintenance Dose:** Add 6.4 ounces of 5% *Aqua-Blue* swimming Pool Algaecide per 5,000 gallons of water. Maintenance dose should be added at 3-5 days intervals. If high temperatures prevail or Spa/Whirlpool/Hot Tub Bath has unusually heavy use, add maintenance dose more frequently.

Drain and clean Spa/Whirlpool/Hot Tub Bath at least once a month or as needed depending on bather load.

ACCEPTED

*Aqua-Blue* Algaecide

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 34743-7

Concentrated Swimming Pool Algaecide Keeps Pool Water Clear and Free of Visible Algae.

Controls Algae Slime in both swimming pools and outside Spa/Whirlpool/Hot tub baths.

### ACTIVE INGREDIENTS:

n-Alkyl (60% C<sub>14</sub>, 30% C<sub>16</sub>, 5% C<sub>12</sub>, 5% C<sub>18</sub>)

dimethyl benzyl

ammonium chlorides..... 4.2%

n-Dialkyl (60% C<sub>14</sub>, 30% C<sub>16</sub>, 5% C<sub>12</sub>, 5% C<sub>18</sub>)

methyl benzyl

ammonium chlorides..... 0.6%

INERT INGREDIENTS..... 95.0%

TOTAL 100.0%

## PRECAUTIONARY STATEMENTS

Hazard to Human and Domestic Animals

### DANGER

Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

### STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician.

### NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock as well as oxygen and measures to support breathing manually or mechanically may be needed. If persistent, convulsions may be controlled by the cautious intravenous injection of a short-acting barbiturate drug.

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

## STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY  
STORAGE OR DISPOSAL

STORAGE—Store in a dry place no lower in temperature than 50°F or higher than 120°F.

PESTICIDE DISPOSAL—Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL—Do not reuse empty container. Triple rinse empty container with water. Return metal drum then offer for reconditioning or puncture and dispose of in a sanitary landfill, or by other procedures approved by State or local authorities. Plastic containers may be disposed of in a sanitary landfill, incinerated or, if allowed by local authorities, by burning. If burned, stay out of smoke.
