NAME AND ADDRESS OF REGISTRANT (Include ZIP . Set

Ionics Incorporated D/B/A Elite Chemicals P.O. Box 923 Watertown, MA 02272-0923

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indersement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

- 1. Submit/cite all data required for registration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
- Make the labeling changes listed below before you release the product for shipment:
 - Add the phrase "EPA Registration No. 34743-16."
 - Immediately after or below the heading "Directions for Use", add the required statement, "It is a violation of Federal law to use this product in a manner inconsistent with its labeling."
- 3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec.

DIRECTIONS FOR USE

SWIMMING POOL WATER DISINFEC-TION FOR A NEW POOL OR SPRING START-UP: Superchlorinate with 1 to 1.5 gallons of the product for each 10,000 gallons of water to yield 5 to 10 ppm available chloring by weight. Check the level of available chlorine with a test kit. Adjust and maintain pool water pH to between 7.2 to 7.6. Adjust and maintain the ...kalimity of the pool to between 50 to 100 ppm TO MAINTAIN THE POOL: Add manually or by a feeder device 26 ounces of this product for each 10,000 gallons of water to yield an available chlorine residual between 0.6 to 1.0 ppm by weight. STABILIZED POOLS should maintain a residual of 1.0 to 1.5 ppm available chlorine. Lest the pH, available chlorine residual and alkalinity of the water frequently with appropriate test kits. Frequency of water treatment will depend upon the temperature and number of swimmers. Every 7 days, or as necessary, superchlorinate the pool with 1 to 1.5 gailens of product for each 10,000 gallons of water to yield 5 to 10 ppm available chloring by weight. Check the level of available chlo-

AT THE END OF THE SWIMMING POOL SEA-SON OR WHEN WATER IS TO BE DRAINED FROM THE POOL: Chlorine must be allowed to dissipate from treated pool water before discharge. Do not chlorinate the pool within 24 hours prior to discharge.

WINTERIZING POOLS: While water is still clear and clean, apply 7 ounces of product per. Store this product in a cool dry area, away 1,000 gallons, while filter is running, to obtain a 3 ppm available chlorine residual, as cetermined by a suitable test kit. Cover pool, prepare quantities of water Product or rusates that heater, filter and heater components for winter cannot be used should be diluted with water by following manufacturer's instructions.

FOR CONTROL OF ALGAE: If algae growth develops resulting in a greenish growth on the pool sides and/or bottom, a slimy feel to the pool sides, or cloudiness in the pool water, treatment with Elite Econo Shock should be initiated. Adjust pool water pH to 7.2-7.6. Add 2.5 gallon² of Elite Econo Shock in the evening for each 14,000 gallons of pool water. This dosage is equivalent to 10 ppm available chlorine by weight. After circulating the pool water for a minimum of four hours at 5-10 ppm rine with a test kit. Do not reenter pool until the available chlorine, turn the pool water chlorine residual is between 1.0 and 3.0ppm. recirculation system off. Brush pool sides and

bottom thoroughly to loosen the dead algae. Vacuum the pool the following morning. Do not allow swimmers to use the pool until a chloring residual of 1.0-3.0 ppm has been established in the pool water. Repeat shock treatment as necessary.

STORAGE AND DISPOSAL:

from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large before disposal in a sanitary sewer. Do not reuse container, but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment. Store in upright position.
